PART II - OTHER INFORMATION

Financial Risk Management Objectives and Policies

The Company's principal financial liabilities are composed of trade and other current liabilities. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal assets include cash and cash equivalents, receivables and installment receivables. The Company also holds financials assets at FVTPL, financials assets at FVOCI, deposits, refundable deposits and construction bonds, guarantee deposits, loan payable, long-term debt, lease liability, and obligations under finance lease.

The main risks arising from the Company's financial assets and financial liabilities are interest rate risk, foreign currency risk, equity price risk, credit risk and liquidity risk. The Company's BOD and management review and agree on the policies for managing each of these risks and these are summarized below.

Interest Rate Risk. Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial assets and financial liabilities. The Company's exposure to interest rate risk relates primarily to the Company's long-term debt which is subject to cash flow interest rate risk.

The Company's policy is to manage its interest cost by limiting its borrowings and entering only into borrowings at fixed and variable interest rates.

Foreign Currency Risk. Foreign currency risk is the risk that the fair value or future cash flows of financial asset or financial liability will fluctuate due to changes in foreign exchange rates.

It is the Company's policy to ensure that capabilities exist for active but conservative management of its foreign currency risk. The Company seeks to mitigate its transactional currency exposure by maintaining its costs at consistently low levels, regardless of any upward or downward movement in the foreign currency exchange rate.

Equity Price Risk. Equity price risk is the risk that the fair value of quoted investments held for trading and financial assets at FVOCI in listed equities decreases as a result of changes in the value of individual stock. The Company's exposure to equity price risk relates primarily to the Company's investments held for trading. The Company monitors the equity investments based on market expectations. Significant movements within the portfolio are managed on an individual basis and all buy and sell decisions are approved by the BOD.

Credit Risk. Credit risk is the risk that the Company will incur a loss because its customers or counterparties fail to discharge their contractual obligations. It is the Company's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, receivable balances are monitored on an ongoing basis with the result that the Company's exposure to bad debts is not significant. The Company does not offer credit terms without the specific approval of the management. There is no significant concentration of credit risk.

In the Company's real estate business, title to the property is transferred only upon full payment of the purchase price. There are also provisions in the sales contract which allow forfeiture of installments/deposits made by the customer in favor of the Company and retain ownership of the property. The Company has the right to sell, assign or transfer to third party and any interest under sales contract, including its related receivables from the customers. The Company's primary target customers are high-income individuals and top corporations in the Philippines and overseas. These measures minimize the credit risk exposure or any margin loss from possible default in the payments of installments.

Trade receivables from sale of real estate units are secured with pre-completed property units. The legal title and ownership of these units will only be transferred to the customers upon full payment of the contract price. Receivables from sale of club shares are secured by the shares held by the Company. For other receivables, since the Company trades only with recognized third parties, there is no requirement for collateral.

With respect to credit risk arising from the financial assets of the Company, which comprise of cash and cash equivalents, investments held for trading, receivables, finance lease receivables, advances to associates, financial assets at FVOCI, deposits, refundable deposits and construction bonds and guarantee bonds, the Company's exposure to credit risk arises from default of the counterparty, with a maximum exposure equal to the carrying value of these financial assets.

Liquidity Risk. Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. The Company seeks to manage its liquidity profile to be able to finance its capital expenditures and service its maturing debts. The Company's objective is to maintain a balance between continuity of funding and flexibility through valuation of projected and actual cash flow information. The Company considers obtaining borrowings as the need arises.

Fair Value of Financial Assets and Financial Liabilities
The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;
- Level 2: other techniques for which all inputs which have significant effect on the recorded fair value are observable, either directly or indirectly; and,
- Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

Set out below is a comparison by category and by class of carrying values and fair values of all the Company's financial assets and liabilities:

Amount in thousands	**September 30, 2025 (Unaudited)**		**December 31, 2024 (Audited)**	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Financial assets measured at fair value				
Through profit or loss	48,194	48,194	42,745	42,745
Through other comphensive income	11,477,022	11,477,022	13,098,696	9,321,093
Financial assets for which fair value is disclosed	21,671,891	40,149,172	22,553,515	41,782,462
Financial liabilities for which fair value is disclosed				
Refundable deposit	263,352	263,352	249,495	249,495
Long term debt	6,752,706	6,752,706	7,442,941	7,442,941

Fair value is defined as the amount at which the financial assets and financial liabilities could be exchanged in a current transaction between knowledgeable willing parties in an arm's length transaction, other than in a forced liquidation or sale. Fair values are obtained from quoted market prices, discounted cash flow models and other valuation models, as appropriate.

The following methods and assumptions are used to estimate the fair value of each class of financial assets and financial liabilities:

Cash and Cash Equivalents, Advances to Associates, Receivables, Loans Payable and Trade and Other Current Liabilities and Installment Payable. The carrying values of these financial assets approximate their fair values due to the relatively short-term maturities of these financial assets and financial liabilities.

Financial Assets at FVTPL and Financial Assets at FVOCI. The fair values of Financials Assets at FVTPL and financial assets at FVOCI in quoted equity shares are based on quoted prices in the PSE or those share whose prices are readily available from brokers or other regulatory agency as at reporting date. There are no quoted market prices for the unlisted shares, and there are no reliable sources of their fair values, therefore, these are carried at cost net of any impairment loss.

Long-term Debt. The fair value of long-term loans payable is determined by discounting the obligations' expected future cash flows using prevailing interest rates as at reporting dates.

Determination of Fair Value and Fair Value Hierarchy
The Company has Investments held at FVTPL and at FVOCI in quoted equity securities recorded at Level 1 fair value. These are the only financial assets and financial liabilities carried at fair value.

Segment Information

The primary segment reporting format is presented based on business segments in which the Company's risks and rates of return are affected predominantly by differences in the products and services provided. Thus, the operating businesses are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets.

The Company is primarily in the businesses of real estate development, property management and gaming and gaming-related activities. Others pertain to investment companies which are mostly dormant.

Segment assets include all operating assets used by a segment and consist principally of operating cash and cash equivalents, receivables, finance lease receivables, real estate for sale, land held for future development, investment properties, property and equipment and right of use assets net of accumulated depreciation and impairment. Segment liabilities include all operating liabilities and consist principally of accounts payable and other liabilities. Segment assets and liabilities do not include deferred income taxes, investments and advances and borrowings.

Segment revenue, segment expenses and segment performance include transfers among business segments. The transfers, if any, are accounted for at competitive market prices charged to unaffiliated customers for similar products. Such transfers are eliminated in consolidation.

The amounts of segment assets and liabilities and segment profit or loss are based on measurement principles that are similar to those used in measuring assets and liabilities and profit or loss in the unaudited interim condensed consolidated financial statements, which are in accordance with PFRSs.

Financial information about the Company's business segments are shown below:

The Parent Company's Board of Directors, the chief operating decision maker of the Company, monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profit or loss and is measured consistently with operating profit or loss in the unaudited interim condensed consolidated financial statements. However, financing (including interest expense and interest income) and income taxes are managed as a whole and are not allocated to operating segments. Transfer prices between operating segments are on an arm's length basis in a manner similar to transactions with third parties.

Disclosure of the geographical information regarding the Company's revenues from external customers and total assets have not been provided since all of the Company's consolidated revenues are derived from operations within the Philippines.
