Attention: **ATTY. JOHANNE DANIEL M. NEGRE**
Officer-in-Charge, Disclosure Department

Gentlemen:

Attached please find a duly accomplished SEC Form 17-Q (Quarterly Report) for the quarterly period ended September 30, 2025.

Thank you.

Very truly yours,

6CED4419702647D
RACHEL R. HERNANDEZ
Corporate Secretary

PART I – FINANCIAL INFORMATION

Item 1. Financial Statements.

Attached to this report as **Annex “A”** is the Corporation’s unaudited interim condensed consolidated financial statements as of September 30, 2025 (with comparative audited figures as at December 31, 2024) and for the nine-month periods ended September 30, 2025 and 2024.

The unaudited interim condensed consolidated financial statements for the period ended September 30, 2025 have been prepared in accordance with Philippine Financial Reporting Standards (“PFRS”) specific to Philippine Accounting Standard 34, Interim Financial Reporting, and hence do not include all of the information required in the December 31, 2024 annual audited consolidated financial statements.

Item 2. Management's Discussion and Analysis (MD&A) of Financial Condition and Results of Operations.

In the following discussion and analysis of our financial condition and results of operations, unless the context indicates or otherwise requires, any references to “we”, “us”, “our”, “Company”, “First Gen Group” means First Gen Corporation and its consolidated subsidiaries and references to “First Gen” pertains to the Parent Company, First Gen Corporation, not including its subsidiaries (please see Note 2 – Summary of Material Accounting and Financial Reporting Policies to the accompanying unaudited interim condensed consolidated financial statements for the list of these subsidiaries, including a description of their respective principal business activities and First Gen’s direct and/or indirect equity interest).

The following discussion and analysis of the Company’s consolidated financial performance for the period ended September 30, 2025 should be read in conjunction with its unaudited interim condensed consolidated financial statements and the accompanying notes as at September 30, 2025 and the audited consolidated financial statements as at December 31, 2024. The primary objective of this MD&A is to help the readers understand the dynamics of the Company’s business and the key factors underlying its financial results. Hence, our MD&A is comprised of a discussion of its core business, and analysis of the results of operations for each business segment. This section also focuses on key statistics from the unaudited interim condensed consolidated financial statements and pertains to known risks and uncertainties relating to the power industry in the Philippines where we operate up to the stated reporting period.

This report also contains information that may constitute “forward-looking statements.” Generally, the words “believe,” “expect,” “intend,” “estimate,” “anticipate,” “plan,” “foresee,” “will,” and similar expressions identify forward-looking statements, which generally are not historical in nature. However, the absence of these words or similar expressions does not mean that a statement is not forward-looking. All statements that address operating performance, events or developments that we expect or anticipate will occur in the future - including statements relating to revenue growth and statements expressing general views about future operating results - are forward-looking statements. Such forward-looking statements are made based on management’s current expectations or beliefs as well as assumptions made by, and information currently available to, management. First Gen does not make express or implied representations or warranties as to the accuracy and completeness of the information contained herein and shall not accept any responsibility or liability (including any third party liability) for any loss or damage, whether or not arising from any error or omission in compiling such information or as a result of any party’s reliance or use of such information. In addition, forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from our Company’s historical experience and our present expectations or projections. These risks and uncertainties include, but are not limited to, those described in Risk Factors Affecting the Company’s Results of Operations and elsewhere in this report and in our Annual Report on Form 17-A for the year ended December 31, 2024, and those described from time to time in our future reports filed with the Philippine Securities and Exchange Commission (SEC).

The financial information appearing in this report and in the accompanying audited consolidated financial statements is stated in United States dollars. All references to “U.S. dollars,” “US\$” or “dollars” are to the lawful currency of the United States; all references to “Philippine Pesos,” “Php”, “P”, or “Pesos” are to the lawful currency of the Philippines; and all references to “Euro” or “€” are to the lawful currency of the European Union. Unless otherwise indicated, translations of Philippine Peso amounts into U.S. dollars in this report and in the accompanying audited consolidated financial statements were made based on the exchange rate quoted through the Banker’s Association of the Philippines as at September 30, 2025.

Additional information about the Company, including annual and quarterly reports, can be found on our corporate website www.firstgen.com.ph.

BUSINESS OVERVIEW

Description of the Nature and Scope of the Business including Products or Services

First Gen Corporation (the Company or First Gen) is engaged in the business of power generation through the following operating companies:

- (i) Energy Development Corporation (EDC), with an aggregate installed capacity of approximately 1,380.09 MW owns and operates the following plants:
 - o 578.97 MW² Unified Leyte geothermal power plants
 - o 172.5 MW³ Palinpinon geothermal power plants
 - o 187.273 MW⁴ Bac-Man geothermal power plants
 - o 123.0 MW Tongonan geothermal power plant
 - o 106.99 MW⁵ Mindanao geothermal power plants
 - o 49.37 MW Nasulo geothermal power plant
 - o 150.0 MW Burgos Wind Energy project
 - o 6.82 MW Burgos Solar Energy project
 - o 5.17 MW Solar Rooftop projects
- (ii) First Gas Power Corporation (FGPC), which operates the 1,000 MW⁶ Santa Rita natural gas-fired power plant;
- (iii) FGP Corp. (FGP), which operates the 500 MW⁷ San Lorenzo natural gas-fired power plant;
- (iv) First NatGas Power Corp. (FNPC), which operates the 420 MW⁸ San Gabriel natural gas-fired power flex plant;
- (v) Prime Meridian PowerGen Corporation (PMPC), which operates the 97 MW⁹ Avion natural gas-fired power plant;
- (vi) FG Bukidnon Power Corporation (FG Bukidnon), which operates the 1.6 MW¹⁰ FG Bukidnon mini-hydroelectric power plant;
- (vii) First Gen Hydro Power Corporation (FG Hydro), which operates the 132.8MW¹¹ Pantabangan-Masiway hydroelectric power plants; and
- (viii) Fresh River Lakes Corporation (FRLC), which operates the 165 MW¹² Casecnan hydroelectric power plant.

FGEN LNG Corporation (FGEN LNG) was incorporated and registered with the SEC on May 22, 2013, and was a wholly-owned subsidiary of First Gen, through First Gen LNG Holdings Corporation (LNG Holdings), until February 19, 2025 when Tokyo Gas completed the purchase of a 20% stake in FGEN LNG.

In January 2025, FGEN LNG received a Permit to Operate and Maintain (POM) from the Department of Energy (DOE) for its Batangas Storage and Regasification LNG Terminal (the "Terminal") located in the FGEN Clean Energy Complex (FGCEC) in Batangas City, Philippines. The POM authorizes the operation of the Terminal for its own-use and is valid for a period of twenty-five (25) years. The Terminal is an integrated

² Nominal Capacity indicated in the nameplate of the turbine unit; Unified Leyte's combined installed nameplate capacities as indicated in its ERC operating permits is 572.82MW

³ Nominal Capacity indicated in the nameplate of the turbine unit; Palinpinon 2's installed nameplate capacity as indicated in its ERC operating permit is 60MW which does not include the 20MW-Nasuji plant

⁴ Nominal Capacity indicated in the nameplate of the turbine units; Bac-Man's aggregated rated capacity is 130MW and the aggregated dependable capacity is 140 MW as indicated in its Provisional Authority to Operate (PAO) issued by the ERC in November 2024. On March 19, 2025, the ERC issued the PAO for the Palayan Binary Power Plant with a rated capacity of 35.7MW and a dependable capacity of 28.0MW. As of June 30, 2025, the total rated capacity for Bac-Man is 165.7MW and the total dependable capacity is 168.0MW. On August 1, 2025, Tanawon Geothermal Power Plant was inaugurated with a rated capacity of 21.573MW and net maximum stable load of 20.623MW. As of September 30, 2025, the total rated capacity for Bac-Man is 187.273MW and the total dependable capacity is 188.623MW.

⁵ Nominal Capacity indicated in the nameplate of the turbine unit; Mindanao 1's installed nameplate capacity as indicated in its ERC operating permit is 54.24MW; Mindanao 2's installed nameplate capacity as indicated in its ERC operating permit is 54.24MW; Mindanao 3's installed nameplate capacity as indicated in its ERC operating permit is 3.66MW.

⁶ Nominal Capacity; Santa Rita's installed nameplate capacity as indicated in its ERC operating permit is 1,173.0MW

⁷ Nominal Capacity; San Lorenzo's installed nameplate capacity as indicated in its ERC operating permit is 586.5MW

⁸ Nominal Capacity; San Gabriel's installed nameplate capacity as indicated in its ERC operating permit is 442.85MW

⁹ Nominal Capacity; Avion's installed nameplate capacity as indicated in its ERC operating permit is 130.798MW.

¹⁰ FG Bukidnon's installed nameplate capacity as indicated in its ERC operating permit is 1.6MW

¹¹ FG Hydro's installed nameplate capacity as indicated in its ERC operating permit is 132.802MW

¹² Nominal Capacity; Casecnan's installed nameplate capacity as indicated in its ERC operating permit is 153MW

facility comprising a Multi-Purpose Jetty, an Onshore Gas Receiving Facility, and a Floating Storage and Regasification Unit (FSRU) as its main components with FGEN LNG as the owner-operator.

The Terminal enables the Company to utilize both Malampaya gas and imported LNG to supply natural gas fuel to the ~2,000 MW of power plants located at FGCEC. As of September 30, 2025, the Company has successfully completed the tender and receipt of eight (8) Liquefied Natural Gas (LNG) cargoes since completion of the Terminal.

Last May 30, 2025, First Gen and Prime Infrastructure Capital, Inc. (Prime Infra) executed a Term Sheet. Thereafter, the parties signed a Share Purchase Agreement on July 15, 2025 for the purchase by Prime Infra of a 60% equity stake in First Gen subsidiaries relating to its gas business. On October 23, 2025, First Gen and Prime Infra were advised by the Philippine Competition Commission (PCC) that it rendered a decision clearing the proposed transaction. Subject to the satisfaction of certain conditions precedent, the transaction will result in a strategic partnership with Prime Infra indirectly owning 60% of the issued and outstanding capital stock of the Santa Rita Power Plant, San Lorenzo power plant, San Gabriel power plant, Avion power plant, the proposed Santa Maria power plant, as well as the Terminal. First Gen will retain a 40% stake in the said projects. First Gen's retention of a 40% ownership of all the gas business will ensure proper continuity and stability of the gas operating plants, which will, in turn, greatly benefit consumers by way of more stable, predictable and lower prices, far removed the uncertainties of spot purchases.

First Gen's direct and indirect 45.8% economic interest in EDC is held through the Company, Prime Terracota Holdings Corporation (Prime Terracota), Northern Terracotta Power Corporation (Northern Terracotta), and Red Vulcan Holdings Corporation (Red Vulcan). As of September 30, 2025, the Company's total voting and economic interests in EDC are 65.0% and 45.8%, respectively. First Gen has a 40.0% direct economic interest in FG Hydro.

First Gen Energy Solutions, Inc. (FGES), a wholly-owned Retail Electricity Supplier (RES) subsidiary of First Gen, was incorporated and registered with the SEC on November 24, 2006. EDC likewise has RES businesses operating under Bac-Man Geothermal Inc. and Green Core Geothermal Inc. These RES businesses market, supply, purchase and sell electricity generated by First Gen and EDC to address the power requirements of Contestable Customers. Additionally, the RES businesses also provide value-added services relevant to the Company's core business.

Principal Products or Services

First Gen and its subsidiaries are primarily involved in the power generation business. It owns power plants that utilize natural gas, geothermal, wind, hydro, and solar power. The electricity generated is primarily sold to Meralco, NPC, electric cooperatives, privately-owned distribution utilities (DUs), large industrial clients, and the National Grid Corporation of the Philippines (NGCP), pursuant to long-term Power Purchase Agreements (PPAs), Power Supply Contracts (PSCs), Power Supply Agreements (PSAs), the Wholesale Electricity Spot Market (WESM), Ancillary Services Procurement Agreement (ASPA), and the Feed-In-Tariff (FiT).

The following is a summary of First Gen's products/services and their markets as of September 30, 2025:

Company	Principal products/services	Market	Effective Contribution to Consolidated Revenues* of First Gen
Geothermal			
EDC	EDC holds service contracts with the DOE corresponding to 13 geothermal contract areas, 15 Wind Energy Service contracts, two (2) Solar Energy Service contracts	NPC (for power generation & steam sales), WESM, NGCP, DUs, Electric Cooperatives and Contestable Customers pursuant to PPAs, PSAs and contracts, and FiT	US\$551.1 million** (or ₱31,462.7 million)

	EDC, through its subsidiary, EDC Burgos Wind Power Corporation (EBWPC), operates the 150 MW wind project in Burgos, Ilocos Norte. EDC also owns and operates the 6.82 MW Burgos Solar Power Plant. EDC operates the 5.17 MW Gaisano Rooftop Solar project located in Iloilo, Leyte, Aklan, and Sorsogon.		
Natural Gas			
FGPC	- Power generation	MERALCO	US\$703.8 million
FGP	- Power generation	MERALCO	US\$347.2 million
FNPC	- Power generation	PEZA ¹³ / WESM Energy and Reserve Markets ¹⁴	US\$60.5 million
PMPC	- Power generation	WESM Energy and Reserve Markets / NGCP / Contestable Customers via FGES	US\$41.0 million (or ₱2,338.8 million)
Hydro			
FG Hydro	- Power generation	WESM / Contestable Customers / PSAs with industrial customers / Reserve Market	US\$41.0 million (or ₱2,340.7 million)
FRLC	- Power generation	WESM / Contestable Customers	US\$32.7 million (or ₱1,866.3 million)
FG Bukidnon	- Power generation	Minergy ¹⁵	US\$0.7 million (or ₱40.1 million)
Other Power-related Businesses			
Pi Energy	- Energy solutions (including energy audits, provision of remote energy monitoring systems, secondary to primary metering services, behind the meter solar installations, interconnection line access, energy sourcing and maintenance of power systems)		US\$6.4 million (or ₱367.5 million)
FGES	- Retail energy supply	Contestable Customers	US\$2.2 million (or ₱127.8 million)

* Pertains to revenues from sale of electricity only

** Pertains to EDC's consolidated revenues from sale of electricity, excluding FG Hydro

Note: The Philippine Peso balances of EDC, FG Bukidnon, FG Hydro, FRLC, FGES, Pi Energy, and PMPC were translated to U.S. Dollar using the weighted average rate of US\$1.00:₱57.095 for the period ended September 30, 2025. FGP, FGPC, and FNPC's functional currency is the U.S. Dollar.

¹³ San Gabriel started selling to PEZA on June 26, 2025.

¹⁴ Following the expiration of San Gabriel's PPA with MERALCO effective February 23, 2024.

¹⁵ Following the expiration of FG Bukidnon's PSA with CEPALCO effective March 28, 2025.

Plant Capacity ⁽⁵⁾	3,696.5 MW	3,639.2 MW

(1) Earnings before Interest, Taxes, Depreciation and Amortization (EBITDA). The Company computes EBITDA as earnings before net finance expense, income tax provision, depreciation and amortization, and other income/expense. It provides management and investors with a tool for determining the ability of the Group to generate cash from operations to cover financial charges and income taxes. It is also a measure to evaluate the Group's ability to service its debts.

(2) Earnings per Share (EPS). The Company computes EPS as attributable net income to equity holders of the Company minus preferred dividends, and then the difference is divided by the period's weighted average common shares.

(3) Recurring Net Income (RNI). The Company computes RNI as net income subtracted by non-recurring items, such as loan and swap extinguishment costs, insurance claims, one-time gains and losses, movements in deferred income taxes, unrealized foreign exchange differences, and MTM gains (loss) on derivative transactions.

(4) Free Cash Flows (FCF). The Company computes FCF as the sum of movements in net cash flow from operations, net cash flow from investing, and effect of foreign exchange rate changes.

(5) Plant Capacity: The Company computes the Plant Capacity as total consolidated capacity in megawatts (MW).

Review of September 30, 2025 operations vs. September 30, 2024 operations

The First Gen Group's consolidated net income totaled \$265.8 million in the first nine months of 2025, a \$5.3 million, or 2.0% decrease from the prior year's \$271.2 million. The decrease was primarily attributable to lower net income contributions from EDC (ex-FG Hydro), San Gabriel, and the Parent Company.

Net Income Attributable to Equity Holders of the Parent Company

Net income attributable to the equity holders of the Parent Company increased by \$8.4 million, or 4.0% to \$215.4 million in the first nine months of 2025, compared to \$207.0 million recognized in the same period last year. The increase in attributable net income was mainly due to the higher contributions of the following:

- FGEN LNG's net income contribution increased by \$33.4 million, or 3,407.6% to \$34.4 million net income in the first nine months of 2025 from \$1.0 million in the same period last year. The increase

was mainly due to the terminal fees billed to the natural gas plants and income from tugboat support operations.

- FG Hydro's net income contribution increased by \$9.6 million, or 307.7% to \$12.7 million in the first nine months of 2025 from \$3.1 million in the same period last year. The increase was primarily due to a growth in revenues due to a higher starting water elevation and higher Irrigation Diversion Requirement (IDR) that led to higher generation, and an increased capacity sold to the Reserve Market. FG Hydro also recorded lower plant O&M expenses resulting from lower replacement power purchases in 2025 versus the previous year.
- Santa Rita's net income contribution increased by \$8.1 million, or 8.8% to \$99.8 million in the first nine months of 2025 from \$91.7 million in the same period last year. The increase was mainly attributable to higher revenues resulting from its higher Net Electrical Output (NEO) in 2025 compared to 2024, lower G&A expenses, lower interest expenses following the full settlement of its long-term loans in May 2024, and a higher deferred income tax benefit.
- Avion's net income contribution increased by \$4.6 million, or 95.3% to \$9.4 million in the first nine months of 2025 from \$4.8 million in the same period last year. The increase was driven mainly by lower fuel expense due to less liquid fuel consumption from fewer Malampaya outages in 2025, coupled with lower insurance and tax payments versus the same period last year. Avion also recorded lower interest expenses following the full settlement of its long-term loans in December 2024.
- San Lorenzo's net income contribution increased by \$3.2 million, or 9.9% to \$35.1 million in the first nine months of 2025 from \$31.9 million in the same period last year. The increase was primarily due to lower interest expenses resulting from scheduled debt repayments and less tax payments due to lower local business tax (LBT) expenses as a consequence of lower gross receipts in 2024.

The above increases were partially offset by the following decreases:

- San Gabriel's net income contribution decreased by \$24.0 million, or 112.7% to a \$2.7 million net loss in the first nine months of 2025 from \$21.3 million net income in the same period last year. The decrease was a result of lower WESM revenues due to lower dispatch, as well as the expiration of its PSA with Meralco in February 2024.
- EDC's net income contribution (ex-FG Hydro) decreased by \$20.5 million, or 34.3% to \$39.2 million in the first nine months of 2025 from \$59.7 million in the same period last year. The decrease was a result of lower revenues mainly due to lower average selling prices to the WESM, and a higher interest expense versus the same period last year due to the new debt availed in 2024 and during the first nine months of 2025.
- The Parent Company's net loss contribution increased by \$4.3 million, or 19.2% to a \$26.8 million net loss for the first nine months of 2025, from the \$22.5 million net loss in the same period last year. This was mainly a result of other charges incurred in 2025 due to a Debt Issuance Cost (DIC) write-off and the recognition of foreign exchange losses in 2025, a reversal from last year's foreign exchange gains, due to its lower net Peso financial liability position following the voluntary prepayment of its ₱10 billion loans with each of BDO and BPI.
- FRLC's net income contribution decreased by \$2.3 million, or 18.1% to \$10.5 million in the first nine months of 2025 from \$12.9 million in the same period last year. The decrease was primarily due to higher tax payments and the recognition of interest expense on the long-term debt availed in August 2025.

Revenues from sale of electricity

The following table shows the composition of First Gen Group's consolidated revenues by platform for the periods ended September 30, 2025 and 2024:

Revenue Mix	September 2025	%	September 2024	%	Changes	%
Geothermal/Wind/Solar*	\$551,058	30.8%	\$579,318	31.4%	(\$28,260)	-4.9%
Natural gas	1,152,474	64.5%	1,208,254	65.4%	(55,780)	-4.6%
Hydro	74,387	4.2%	47,561	2.6%	26,826	56.4%
Others*	8,675	0.5%	11,798	0.6%	(3,123)	-26.5%
	\$1,786,594	100.0%	\$1,846,931	100.0%	(\$60,337)	-3.3%

*Net of intercompany transactions

Revenues for the first nine months of 2025 decreased by \$60.3 million, or 3.3% from \$1,846.9 million to \$1,786.6 million. The decrease was due to the movements per platform as explained below:

Geothermal/Wind/Solar (“GWS”)

Revenues from the GWS platform (EDC ex-FG Hydro) decreased by \$28.3 million, or 4.9% to \$551.0 million in the first nine months of 2025 from \$579.3 million in the same period last year. This was driven mainly by lower average selling prices compared to the same period last year, partially offset by higher gross sales volume from Negros, Burgos Wind, and Bacman (1,986.1 GWh in the first nine months of 2025 vs 1,743 GWh in the same period last year).

Natural Gas

Revenues from the natural gas platform decreased by \$55.8 million, or 4.6% to \$1,152.5 million in the first nine months of 2025 from \$1,208.3 million in the same period last year. There were lower revenues from San Gabriel following the expiration of its PSA with Meralco in February 2024, coupled with its lower WESM sales in the first nine months of 2025 compared to the same period last year. This was partially offset by higher revenues from Santa Rita and San Lorenzo due to both plants' higher fuel revenues resulting from higher LNG prices and consumption.

Others

Revenues from other subsidiaries decreased by \$3.1 million, or 26.5%, to \$8.7 million in the first nine months of 2025 from \$11.8 million in the same period last year. The decrease was driven by FGEN's lower sales volume of 26 GWh in the first nine months of 2025 from 94 GWh in the same period last year, following the transfer of customers to other FGEN subsidiaries with RES licenses, and the expiration of contracts in 2024 and 2025. This was partially offset by the \$6.4 million revenues from Pi Energy following its transfer to FGEN in May 2025.

The above decreases were partially offset by the following increase:

Hydro

Revenues from the Hydro platform increased by \$26.8 million, or 56.4% to \$74.4 million in the first nine months of 2025 from \$47.6 million in the same period last year. The increase was largely due to the higher revenues from FG Hydro due to its higher starting water elevation and higher IDR that resulted in higher electricity sold to the WESM and increased capacity available for ancillary services offered to the Reserve Market. In addition, Casecnan also recognized higher revenues following its full nine months of operations in 2025.

Costs of sale of electricity

The details of the Group's consolidated costs of sale of electricity for the periods ended September 30, 2025 and 2024 are summarized in the following tables:

<i>Costs of sale of electricity</i>	September 2025	%	September 2024	%	Changes	%
Fuel	\$710,103	57.7%	\$755,424	59.6%	(\$45,321)	-6.0%
Power plant O&M	245,652	20.0%	245,208	19.3%	444	0.2%
Depreciation and amortization	211,887	17.2%	198,031	15.6%	13,856	7.0%
Others	63,139	5.1%	70,325	5.5%	(7,186)	-10.2%
	\$1,230,781	100.0%	\$1,268,988	100%	(\$38,207)	-3.0%

<i>Costs of sale of electricity</i>	September 2025	%	September 2024	%	Changes	%
Geothermal/Wind/Solar	\$332,022	27.0%	\$309,495	24.4%	\$22,527	7.3%
Natural gas	819,135	66.5%	876,854	69.1%	(57,719)	-6.6%
Hydro	22,163	1.8%	24,345	1.9%	(2,182)	-9.0%
Others	57,461	4.7%	58,294	4.6%	(833)	-1.4%
	\$1,230,781	100.0%	\$1,268,988	100%	(\$38,207)	-3.0%

The costs of sale of electricity for the period ended September 30, 2025 decreased by \$38.2 million, or 3.0% to \$1,230.8 million as compared to \$1,269.0 million for the same period last year. The decrease was due to the movements per platform as explained in detail below:

Natural Gas

Costs of sale of electricity of the natural gas platform decreased by \$57.7 million, or 6.6% to \$819.1 million in the first nine months of 2025 from \$876.8 million in the same period last year. This was mainly driven by San Gabriel's lower fuel expense in 2025 following the expiration of the plant's PSA with Meralco in February 2024 and lower WESM dispatch.

Hydro

The Hydro platform's costs of sale of electricity decreased by \$2.2 million, or 9.0% to \$22.1 million in the first nine months of 2025 from \$24.3 million in the same period last year. The decrease was mainly driven by FG Hydro and Casecnan's lower replacement power purchases in the first nine months of 2025 versus the same period last year.

Others

The costs of sale of electricity from Others decreased by \$0.8 million, or 1.4% to \$57.5 million in the first nine months of 2025 from \$58.3 million in the same period last year. The decrease was mainly driven by LNG's lower plant O&M due to the absence of fuel bunkering charges and commissioning support services in 2025 and lower lease accretion expense due to the decreasing balance of USD-denominated lease liabilities. This was partially offset by additional cost of sales from Pi Energy following its transfer to FGEN in May 2025.

The above decreases were partially offset by the following increase:

GWS

The costs of sale of electricity from the GWS platform increased by \$22.5 million, or 7.3% to \$332.0 million in the first nine months of 2025 from \$309.5 million in the same period last year. The increase was mainly driven by higher depreciation from the additional capital expenditures for power plant, steamfield and wells made in 2024, as well as higher spending for well workover activities.

G&A Expenses

G&A expenses decreased by \$11.2 million, or 6.0% to \$176.7 million in the first nine months of 2025 from \$187.9 million in the same period last year. The decrease was mainly due to Avion's lower LBT payments and EDC's lower tax payments to the BIR and lower provision for disallowance on input VAT claims.

Interest Income

Interest income decreased by \$5.2 million, or 25.2% to \$15.5 million in the first nine months of 2025 from \$20.7 million in the same period last year. The decrease was mainly due to EDC's lower money market placements, FG Hydro's lower cash balances and placements, and Santa Rita's lower short term placement balances in 2025.

Interest expense and financing charges

Interest expense and financing charges increased by \$13.3 million, or 15.4%, to \$99.5 million in the first nine months of 2025 from \$86.2 million in the same period last year. The increase was mainly due to EDC's higher long-term debt balance which increased to \$1,638.0 million as of September 2025 from \$1,150.6 million during the same period last year, FG Hydro's new loan drawn in February 2025, and Casecnan's new loan drawn in August 2025.

Foreign exchange loss – net

The First Gen Group recognized a net foreign exchange loss amounting to \$1.2 million in the first nine months of 2025, a \$3.7 million decrease from the \$2.5 million net foreign exchange gain in the same period last year. The decrease was mainly due to the Parent's foreign exchange loss in 2025 resulting from its lower net Peso financial liability position following the voluntary prepayment of its ₱20 billion loans.

Provision for Income Tax

The provision for income tax decreased by \$9.8 million, or 16.3%, to \$50.1 million for the first nine months of 2025 from \$59.9 million in the same period last year. The decrease was due to lower provisions for income taxes for EDC resulting from lower taxable income and for San Gabriel due to the shift from Regular Corporate

Income Tax (RCIT) in 2024 to Minimum Corporate Income Tax (MCIT) in 2025 due to its taxable loss position during the period.

Net Income

The First Gen Group generated a consolidated net income of \$265.8 million in the first nine months of 2025, \$5.3 million, or 2.0%, lower than the \$271.2 million in the same period last year. The decrease in net income was mainly due to the lower contributions of the following:

- EDC's net income contribution (ex-FG Hydro) decreased by \$46.7 million, or 38.2% to \$75.7 million in the first nine months of 2025 from \$122.4 million in the same period last year. The decrease was a result of lower revenues mainly due to lower average selling prices to the WESM, and a higher interest expense versus the same period last year due to the new debt availed in 2024 and during the first nine months of 2025.
- San Gabriel's net income contribution decreased by \$24.0 million, or 112.7% to a \$2.7 million net loss in the first nine months of 2025 from the \$21.3 million net income in the same period last year. The decrease was a result of lower WESM revenues due to lower dispatch, as well as the expiration of its PSA with Meralco in February 2024.
- The Parent Company's net loss contribution increased by \$4.3 million, or 19.2% to a \$26.8 million net loss for the first nine months of 2025, from the \$22.5 million net loss in the same period last year. This was mainly a result of other charges incurred in 2025 due to a DIC write-off and the recognition of foreign exchange losses in 2025, a reversal from last year's foreign exchange gains, due to its lower net Peso financial liability position following the voluntary prepayment of its ₱10 billion loans with each of BDO and BPI.
- FRLC's net income contribution decreased by \$2.3 million, or 18.1% to \$10.5 million in the first nine months of 2025 from \$12.9 million in the same period last year. The decrease was primarily due to higher depreciation and amortization expenses from the recording of a full nine months of operations this year versus only seven months last year, higher tax payments, and recognition of interest expense on the long-term debt availed in August 2025.

The above decreases were partially offset by the following increases:

- FGEN LNG's net income contribution increased by \$37.2 million, or 3,793.9% to \$38.2 million net income in the first nine months of 2025 from \$1.0 million in the same period last year. The increase was mainly due to the terminal fees billed to the natural gas plants and income from tugboat support operations.
- FG Hydro's net income contribution increased by \$15.3 million, or 333.1% to \$19.9 million in the first nine months of 2025 from \$4.6 million in the same period last year. The increase was primarily due to revenue growth as a result of higher starting water elevation and higher IDR, and an increase in capacity sold to the Reserve Market. This was coupled with lower plant O&M expenses for FG Hydro due to lower replacement power purchases in the first nine months of 2025 versus the same period in the previous year.
- Santa Rita's net income contribution increased by \$8.1 million, or 8.8% to \$99.8 million in the first nine months of 2025 from \$91.7 million in the same period last year. The increase was mainly attributable to higher revenues resulting from its higher NEO in 2025 compared to 2024, lower G&A expenses, lower interest expenses following the full settlement of its long-term loans in May 2024, and higher deferred income tax benefit.
- Avion's net income contribution increased by \$4.6 million, or 95.3% to \$9.4 million in the first nine months of 2025 from \$4.8 million in the same period last year. The increase was driven by a lower fuel expense due to less liquid fuel consumption owing to fewer Malampaya outages in 2025, coupled with lower insurance and tax payments versus the same period last year. Avion's interest expenses

also decreased following the full settlement of long-term loans in December 2024, and it recognized foreign exchange gains in the first nine months of 2025 (a reversal of foreign exchange losses recognized in same period in 2024).

- San Lorenzo's net income contribution increased by \$3.2 million, or 9.9% to \$35.1 million in the first nine months of 2025 from \$31.9 million in the same period last year. The increase was primarily due to lower interest expenses resulting from scheduled debt repayments and less tax payments due to lower LBT as a consequence of lower gross receipts in 2024, coupled with a deferred income tax benefit recognized in the first nine months of 2025 as opposed to the provision recognized in the same period last year.
- The other subsidiaries' net income contribution increased by \$3.6 million, or 118.1% to \$6.6 million in the first nine months of 2025 from \$3.0 million in the same period last year. The increase was primarily due to a higher net income from FGEN Singapore and a net income contribution from FG Bukidnon, a reversal from last year's net loss, because of both higher dispatch and average selling prices.

Net Income Attributable to Equity Holders of the Parent Company

Net income attributable to the equity holders of the Parent Company increased by \$8.4 million, or 4.0% to \$215.4 million in the first nine months of 2025, compared to \$207.0 million recognized in the same period last year. The increase in attributable net income was mainly due to the higher contributions of the following:

- FGEN LNG recognized a higher net income contribution of \$34.4 million in the first nine months of 2025, up by \$33.4 million from the same period last year, as discussed above.
- The Hydro platform recognized a higher net income contribution of \$23.2 million, up by \$7.5 million, or 47.4% in the first nine months of 2025 compared to \$15.8 million in the same period last year as a result of the higher net income contribution of FG Hydro, partially offset by the lower net income contribution of the Casecnan plant, as discussed above.
- The other subsidiaries recognized a higher net income contribution of \$3.7 million in the first nine months of 2025, up by 0.5 million from the same period last year as a result mainly of higher net income contribution from FGEN Singapore, as discussed above.

The above increases were partially offset by the following decreases:

- EDC's contribution to net income attributable to the Parent Company decreased by \$20.5 million, or 34.3% to \$39.2 million in the first nine months of 2025 from \$59.7 million in the same period last year, as discussed above.
- The Parent Company's net loss contribution increased by \$4.3 million, or 19.2% to a \$26.8 million net loss for the first nine months of 2025, from the \$22.5 million net loss in the same period last year, as discussed above.
- The natural gas platform's contribution to attributable net income decreased by \$8.2 million, or 5.5% to \$141.6 million in the first nine months of 2025 from \$149.8 million in the same period last year as a result of the combined net income contribution of the gas plants as discussed above.

RECURRING NET INCOME

Adjusting for non-recurring items such as the proceeds from insurance claims, unrealized foreign exchange losses (gains), movements in deferred income taxes, MTM losses (gains) on derivative transactions, debt issuance cost (DIC) write-off, and gain on dispute settlement, the First Gen Group's RNI attributable to the Parent Company was \$211.5 million for the first nine months of 2025. This was \$6.0 million, or 2.9%, higher than the attributable RNI of \$205.5 million for the same period last year.

	For the nine-month periods ended September 30	
Amounts in USD thousands	2025	2024

Cash and cash equivalents

Cash and cash equivalents increased by \$163.1 million, or 24.1% to \$839.9 million as of September 30, 2025 compared to \$676.8 million as of December 31, 2024. The increase was primarily due to Santa Rita and San Lorenzo's collection of receivables from electricity sales from Meralco, and FGEN LNG's collection of its receivables affected by the ERC Order last March 2024.

Receivables

Receivables decreased by \$193.7 million, or 36.6%, to \$335.8 million as of September 30, 2025 compared to \$529.5 million as of December 31, 2024. The decrease was mainly from the collection of receivables from Meralco for Santa Rita and San Lorenzo, and the collection of billings to the gas plants that were affected by the ERC Order last March 2024 for FGEN LNG.

Financial assets at fair value through profit or loss (FVPL)

Financial assets at FVPL increased by \$51.3 million, or 4,372.1% to \$52.5 million as of September 30, 2025 compared to \$1.2 million as of December 31, 2024. The increase was mainly due to investments in Investment Management Accounts made by the Parent and FG Hydro in the first nine months of 2025.

Other current assets

Other current assets increased by \$15.2 million, or 19.3% from \$78.8 million as of December 31, 2024 to \$94.0 million as of September 30, 2025. The increase is mainly due to San Gabriel's prepayment of its plant insurance premium.

Accounts payable and accrued expenses

Accounts payable and accrued expenses decreased by \$179.6 million, or 25.3% from \$710.0 million as of December 31, 2024 to \$530.4 million as of September 30, 2025 mainly due to the settlement of payables to Malampaya gas sellers, FGEN LNG's settlement of outstanding payables, and EDC's payments to its contractors.

Dividends payable

No dividends payable was outstanding as of September 30, 2025 compared to \$0.4 million as of December 31, 2024 following the full payment of dividends payable to preferred shareholders that were declared in November 2024 and was paid in January 2025. Dividends to common and preferred shareholders declared in May 2025 were likewise settled on June 30, 2025.

Income tax payable

Income tax payable decreased by \$1.0 million, or 7.2%, from \$14.2 million as of December 31, 2024 to \$13.2 million as of September 30, 2025 mainly due to FRLC's income tax payment, and PMPC's and FNPC's zero tax payable due to its 2025 taxable loss positions.

Loans payable

No short term loans were outstanding as of September 30, 2025 compared to \$4.7 million as of December 31, 2024 following the full settlement of Santa Rita and San Lorenzo's short term loans during the period.

Long-term debt – current portion

The current portion of long-term debt increased by \$48.8 million, or 18.7%, from \$261.2 million as of December 31, 2024 to \$310.0 million as of September 30, 2025 primarily relating to EDC's term loan availments, FG Hydro's term loan availment in February 2025, and Casecnan's term loan availment in August 2025. These were partially offset by principal repayments during the period.

Derivative liabilities – current portion

Derivative liabilities amounting to \$0.1 million were recognized as of September 30, 2025 compared to nil as of December 31, 2024 representing EDC's derivative liability position as it entered into new derivative transactions relating to its loans during the first nine months of 2025.

Long-term debt – net of current portion

The non-current portion of long-term debt increased by \$136.7 million, or 8.2%, from \$1,659.5 million as of December 31, 2024 to \$1,796.2 million as of September 30, 2025. The increase was driven mainly by EDC's term loan availments, FG Hydro's term loan availment in February 2025, Casecnan's term loan availment in August 2025, partially offset by the Parent's voluntary full prepayment of its 10-year term loans from BDO and BPI.

Retirement and post-employment benefits

Retirement and post-employment benefits increased by \$7.1 million, or 12.9% from \$55.6 million as of December 31, 2024 to \$62.7 million as of September 30, 2025 mainly due to an increase in EDC's net retirement liability.

Deferred income tax liabilities – net

The deferred income tax liabilities – net decreased by \$2.3 million, or 12.0%, from \$19.3 million as of December 31, 2024 to \$17.0 million as of September 30, 2025. This was mainly due to the reversal of Santa Rita's deferred income tax liability.

Redeemable preferred stock

Redeemable preferred stock increased by \$4.8 million, or 5.6%, from \$85.7 million as of December 31, 2024 to \$90.5 million as of September 30, 2025 due to the issuance of 28,000,000 Series "H" preferred stocks to FG Hydro with a par value of ₱10.0 per share in February 2025.

Additional paid-in capital

Additional paid-in capital balance increased by \$43.3 million, or 3.3% from \$1,324.4 million as of December 31, 2024 to \$1,367.7 million as of September 30, 2025 due to the issuance of 28,000,000 Series "H" preferred stocks to FG Hydro with an issue price of ₱100.00 per share in February 2025.

Retained earnings

Retained earnings increased by \$189.5 million, or 7.4% from \$2,543.7 million as of December 31, 2024 to \$2,733.2 million as of September 30, 2025. The increase was mainly due to earnings from operations of \$215.4 million for the first nine months of 2025 but was partly offset by dividends declared.

Cost of common and preferred stocks held in treasury

The cost of common and preferred stocks held in treasury increased by \$48.2 million, or 7.4% from \$646.9 million as of December 31, 2024 to \$695.1 million as of September 30, 2025 mainly due to acquisition of Series "H" preferred stocks by FG Hydro amounting to \$48.2 million in February 2025.

Financial Soundness Indicators	Details
Current ratio	Calculated by dividing Current assets over Current liabilities. This ratio measures the company's ability to pay short-term obligations.
Quick ratio	Calculated by dividing Cash and cash equivalents plus Receivables over Total current liabilities. This ratio measures a company's solvency.
Debt-to-equity ratio (times)	Calculated by dividing Total liabilities over Total equity. This ratio expresses the relationship between capital contributed by the creditors and the owners.
Interest-bearing debt-to-equity ratio (times)	Calculated by dividing Total interest-bearing debt over Total equity. This ratio measures the percentage of funds provided by the lenders/creditors.
Asset-to-equity ratio (times)	Calculated by dividing Total assets over Total equity.
Annualized Return on Assets	Calculated by dividing the reported net income for the period by 3 multiplied by 4 (numerator), by the average of the total assets as of the end of the year and the beginning of the year (denominator). This ratio measures how the company utilizes its resources to generate profits.
Return on Assets	Calculated by dividing the reported Consolidated net income for the year by the Average total assets. This ratio measures how the Company utilizes its resources to generate profits.
Annualized Return on Equity	Calculated by dividing the reported net income for the period by 3 multiplied by 4 (numerator) by the average of the total equity at the end of the year and the beginning of the year (denominator). This ratio measures how much profit a company earned in comparison to the amount of shareholder equity found on the consolidated statement of financial position.
Return on Equity	Calculated by dividing the Consolidated reported net income for the year, by the Average total equity. This ratio measures how much profit a company earned in comparison to the amount of shareholder equity found on the consolidated statement of financial position.

DISCUSSIONS OF MAJOR SUBSIDIARIES

EDC Consolidated

	For the periods ended September 30 (Unaudited)	
(in PHP millions)	2025	2024
Revenues from sale of electricity	33,887.8	34,421.9
Foreign exchange gains (losses) – net	(34.9)	41.8
Income before income tax	5,827.7	7,790.7
Net income	5,286.4	7,024.1

RNI attributable to Equity holders of the Parent Company	4,694.8	6,911.7
	As of the periods ended	
(in PHP millions)	Sept. 30, 2025 (Unaudited)	Dec. 31, 2024 (Audited)
Total Assets	209,844.8	193,185.0
Total Liabilities	126,702.4	107,900.2
Total Equity	83,142.4	85,284.8

September 2025 vs. September 2024 Results

Total revenues from the sale of electricity for the nine-month period ended September 30, 2025 decreased by ₱534.1 million or 1.6% to ₱33,887.8 million from ₱34,421.9 million in 2024 primarily due to a decline in average electricity prices though partly offset by an increase in sales volume.

EDC posted a net income of ₱5,286.4 million for the nine-month period ended September 30, 2025, a 24.7% or ₱1,737.7 million decrease from the ₱7,024.1 million for the same period in 2024. The decrease was mainly driven by lower revenues, ₱1,166.4 million increase in cost of sales of electricity from higher depreciation and amortization expense, as well as expenses for steam field maintenance, well work-overs and drilling services, a ₱158.4 million decrease in interest income from lower money market placements, and a ₱1,356.5 million increase in interest expense from new loans availed. The decrease was partly offset by a ₱462.1 million decline in G&A expenses due to lower payments for insurance, taxes and licenses, and an increase in other income from insurance proceeds recognized in 2025.

ASSETS

EDC's total assets as of September 30, 2025 stood at ₱209,844.8 million, which increased by ₱16,659.8 million, or 8.6% from ₱193,185.0 million as of December 31, 2024 mainly due to movements in the following accounts:

- an increase in parts and supplies inventories
- an additional investment of financial assets at FVPL;
- acquisitions of PPE; and,
- an increase in non-current assets from long-term receivables and prepaid taxes and expenses

This was partially offset by its lower cash and cash equivalents and outstanding trade receivable balances.

LIABILITIES AND EQUITY

Total liabilities amounted to ₱126,702.4 million as of September 30, 2025, higher by ₱18,802.2 million, or 17.4%, from ₱107,900.2 million last December 31, 2024 primarily due to the availment of long-term debts of EDC, EBWPC and FG Hydro, higher income tax payable and an increase in other noncurrent liabilities as it

received proceeds from the Joint Crediting Mechanism Program of the Ministry of Environment of Japan. The increases were partially offset by the scheduled repayments of long-term debt, accretion and payment of lease liabilities and lower outstanding trade payables.

Total equity amounted to ₱83,142.4 million as of September 30, 2025, which decreased by ₱2,142.4 million, or 2.5% from ₱85,284.8 million as of December 31, 2024. This was mainly due to dividends declared to its common and preferred shareholders. These decreases were partly offset by the net income earned during the period and an increase in cumulative translation adjustment balance from the Peso translation of its international subsidiaries and EBWPC.

FGPC (Santa Rita)

	For the periods ended September 30 (Unaudited)	
(in USD thousands)	2025	2024
Revenues from sale of electricity	703,828	669,098
Operating income	120,880	115,778

Other Liabilities	177,471	258,036
Total Equity	309,735	220,731

September 2025 vs. September 2024 Results

Santa Rita's revenues increased by \$34.7 million, or 5.2% to \$703.8 million for the nine-month period ended September 30, 2025 from \$669.1 million for the same period in 2024. The increase in revenues was primarily due to higher average plant dispatch (67.4% in 2025 compared to 61.8% in 2024) and higher fuel revenues resulting from the consumption of higher-priced LNG (7.4 million MMBtu in 2025 compared to 6.3 million MMBtu in 2024) coupled with an increase in average LNG prices by 13.8% or \$2.7/MMBtu and higher natural gas consumption (29.6 million MMBtu in 2025 compared to 24.9 million MMBtu in 2024). The increases were partially offset by a lower average Net Dependable Capacity (NDC) (1,111.3 MW in 2025 compared to 1,120.9 MW in 2024) and lower average natural gas prices which decreased by 16.4% or \$2.4/MMBtu.

Operating income increased by \$5.1 million, or 4.4% for the nine-month period ended September 30, 2025 primarily due to higher gross profit and lower G&A expenses. Moreover, net income increased by \$7.1 million, or 7.5% to \$101.0 million for the nine-month period ended September 30, 2025 from \$93.9 million in the same period last year due to higher operating income, lower interest expenses from the full settlement of long-term debt in May 2024 and the higher benefit from deferred income tax in 2025.

ASSETS

Santa Rita's assets as of September 30, 2025 totaled to \$487.2 million, a decrease of \$22.9 million, or 4.5% from a balance of \$510.1 million as of December 31, 2024 mainly due to the following:

- a lower outstanding balance of trade and other receivables;
- a lower level of fuel inventories; and
- the depreciation and amortization of PPE.

These were partially offset by a higher ending cash balance and an increase in prepaid major spare parts.

LIABILITIES AND EQUITY

Santa Rita's total liabilities amounted to \$177.5 million as of September 30, 2025, a decrease of \$111.8 million, or 38.7% from \$289.3 million as of December 31, 2024. The decrease in liabilities was primarily due to lower outstanding trade payables, the settlement of short-term loans and a decrease in income tax payable.

Total equity increased by \$89.0 million, or 40.3% to \$309.7 million as of September 30, 2025 as compared to \$220.7 million as of December 31, 2024 from the net income earned during the period, though partially offset by the cash dividends declared in June 2025.

FGP Corp. (San Lorenzo)

	For the periods ended September 30 (Unaudited)	
(in USD thousands)	2025	2024
Revenues from sale of electricity	\$347,178	326,429
Operating income	54,979	51,789
Net income	37,893	34,987
	As of the periods ended	
(in USD thousands)	Sept. 30, 2025 (Unaudited)	Dec. 31, 2024 (Audited)
Total Assets	377,857	441,113
Debt - net of debt issuance costs	112,625	152,028
Other Liabilities	116,506	134,180
Total Equity	148,726	154,905

September 2025 vs. September 2024 Results

San Lorenzo's revenues increased by \$20.8 million, or 6.4% to \$347.2 million for the nine-month period ended September 30, 2025 from \$326.4 million for the same period in 2024. The increase in revenues was primarily due to higher fuel revenues resulting from the consumption of more LNG (3.4 million MMBtu in 2025 compared to 2.9 million MMBtu in 2024) coupled with an increase in LNG prices by 20.9% or \$4.0/MMBtu and an increase in average natural gas prices by 5.5% or \$0.6/MMBtu. The increases were partially offset by the plant's lower average NDC (552.4 MW in 2025 compared to 557.4 MW in 2024) and dispatch (66.8% in 2025 compared to 71.9% in 2024) and the resulting lower natural gas consumption (14.8 million MMBtu in 2025 compared to 15.9 million MMBtu in 2024).

Operating income slightly increased by \$3.2 million, or 6.2% to \$55.0 million for the nine-month period ended September 30, 2025 primarily due to higher revenues coupled with lower plant O&M due to nil supplemental payments in 2025 and lower variable O&M fees and NDC bonus resulting from lower NEO and lower G&A expenses mainly due to lower LBT payments as a consequence of lower gross receipts in 2024. Likewise, net income increased by \$2.9 million, or 8.3% to \$37.9 million for the nine-month period ended September 30, 2025 from \$35.0 million in the same period last year mainly due to a higher operating income, lower interest expense and financing charges, partially offset by the higher provision for income taxes.

ASSETS

FGP's total assets as of September 30, 2025 stood at \$377.9 million, which decreased by \$63.2 million, or 14.3% from \$441.1 million as of December 31, 2024 mainly due to the movements in the following accounts:

- a lower outstanding balance of trade and other receivables
- a lower level of fuel inventories; and
- the depreciation and amortization of PPE.

These were partially offset by higher ending cash balance and increase in prepaid major spare parts.

LIABILITIES AND EQUITY

As of September 30, 2025, total liabilities decreased by \$57.1 million, or 19.9% to \$229.1 million from \$286.2 million as of December 31, 2024 mainly due to lower outstanding trade payables, the principal repayment of long-term debts and the settlement of short-term loans.

Total equity decreased by \$6.2 million, or 4.0% to \$148.7 million as of September 30, 2025 as compared to \$154.9 million as of December 31, 2024 mainly due to cash dividends paid though partially offset by net income earned during the period.

FNPC (San Gabriel)

	For the periods ended September 30 (Unaudited)	
(in USD thousands)	2025	2024
Revenues from sale of electricity	60,503	156,735

Other liabilities	26,957	27,818
Total equity	232,452	280,163

September 2025 vs. September 2024 Results

San Gabriel recognized lower revenues by \$96.2 million, or 61.4% to \$60.5 million for the nine-month period ended September 30, 2025 compared to \$156.7 million for the same period last year. The decrease in revenues was primarily due to the expiration of its PSA with Meralco in February 2024. As of September 30, 2025, FNPC is operating on a merchant basis. Average plant dispatch was lower by 30.3% (13.6% in 2025 compared to 43.9% in 2024).

For the nine month period ended September 30, 2025, the plant's operating loss stood at \$0.7 million - a significant decline of \$31.5 million or 102.3% from the operating income earned during the same period in 2024. This was mainly due to the lower revenues, though partially offset by lower plant O&M and G&A expenses during the period.

San Gabriel posted a net loss of \$2.7 million for the nine-month period ended September 30, 2025, a reversal of \$23.6 million, or 113.0% compared to \$20.9 million for the same period in 2024. This was mainly due to lower operating income, partially offset by lower interest expenses and financing charges, foreign exchange gains (as compared to foreign exchange losses for the same period last year) and lower income tax provisions.

ASSETS

San Gabriel's total assets as of September 30, 2025 decreased by \$67.0 million, or 17.9% to \$306.0 million from a balance of \$373.0 million as of December 31, 2024 due to the movements in the following accounts:

- a lower ending cash balance;
- the depreciation of PPE;
- the amortization of right-of-use asset; and
- the amortization of the project's O&M mobilization fee for the period.

These were partially offset by the increase in trade receivables and higher creditable withholding tax balances.

LIABILITIES AND EQUITY

San Gabriel's total liabilities amounted to \$73.6 million as of September 30, 2025, lower by \$19.2 million or 20.7%, from the December 31, 2024 balance of \$92.8 million. This was due to its regular debt service payments and lower outstanding trade payables, partially offset by the higher deferred income tax liabilities due to favorable movements in foreign exchange rates.

Total equity decreased by \$47.7 million, or 17%, to \$232.5 million as of September 30, 2025 as compared to \$280.2 million as of December 31, 2024 mainly due to cash dividends declared and the net loss incurred during the period.

PMPC (Avion)

	For the periods ended September 30 (Unaudited)	
(in PHP thousands)	2025	2024
Revenues from sale of electricity	2,348,183	3,214,451
Operating income	674,058	385,476
Net income	519,146	257,424
	As of the periods ended	
(in PHP thousands)	Sept. 30, 2025 (Unaudited)	Dec. 31, 2024 (Audited)
Total assets	5,404,991	6,145,387
Total liabilities	260,856	682,799
Total equity	5,144,135	5,462,588

September 2025 vs. September 2024 Results

Avion recognized lower revenues amounting to ₱2,348.2 million for the nine-month period ended September 2025, a ₱866.3 million or 27.0% decline from ₱3,214.5 million for the same period in 2024. The decrease was mainly due to lower energy sales from ASPA (115.4 GWh in 2025 vs. 198.3 GWh in 2024), primarily resulting from the expiration of its ASPA contract in May 2025, as well as reduced energy sales from WESM (160.2 GWh in 2025 vs. 246.9 GWh in 2024). These declines were partially offset by higher average selling prices under both ASPA and WESM. In addition, the plant's average dispatch rate decreased by 15.5%, from 43.3% in 2024 to 27.8% in 2025.

Operating income was significantly higher by ₱288.6 million, or 74.9% to ₱674.1 million for the nine-month period ended September 2025 as compared to ₱385.5 million during the same period in 2024. This increase was primarily driven by lower cost of sales and G&A expenses. The decrease in cost of sales was due to lower fuel and plant O&M costs while the decrease in G&A expenses was attributable to lower plant insurance premiums, professional fees, taxes and licenses, and repairs and maintenance costs, though partially offset by higher depreciation expenses and other G&A expenses.

Avion posted a net income of ₱519.1 million for the nine-month period ended September 2025, significantly higher by ₱261.7 million or 101.7% compared to ₱257.4 million in the same period last year. The increase in net income is mainly due to the higher operating income, coupled with the absence of interest expense from the full payment of its long-term debt in December 2024 and the recognition of foreign exchange gains (reversal of foreign exchange losses in 2024). These were partially offset by lower interest income and the absence of insurance proceeds in 2025.

ASSETS

Avion's total assets as of September 30, 2025 decreased by ₱740.4 million, or 12.0% to ₱5,405.0 million from a balance of ₱6,145.4 million as of December 31, 2024 due to the movements in the following accounts:

- lower ending cash balance;
- lower trade receivables;
- lower input VAT balances;
- depreciation and amortization of PPE;
- amortization of prepaid consultancy fees.

These were partially offset by higher inventories, unamortized plant insurance, prepaid taxes and deferred income tax assets.

LIABILITIES AND EQUITY

Avion's total liabilities amounted to ₱260.9 million as of September 30, 2025, a decrease of ₱421.9 million from ₱682.8 million as of December 31, 2024. The decrease was mainly due to lower outstanding trade payables, lower output VAT and nil income tax payable due to its taxable loss position.

Total equity decreased by ₱318.5 million, or 5.8% to ₱5,144.1 million as of September 30, 2025 as compared to ₱5,462.6 million as of December 31, 2024 mainly due to cash dividends declared though partially offset by net income earned during the period.

FGEN LNG

	For the periods ended September 30 (unaudited)	
(Amounts in PHP millions)	2025	2024
Operating revenues	5,122.2	3,567.3
Operating income (loss)	1,587.9	(7.5)
Net income (loss)	1,918.7	(163.7)
	As of the periods ended	
(Amounts in PHP millions)	Sept. 30, 2025 (Unaudited)	Dec. 31, 2024 (Audited)
Total assets	29,086.3	29,512.1
Total liabilities	13,172.8	15,478.6
Total equity	15,913.5	14,033.5

September 2025 vs. September 2024 Results

FGEN LNG generated revenues amounting to ₱5,122.2 million for the nine-month period ended September 30 2025, which increased by ₱1,554.9 million or 43.6% from ₱3,567.3 million in the same period of 2024, mainly from higher terminal fees charged to the natural gas power plants for the transport, storage, and regasification of LNG as it started commercial operations in January 2025.

Operating income is higher by ₱1,595.4 million, or 21,309.6%, which stands at ₱1,587.9 million for the nine-month period ended September 30, 2025 compared to a loss of ₱7.5 million during the same period in 2024. This increase was primarily driven by higher revenues and lower cost of service & G&A expenses.

FGEN LNG posted a net income of ₱1,918.7 million for the nine-month period ended September 30, 2025, higher by ₱2,082.4 million, or 1,272.2% compared to a ₱163.7 million net loss for the same period in 2024. This was mainly due to higher operating income, interest income, foreign exchange gains (reversal from foreign exchange losses in the same period last year), other income from tugboat support operations, and the final settlement of its FSRU charter hire dispute, as well as a favorable adjustment in its related lease liability. These were partially offset by a higher provision for deferred income tax during the period.

ASSETS

Total assets as of September 30, 2025 decreased by ₱425.8 million, or 1.4% to ₱29,086.3 million, from a balance of ₱29,512.1 million as of December 31, 2024 due to movements in the following accounts:

- lower trade receivables;
- lower input VAT balances;
- lower deferred tax assets;
- lower other noncurrent assets; and
- the depreciation and amortization of PPE and right-of-use assets.

These were partially offset by a higher ending cash balance and other current assets.

LIABILITIES AND EQUITY

Total liabilities amounted at ₱13,172.8 million as of September 30, 2025, a decrease of ₱2,305.8 million, or 14.9% from the December 31, 2024 balance of ₱15,478.6 million. The decrease was mainly due to lower outstanding accounts payable and lease liabilities.

Total equity increased by ₱1,880.0 million, or 13.4% to ₱15,913.5 million as of September 30, 2025 as compared to ₱14,033.5 million as of December 31, 2024 mainly due to net income earned during the period. This was partially offset by the transaction costs incurred for the conversion of Tokyo Gas' deposits for future stock subscription into capital stock.

FG Hydro

(Amounts in PHP millions)	For the periods ended September 30 (Unaudited)	
	2025	2024
Operating revenues	2,340.7	1,154.8
Cost of sales	(511.2)	(764.7)
General and administrative expenses	(351.1)	(273.2)
Operating income	1,478.4	116.9
Net income	1,275.7	252.4
	As of the periods ended	
	Sept. 30, 2025 (Unaudited)	Dec. 31, 2024 (Audited)
Total assets	12,690.3	4,492.1
Total liabilities	7,099.5	177.0
Total equity	5,590.8	4,315.1

September 2025 vs. September 2024 Results

FG Hydro's revenues increased by 102.7% or ₱1,185.9 million to ₱2,340.7 million for the nine-month ended September 30, 2025 from revenues of ₱1,154.8 million for the same period in 2024 primarily due to a higher starting water elevation in 2025, which led to higher generation (338.2 GWh in 2025 compared to 150.8 GWh in 2024). This resulted in higher electricity sold to the WESM and increased capacity available for ancillary services offered to the Reserve Market. Additionally, higher revenues from its PSAs sales volume also contributed to the increase. The increase was partially offset by lower average selling prices in both the WESM and the Reserve Market.

Cost of sales for the nine-month period ended September 30, 2025 of ₱511.2 million was ₱253.5 million or 33.2% lower than the ₱764.7 million for the same period in 2024. This decline was primarily due to lower purchases from WESM due to reduced replacement power requirements, offset by higher service fees paid to NIA due to higher power generation. However, G&A expenses increased by ₱77.9 million or 28.5% to ₱351.1 million during the period compared to ₱273.2 million in 2024 mainly due to higher staff costs, taxes and licenses, contracted manpower and other services.

FG Hydro posted a net income of ₱1,275.7 million for the nine-month period ended September 30, 2025, higher by 405.4% or ₱1,023.3 million compared to ₱252.4 million for the same period in 2024 mainly driven by higher operating income and dividend income from an investment in non-voting preferred stocks of EDC and Series "H" redeemable preferred stocks of First Gen, partially offset by the interest expense on long-term debt availed by FG Hydro in February 2025, lower interest income and higher provision for income taxes.

ASSETS

Total assets as of September 30, 2025 stood at ₱12,690.3 million, ₱8,198.2 million or 182.5% higher than the December 31, 2024 level of ₱4,492.1 million. The increase was primarily driven by FG Hydro's subscription to non-voting preferred stocks of EDC and to Series "H" redeemable preferred stocks of First Gen in February 2025, as well as higher investment management account balance.

LIABILITIES AND EQUITY

As of September 30, 2025, total liabilities stood at ₱7,099.5 million, ₱6,922.5 million higher than the December 31, 2024 level of ₱177.0 million, primarily due to the long-term debt availed by FG Hydro in February 2025 totaling ₱7,000.0 million.

Total equity as of September 30, 2025 rose to ₱5,590.8 million, ₱1,275.7 million or 29.6% better than the December 31, 2024 level of ₱4,315.1 million due to the net income earned during the period.

FRLC (Casecnan)

(Amounts in PHP millions)	For the periods ended September 30 (Unaudited)	
	2025	2024
Operating revenues	1,866.3	1,457.2
Cost of sales	(736.8)	(624.2)
General and administrative expenses	(354.5)	(130.6)
Operating income	775.0	702.4
Net income	602.1	700.3
	As of the periods ended	
	Sept. 30, 2025 (Unaudited)	Dec. 31, 2024 (Audited)
Total assets	30,275.8	31,182.2
Total liabilities	15,114.9	15,223.9
Total equity	15,160.9	15,958.3

September 2025 vs. September 2024 Results

FRLC's revenues for the nine-month period ended September 30, 2025 increased by 28.1% or ₱409.1 million to ₱1,866.3 million from ₱1,457.2 million for the same period in 2024. The increase was primarily driven by higher generation (363.3 GWh in 2025 compared to 217.8 GWh in 2024) from the full nine-month operations in 2025, compared to seven-month operations in 2024, which began only on February 26, 2024 when the plant was officially turned over to the company.

Cost of sales for the nine-month ended September 30, 2025 increased to ₱736.8 million, ₱112.6 million or 18.0% higher than the ₱624.2 million for the same period in 2024 due to higher service fees paid to NIA and the recognition of the full nine-month period depreciation in 2025. This was offset by lower replacement power purchases from WESM in 2025. G&A expenses increased by ₱223.9 million or 171.4% to ₱354.5 million during the period, compared to ₱130.6 million in 2024, mainly on account of taxes and licenses, manpower and other services for maintenance of plant facilities.

FRLC posted a net income of ₱602.1 million for the nine-month ended September 30, 2025, lower by 14.0% or ₱98.2 million compared to ₱700.3 million for the same period in 2024 mainly due to higher cost of sales, G&A expenses, as well as the recognition of interest expense on the long-term debt availed by FRLC in August 2025 totaling ₱15,000.0 million, though partly offset by higher revenues.

ASSETS

Total assets as of September 30, 2025 stood at ₱30,275.8 million, ₱906.4 million or 2.9% lower than the December 31, 2024 level of ₱31,182.2 million. The movement was mainly on account of a lower cash balance and the depreciation and amortization of PPE and intangible assets.

LIABILITIES AND EQUITY

As of September 30, 2025, total liabilities stood at ₱15,114.9 million, ₱109.0 million or 0.7% lower than the December 31, 2024 level of ₱15,223.9 million primarily due to the settlement of income taxes, partly offset by an increase in trade payables and the recognition of lease liability related to the vessel hire.

Total equity as of September 30, 2025 decreased to ₱15,160.9 million, ₱797.4 million or 5.0% lower than the December 31, 2024 level of ₱15,958.3 million. This decrease was primarily due to the declaration of dividends amounting to ₱890.0 million but was partially offset by the net income earned during the period.

FACTORS AFFECTING THE COMPANY'S RESULTS OF OPERATIONS

Set out below are some of the more significant factors that have affected and continue to affect the Company's results of operations.

The Philippine Transition to Renewable Energy

In October 2020, the DOE declared that they would no longer accept new proposals for coal plants in order to encourage investments in cleaner sources of power. Based on capacity additions from 2011 to 2024, the total installed capacity added to the grid was 13,544 MW, of which 59.7% or 8,089 MW came from coal plants.

Apart from the transition away from coal, challenges to grid operations brought about by the COVID-19 pandemic have highlighted the need to shift to a more flexible power supply mix, which would lead to a more sustainable power system that would be responsive to structural changes in demand and accommodative to the entry of more Renewable Energy (RE). The Philippine government, through the DOE, has displayed encouraging support for LNG projects as they recognize natural gas to be an essential bridge fuel to transition to renewable energy, and in line with their goal of turning the Philippines into a Southeast Asian LNG hub. In 2021, it granted permits and notices to proceed to several LNG projects in different phases and declared some as energy projects of national significance (EPNS).

The DOE has set the target of attaining 35% of RE in the energy mix by 2030 and further increasing that to 50% by 2040. To that end, the DOE has been actively working on the implementation of several RE Programs, as follows:

1. ***Renewable Portfolio Standards (RPS)*** mandates electricity suppliers to source a certain percent of their energy supply from an RE resource. The minimum RPS annual increment, or the minimum level of electricity contracted from RE developers, has been increased to 2.52% every year starting 2023, from the previous 1%, in order to reach the 50% RE energy mix target by 2040.

The DOE, through an Advisory dated 29 May 2025, provided the timeline for Renewable Energy Certificates (REC) surrendering for the RPS compliance periods 2020 - 2024. The 2020, 2021, and 2022 RPS requirements deadline was on 30 June 2025, 30 July 2025, and 28 August 2025, respectively. The RPS requirements for 2023 and 2024 are to be surrendered on 30 October 2025 and 25 December 2025, respectively.

2. ***Renewable Energy Market (REM)*** provides a competitive market for Mandated Participants to transact or trade their RECs through the Philippine Renewable Energy Market Systems (PREMS). The REM was established to facilitate the compliance of mandated participants with the RPS Requirement, and its interim commercial operation was formally launched last July 28, 2022. The RE Registrar, Philippine Electricity Market Corporation, released an advisory last January 15, 2024 enjoining the REM Participants to surrender the corresponding RECs for the 2020 RPS Obligation.

The ERC, through Resolution No. 8, Series of 2024, set the REC Price Cap at Php241.56/MWh. The DOE, through Department Circular DC 2024-12-0031, declared the REM Commercial Operations on December 26, 2024.

Following the commercial operations of the REM, trading of REC through the PREMS platforms likewise commenced with the current buyer price ranges from Php50.00 to Php241.00. per REC while seller price ranges from Php165.00 to Php241.56 per REC. As of August 2025, a total of 53,021,540 RECs were issued to the REM participants.

3. ***Green Energy Option Program (GEOP)*** gives smaller end-users with an average peak demand of at least 100kW the option to source their energy requirements from an RE source. The program opens up opportunities for retail contracting of RE generators and commenced last December 3, 2021. Through an advisory dated February 29, 2024, the DOE informed the REM participants that the RECs created under the GEOP will be allocated to the host DU of the GEOP customer. Since the first GEOP customer switch in March 2022 up to September 2025, the industry grew to 720 GEOP end-users, 37 RE Suppliers and 58 Retail Metering Service Providers.

4. **Green Energy Auction Program (GEAP)** is a FiT Extension Mechanism, wherein the auction winners will be recommended by the DOE for FiT eligibility. Only post-RE Law facilities without existing PPAs/PSAs may participate as qualified suppliers. The first and second round of GEAP has been completed with capacities for Solar, Wind, Run-of-river Hydro, Biomass and Waste-to-energy technologies bidded out. The first round resulted in a 98% subscription with a total of 1,967 MW in subscribed capacity. The second round of the auction, on the other hand, awarded approximately 3,580 MW worth of capacity or only 30% of the 11,600MW target. GEAP round 3 (GEA-3) included auction capacities for Pump-storage Hydro, Impounding Hydro and Geothermal of 4,650MW and delivery target of 2026-2035. The GEA-3 was oversubscribed with a total awarded and accepted capacity of 6,677.22 MW.

Further, the fourth round of GEAP (GEA-4) was conducted last 2 September 2025. This particular round included capacities for Solar, Wind and Integrated Renewable Energy with Energy Storage System (IRESS) with a total target installation capacity of 10,653 MW and delivery by 2026 to 2029. GEA-4 was able to reach 95.6% subscription rate or 10,195.48 MW offered capacity.

Lastly, the DOE is looking at the remainder of this year for the fifth round of GEAP (GEA-5) which will cover 3,300 MW of Offshore Wind capacities with a commencement date ranging from 2028 to 2030. The ERC has yet to release the GEAR price for this specific round.

5. **Energy Virtual One Stop Shop (EVOSS)** is a web-based platform built for the submission, processing, and monitoring of energy projects. DOE announced on March 23, 2023 the inclusion of a Pre-application of RE Contract processing in the EVOSS. DOE continues to coordinate with the ERC, other government agencies and Local Government Units (LGUs) for the integration of their energy-related permitting processes in the EVOSS system to uphold the objectives of the EVOSS law.
6. **Energy Storage and a Smart Grid** system is currently being developed to address the intermittent, variable nature of RE by ensuring RE generation and dispatch is optimized regardless of the availability of RE sources.

As of April 2025, the country's Energy Storage Systems capacity is at 1,401 MW, 4.7% of the total registered capacity in the WESM.

7. **Renewable Energy Trust Fund** is a special account administered by the DOE, established under Section 28 of Republic Act No. 9513 or the Renewable Energy Act 2008 (RE Law), to enhance the development and greater utilization of RE through the financing of research, development, demonstration and promotion of RE systems, funding of qualified research and development institutions engaged in RE studies, supporting the development and operation of new RE sources to improve their market competitiveness, and conducting nationwide resource and market assessment studies among others.

Last April 4, 2024, the DOE signed a Memorandum of Agreement with the Department of Science and Technology (DOST) to collaborate in the advancement of RE research and development (R&D). This partnership will utilize the Renewable Energy Trust Fund (RETF) as mandated under the RE Law.

8. **Competitive Renewable Energy Zones (CREZ)** is a national study which aims to identify potential areas of RE development. CREZ phase 1 was concluded back in 2020, and it identified 25 CREZ across the country, amounting to an estimated 152,097 MW of potential RE projects.
9. **Open and Competitive Selection Process** is a program of the DOE where interested parties may apply for RE Contracts for Predetermined Areas (PDAs) offered during a prescribed period. On June 26, 2023, the DOE promulgated DC2023-06-0019 adopting the guidelines for the 4th OCSP (OCSP4). Out of the 20 PDAs offered, two (2) Geothermal Projects were awarded to EDC with a total potential capacity of 120MW.

On September 19, 2025, the DOE announced the plan to conduct the 5th OCSP (OCSP5) which will open bidding for 11 PDAs comprising seven (7) hydropower resources, two (2) geothermal resources, and two (2) wind power resources. The DOE has yet to announce the detailed schedule of activities.

Exchange Rate Fluctuations

The functional and presentation currency of some of the Company's subsidiaries is the Philippine Peso. However, its payments for debt service and major inputs and services are partially denominated in U.S. Dollars. Foreign exchange rate fluctuations affect the cost of borrowings, as well as the Philippine Peso value of such in their respective financial statements. The unit prices for majority of the SSAs and PPAs of EDC are indexed to the U.S. Dollar vis-à-vis the Philippine Peso.

However, the pending completion of the transaction with Prime Infra could result in a change of the Company's functional and presentation currency in the future.

PART II – OTHER INFORMATION

RELATED PARTY TRANSACTIONS AND RISKS

For a detailed discussion of the Company's related party transactions and risks, see *Note 18 – Related Party Transactions* and *Note 19 – Financial Risk Management Objectives and Policies*, respectively, to the accompanying unaudited interim condensed consolidated financial statements.

OTHER RELEVANT INFORMATION

Discussion and analysis of material event/s and uncertainties known to management that would address the past and would have an impact on future operations of the following:

- (i) ***Any events that will trigger direct or contingent financial obligation that is material to the company, including any default or acceleration of an obligation.***

The Company has never been in a default position, nor does it have any contingent financial obligation during the reporting period. Any breach of a loan covenant or any material adverse change to the Company's operations or financial standing could trigger an event of default.

- (ii) ***Any material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships of the company with unconsolidated entities or other persons created during the period.***

PT First Gen Geothermal Indonesia, a wholly owned subsidiary of EDC, has signed a Shareholders' Agreement with PT DSSR Daya Mas Sakti, a subsidiary of PT Dian Swastatika Sentosa Tbk of the Sinar Mas Group in Indonesia, and PT Daya Mas Bumi Sentosa. The Shareholders' Agreement sets out the terms of the strategic partnership for the development of a potential geothermal energy portfolio in Indonesia.

- (iii) ***Any known trends or any known demands, commitments, events or uncertainties that will result in or that are reasonably likely to result in the Company's liquidity increasing or decreasing in any material way.***

Last May 30, 2025, First Gen and Prime Infra executed a Term Sheet. Thereafter, the parties signed a Share Purchase Agreement on July 15, 2025 for the purchase by Prime Infra of a 60% equity stake in First Gen subsidiaries relating to its gas business. On October 23, 2025, First Gen and Prime Infra were advised by the PCC that it rendered a decision clearing the proposed transaction. Subject to the satisfaction of certain conditions precedent, the transaction will result in a strategic partnership with Prime Infra indirectly owning 60% of the issued and outstanding capital stock of the Santa Rita Power Plant, San Lorenzo power plant, San Gabriel power plant, Avion power plant, the proposed Santa Maria power plant, as well as the Interim Offshore LNG Terminal. First Gen will retain a 40% stake in the said projects. First Gen's retention of a 40% ownership of all the gas business will ensure proper continuity and stability of the gas

operating plants, which will, in turn, greatly benefit consumers by way of more stable, predictable and lower prices, far removed the uncertainties of spot purchases.

In consideration for the First Gen shares, Prime Infra has agreed to pay First Gen the amount of ₱50.0 billion upon closing of the transaction, subject to adjustments and modifications as may be agreed by the parties. First Gen will likewise be entitled to receive additional earnout amounts, subject to the fulfillment of certain conditions.

As of September 30, 2025, there were no other known trends, events or uncertainties that have had or reasonably expected to have material effect on the Company's liquidity apart from those listed above.

(iv) Any material commitments for capital expenditures, general purpose of such commitments, and the expected sources of funds for such expenditures should be described.

The Company has projects in the pipeline at varying degrees of development. These projects are being undertaken through the following platforms:

- a. **Pumped Storage:** The Company is currently developing the Aya pumped-storage facility designed to increase the capacity of the Pantabangan-Masiway plant complex by up to 120 MW. The facility is expected to store and generate electricity by moving water between the Pantabangan reservoir and the Masiway reservoir, which are situated at different elevations. The project is designed to allow full year operations independent of the irrigation demands from NIA.
- b. **Run-of-river hydro:** The Company is strengthening its expertise in hydroelectric power plant construction and development in order to start the construction of the 32 MW Bubunawan run-of-river hydro power project. This project is located in Mindanao. Moreover, First Gen has licenses to develop several hydro projects in Mindanao; namely, the 32 MW Bubunawan, 33 MW Tagoloan, 30 MW Puyo, and the 39 MW San Isidro projects.
- c. **Natural gas:** The Company continues to work on the development of the Santa Maria project with a capacity of up to 1,200 MW. The ongoing efforts on the project enables First Gen to be in a better position to make such power plant available in time to meet the expected growth in grid demand, and further help stabilize the grid by complementing intermittent renewables with more natural gas plants.
- d. **Geothermal:** The Company, through EDC, is currently pursuing several local expansion projects in locations spanning Luzon, Visayas, and Mindanao. Currently, the company has commenced with four local projects:
 1. Mahanagdong Geothermal Brine Optimization power plant is a 28 MW plant within the Leyte concession. The target completion of the project is Q4 2025.
 2. Bago Binary Geothermal Power Plant is a 5.6 MW plant within the Northern Negros concession. The target completion of the project is Q4 2026.
 3. Palayan Binary Power Plant Project is a 28.9 MW binary plant located within the Bac-Man concession. Palayan Binary has been completed and is delivering kWh to the grid since January 2024. The project has achieved commercial operations in March 2025.
 4. The Company has completed construction of the 21.573 MW Tanawon Geothermal Power Plant and inaugurated it on August 1, 2025. Tanawon achieved commercial operations last August 27, 2025.

Moreover, it is continuing the exploration and assessment of growth prospects in Indonesia, Chile, and other countries.

e. **Wind and Solar:**

1. **Wind:** As of September 30, 2025, FGVEI is maintaining fifteen (15) Wind Energy Service Contracts (WESC).
2. **Solar:** As of September 30, 2025, FGen Power Ventures, Inc. (FPVI) has been awarded three (3) Solar Energy Operating Contracts (SEOC), all of which are undergoing project development.

The WESC and the SEOC awarded by the DOE grant the Company exclusive rights to explore, develop, construct, operate, and maintain wind and solar energy projects within the defined service contract area. These areas are the focus of the Company's project development efforts and resources in 2025 and beyond.

- f. **Energy Storage Systems:** EDC is currently developing three (3) Battery Energy Storage Systems ("BESS"), i.e., 20 MWh BESS in Bac-Man, 10 MWh BESS in Tongonan, Leyte, and 10 MWh BESS in Southern Negros, which are co-located in the existing geothermal facilities in these sites. The BESS aim to provide grid stability and reliability through provision of ancillary services.

(v) ***Any known trends, events or uncertainties that have had or that are reasonably expected to have a material favorable or unfavorable impact on net sales or revenues or income from continuing operations should be described.***

Last May 30, 2025, First Gen and Prime Infra executed a Term Sheet. Thereafter, the parties signed a Share Purchase Agreement on July 15, 2025 for the purchase by Prime Infra of a 60% equity stake in First Gen subsidiaries relating to its gas business. On October 23, 2025, First Gen and Prime Infra were advised by the PCC that it rendered a decision clearing the proposed transaction. Subject to the satisfaction of certain conditions precedent, the transaction will result in a strategic partnership with Prime Infra indirectly owning 60% of the issued and outstanding capital stock of the Santa Rita Power Plant, San Lorenzo power plant, San Gabriel power plant, Avion power plant, the proposed Santa Maria power plant, as well as the Interim Offshore LNG Terminal. First Gen will retain a 40% stake in the said projects. First Gen's retention of a 40% ownership of all the gas business will ensure proper continuity and stability of the gas operating plants, which will, in turn, greatly benefit consumers by way of more stable, predictable and lower prices, far removed the uncertainties of spot purchases.

The uncontracted portion of the Company's generation capacity could have a significant impact on the Company's overall financial performance should spot market prices of electricity become unfavorable. Spot prices are mostly determined by the supply and demand situation prevailing in the market. The expiration of the Company's PPAs could likewise expose the Company's portfolio more to the WESM or result in the Company entering into PSAs with more contestable customers.

(vi) ***Any significant elements of income or loss that did not arise from the registrant's continuing operations.***

There were no significant elements of income or loss that arose from continuing operations.

(vii) ***Any seasonal aspects that had a material effect on the financial condition or results of operations.***

FG Hydro and Casecnan's sale of electricity, as well as the Company's merchant plants, are affected by seasonality or cyclicity of interim operations. FG Hydro typically follows irrigation requirement while Casecnan seasonality is in line with water inflows.

For EDC's Burgos Wind, higher revenue and operating profits are expected in the first and last quarters of the year based on the wind generation profile of Burgos. Meanwhile, EDC's solar projects are expected to generate higher revenues during the summer months.

(viii) Any material events subsequent to the end of interim period that have not been reflected in the financial adjustments of the interim period.

On October 23, 2025, First Gen and Prime Infra were advised by the PCC that it has rendered a decision clearing the proposed transaction. First Gen and Prime Infra continue to work towards satisfaction of all other conditions precedent to close the deal.

FIRST GEN CORPORATION AND SUBSIDIARIES
SELECTED NOTES TO UNAUDITED INTERIM CONDENSED
CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in U.S. Dollars and in Thousands, Unless Otherwise Stated)

1. Corporate Information

First Gen Corporation (the Parent Company or First Gen) is incorporated in the Philippines and registered with the Philippine Securities and Exchange Commission (SEC) on December 22, 1998. The Parent Company and its subsidiaries (collectively referred to as “First Gen Group”) are involved in the power generation business. All subsidiaries are incorporated in the Philippines, except for First Gen Singapore Pte. Ltd. (FGen SG), which is incorporated in Singapore and certain subsidiaries of Energy Development Corporation (EDC), which are incorporated in BVI, Hong Kong, Peru, Chile and Indonesia (see Note 2).

On February 10, 2006, the Parent Company successfully completed the Initial Public Offering (IPO) in the Philippines of 193,412,600 common stocks, including the exercised greenshoe option of 12,501,700 common stocks, at an IPO price of ₱47.00 per share. The common stocks of the Parent Company are currently listed and traded on the First Board of the Philippine Stock Exchange, Inc. (PSE). First Gen is considered a public company under Section 17.2 of the Securities Regulation Code (SRC).

On January 22, 2010, the Parent Company likewise completed the Stock Rights Offering (the Rights Offering) of 2,142,472,791 rights shares in the Philippines at the proportion of 1.756 rights shares for every one existing common stock held as of the record date of December 29, 2009 at the offer price of ₱7.00 per rights share. The total proceeds from the Rights Offering amounted to ₱15.0 billion (\$319.2 million).

On May 28, 2012, the Parent Company completed the Public Offering of the 100,000,000 Series “G” Preferred Shares in the Philippines at an issue price of ₱100.0 per share. The Series “G” Preferred Shares are currently listed and traded on the First Board of the PSE. The total proceeds from the issuance of the Series “G” Preferred Shares amounted to ₱10.0 billion (\$234.4 million), net of transaction costs amounting to ₱95.2 million (\$2.2 million).

On January 20, 2015, the Parent Company authorized the issuance and sale of an aggregate of 297,029,800 common stocks to be taken from its unissued capital stock and treasury stock at an identical issue price of ₱25.25 per share (the “Offer Price”). The price represents a 2.9% discount to the last traded price of ₱26.00 per share. The placement was conducted via an accelerated bookbuilding process. First Gen’s parent company, First Philippine Holdings Corporation (FPH), which has a 66.2% stake in First Gen’s issued and outstanding common stocks, agreed to subscribe to its pro-rata share in the transaction. The Parent Company issued to FPH 179,127,900 common stocks from treasury stock, as well as 17,623,100 common stocks from unissued capital stock, at the Offer Price. The total proceeds from the issuance of the common stocks amounted to ₱7.4 billion (\$166.5 million), net of transaction costs amounting to ₱62.1 million (\$1.4 million). Following the subscription, FPH maintained its 66.2% stake in the Parent Company’s issued and outstanding common stock.

On April 15, 2020, the Board of Directors (BOD) of the Parent Company approved during its board meeting the two-year extension of the buy-back programs from June 14, 2020 to June 14, 2022. The two-year extension covers the: (i) common stock buy-back program covering up to 300.0 million of the Parent Company’s common stocks; and (ii) Series “G” Preferred Shares buyback program covering up to ₱10.0 billion worth of said redeemable preferred stocks.

On July 1, 2020, the global investment firm KKR acquired 427,041,291 common stocks of First Gen for a total investment value of ₱9.6 billion (\$192.2 million), representing an approximate 11.9% economic interest, or an 8.4% voting interest in First Gen. These shares represent all of the shares that were tendered by the public to Valorous Asia Holdings (“Valorous”), an entity controlled by KKR investment funds. The acquisition follows the completion of a voluntary tender offer for First Gen’s common shares filed with the Philippine SEC last May 26, 2020 by Valorous. The tender offer period ran from May 27 to June 24, 2020 at an offer price of ₱22.50 per share.

Meanwhile, Philippines Clean Energy Holding Inc. (“PCEHI”), a subsidiary of Valorous, announced on August 27, 2021 its intent to acquire a minimum of 3.0% up to a maximum of 5.7% of First Gen’s total issued and outstanding common stocks through a voluntary and public tender offer. The tender offer period ran from September 1 to September 29, 2021 at an offer price of ₱33.00 per common share.

On October 8, 2021, PCEHI further acquired 262,937,672 common stocks of First Gen for a total investment value of ₱8.7 billion, representing 7.3% economic interest, or a 5.2% voting interest in First Gen. These shares represent all of the shares that were tendered by the public to PCEHI. As of September 30, 2025, KKR owns and holds 715,855,363 common stocks of the Parent Company, representing an approximate 19.9% economic interest, or a 14.1% voting interest in First Gen.

On May 18, 2022, the BOD of the Parent Company approved during its board meeting the two-year extension of the buy-back programs from June 15, 2022 to June 14, 2024. The two-year extension covers the: (i) common stock buy-back program covering up to 30.0 million of the Parent Company’s common stocks; and (ii) Series “G” Preferred Shares buyback program covering up to ₱5.3 billion worth of said redeemable preferred stocks.

On June 14, 2022, the BOD of the Parent Company approved during its board meeting, in accordance with the terms and condition of the Parent Company’s Series “G” Preferred Shares, the redemption of all outstanding Series “G” Preferred Shares on July 25, 2022 at the applicable redemption values of ₱100.0 and ₱10.0 a share. As of September 30, 2025, the Parent Company has redeemed its outstanding Series “G” Preferred Shares amounting to ₱ 5,296.6 million (\$98.8 million).

On May 31, 2024, the common stock buy-back program was further extended for two years from June 15, 2024 to June 14, 2026.

On February 10, 2025, the Parent Company issued 28,000,000 Series “H” redeemable preferred stocks with a par value of ₱10.0 per share to First Gen Hydro Power Corporation (FG Hydro), with a total subscription price of ₱2,800.0 million (\$48.2 million), inclusive of additional paid-in capital amounting to ₱2,520.0 million (\$43.4 million).

As of September 30, 2025, FPH directly and indirectly owns 67.84% of the common stocks of First Gen and 100% of First Gen’s voting preferred stocks. FPH is 60.67% and 55.66%-owned by Lopez Holdings Corporation (Lopez Holdings), a publicly listed Philippine-based entity, as of September 30, 2025 and December 31, 2024, respectively. Majority of Lopez Holdings is owned by Lopez, Inc. Lopez, Inc. is the ultimate parent of First Gen. These companies are all incorporated in the Philippines. As of September 30, 2025, there are 320 common stockholders of record of First Gen, and 3,596,575,505 common stocks issued and outstanding (see Note 15).

Corporate Address

The registered principal office address of the Parent Company is 6th Floor, Rockwell Business Center Tower 3, Ortigas Avenue, Pasig City.

2. Summary of Material Accounting and Significant Accounting Policies

Basis of Preparation

The unaudited interim condensed consolidated financial statements of First Gen Group as of September 30, 2025, and for the nine-month periods ended September 30, 2025 and 2024 have been prepared on a historical cost basis, except for certain financial assets and liabilities that have been measured at fair value. The unaudited interim condensed consolidated financial statements are presented in United States (U.S.) dollar, which is the Parent Company's functional currency, and are rounded to the nearest thousands, except when otherwise indicated.

Statement of Compliance

The unaudited interim condensed consolidated financial statements of First Gen Group have been prepared in accordance with Philippine Financial Reporting Standards (PFRSs) Philippine Accounting Standards (PAS) 34, *Interim Financial Reporting*. Accordingly, the unaudited interim condensed consolidated financial statements do not include all of the information and footnotes required in the annual consolidated financial statements, and should be read in conjunction with First Gen Group's annual consolidated financial statements as of and for the year ended December 31, 2024.

Significant Accounting and Financial Reporting Policies

The accounting policies adopted in the preparation of the unaudited interim condensed consolidated financial statements are consistent with those followed in the preparation of the annual consolidated financial statements as of and for the year ended December 31, 2024, except for the adoption of the amendments to existing standard effective in 2025.

- Amendments to PAS 21, *Lack of Exchangeability*

The amendments specify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking.

The adoption of these amendments did not have a material impact on the unaudited interim condensed consolidated financial statements of the First Gen Group.

Basis of Consolidation

The unaudited interim condensed consolidated financial statements comprise the financial statements of the Parent Company and its subsidiaries.

First Gen Group controls an investee if and only if First Gen Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns.

When First Gen Group has less than a majority of the voting or similar rights of an investee, First Gen Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee;
- Rights arising from other contractual arrangements; and
- First Gen Group's voting rights and potential voting rights.

First Gen Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when First Gen Group obtains control over the subsidiary and ceases when First Gen Group loses control over the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the period are included in the unaudited interim condensed consolidated financial statements from the date First Gen Group gains control until the First Gen Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the equity holders of the Parent Company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with First Gen Group's accounting policies. All significant intra-group assets and liabilities, equity, income and expenses, and cash flows relating to transactions between members of First Gen Group are eliminated in the consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If First Gen Group loses control over a subsidiary, it derecognizes the carrying amounts of the assets (including goodwill) and liabilities of the subsidiary, derecognizes the carrying amount of any non-controlling interest (including any attributable components of other comprehensive income recorded in equity), derecognizes the cumulative translation differences recorded in equity, recognizes the fair value of the consideration received, recognizes the fair value of any investment retained, and any surplus or deficit is recognized in the unaudited interim consolidated statement of comprehensive income. First Gen Group also reclassifies the Parent Company's share of components previously recognized in other comprehensive income to profit or loss or retained earnings, as appropriate, as would be required if First Gen Group had directly disposed of the related assets or liabilities.

Non-controlling Interests

Non-controlling interests represent the portion of total comprehensive income or loss and net assets not held by First Gen Group. Non-controlling interests are presented separately in the unaudited interim consolidated statement of income, unaudited interim consolidated statement of comprehensive income, and within equity in the unaudited interim consolidated statement of financial position, separate from equity attributable to equity holders of the Parent Company.

The acquisition of an additional ownership interest in a subsidiary without a change of control is accounted for as an equity transaction in accordance with PAS 27. In transactions where the non-controlling interest is acquired or sold without loss of control, any excess or deficit of consideration paid over the carrying amount of the non-controlling interest is recognized as part of "Equity reserve" account in the equity attributable to the equity holders of the Parent Company.

On February 19, 2025, Tokyo Gas Co., Ltd. (Tokyo Gas), Japan's largest natural gas utility company, has completed its acquisition of a 20% equity ownership in FGEN LNG Corporation (FGEN LNG), a wholly owned subsidiary of First Gen through First Gen LNG Holdings Corporation (LNG Holdings). Tokyo Gas, a company based in Minato, Tokyo, signed a Share Subscription Agreement (SSA) with LNG Holdings in May 2024 for its minority stake in the company. The SSA was tied to a number of conditions precedent, including the procurement of relevant government approvals. Prior to this, Tokyo Gas partnered with First Gen starting in December 2018 for the development and construction of the LNG Terminal, which later broke ground in May 2019 (see Note 14).

For the nine-month periods ended September 30, 2025 and 2024, the non-controlling interests arise from the profits or losses and net assets not held by First Gen Group in FGEN LNG and EDC and Subsidiaries.

Subsidiaries

The following is a list of the companies on which the Parent Company has control:

	September 30, 2025	December 31, 2024
First Gen Renewables, Inc. (FGRI)	100	100
Unified Holdings Corporation (Unified)	100	100

¹ Through FGESHI

² Through FGRI

³ Through FGEN Meridian

⁴ 60% through Unified and 40% through Onecore

⁵ Through AlliedGen

⁶ Through FGHC

⁷ Through Blue Vulcan

⁸ Through FG Mindanao

⁹ Through FMRC

¹⁰ Through FNMHI

¹¹ Through LNG Holdings

¹² Through Liquefied Holdings

¹³ On May 16, 2025, the Parent Company acquired 100% equity interest in Pi Energy from FPH via a Deed of Assignment.

¹⁴ The Parent Company has 40% direct voting interest in FG Hydro while its effective economic interest through Prime Terracota is 67.5% as of September 30, 2025.

All of the foregoing subsidiaries, except FGen SG, are incorporated in the Philippines.

As of September 30, 2025, FG Mindanao, FG Ecopower, FG Visayas Energy, Northern Terracotta, FMRC, FNMHI, FG Tagoloan, FG Tumalaong, FG Puyo, FG Bubunawan, FG Cabadbaran, FG Pipeline, FG Land, FGen Northern Power, FGEN Power Ventures, FGEN San Isidro, FG Vehicles, FGESHI, Liquefied Holdings, FG Reliable Energy, FG Power Solutions, FG Aqua Power, FGen NatGas Supply, FPOI, and FGen Fuel Line have not started commercial operations.

The Power Sector Assets and Liabilities Management Corporation (PSALM) bid out the 165 MW Casecnan Hydro Electric Power Plant (CHEPP) in Pantabangan, Nueva Ecija on May 16, 2023, whereby FRLC, a wholly-owned subsidiary of First Gen, submitted the highest bid and subsequently completed the purchase of the plant. On February 25, 2024, the Deed of Absolute Sale of the CHEPP was signed and executed by PSALM, National Irrigation Administration (NIA) and FRLC. The CHEPP was officially turned over to FRLC on February 26, 2024.

On May 16, 2025, the Parent Company and FPH executed a Deed of Assignment over 210,330 common shares and 2,781,764 preferred shares of Pi Energy for a total acquisition price of ₱1,006.9 million, divided into ₱0.2 million for the common shares and ₱1,006.7 million for the preferred shares. In May 2025, the Parent Company paid FPH the acquisition cost of ₱1,006.9 million (\$18.0 million). The transaction resulted to a recognition of equity reserve amounting to \$0.5 million.

Pi Energy provides customers with energy solutions through an arsenal of products and services such as microgrid, solar rooftop, energy audit, remote energy monitoring, and energy efficiency, among others. Given that First Gen Group is the FPH Group's platform for delivery of value-added and decarbonization solutions, the transfer of Pi Energy to First Gen is aligned with the group's efforts to streamline its business holdings and better manage its portfolio.

Prime Terracota

As of September 30, 2025 and December 31, 2024, Prime Terracota's subsidiaries include the following companies:

	September 30, 2025	December 31, 2024

¹ The Parent Company's effective economic and voting interest in EDC is 45.8% and 65.0% as of September 30, 2025, respectively.

² Has not yet started commercial operations as of September 30, 2025.

³ Serves as an investment holding company.

⁴ Ceased exploration and development activities as of September 30, 2025.

⁵ On June 27, 2024, BOD and Stockholders approved the shortening of corporate term until June 23, 2026.

EDC

As of September 30, 2025 and December 31, 2024, PREHC owns 34.9% of EDC's outstanding voting stocks. Red Vulcan still holds the controlling voting interest with 63.9% ownership of EDC's outstanding voting stocks. The Parent Company continues to consolidate EDC given its current controlling stake.

As of September 30, 2025 and December 31, 2024, the Parent Company has 65.0% effective voting interest in EDC through Prime Terracota.

3. Operating Segment Information

Operating segments are components of First Gen Group that are engaged in business activities from which they may earn revenues and incur expenses, whose operating results are regularly reviewed by First Gen Group's Chief Operating Decision Maker (CODM) to make decisions about how

resources are to be allocated to the segment and assess their performances, and for which discrete financial information is available.

For purposes of management reporting, First Gen Group's operating businesses are organized and managed separately on a per company basis, with each company representing a strategic business segment. First Gen's identified operating segments, which are consistent with the segments reported to the BOD, which is the CODM of First Gen, are as follows:

- FGPC, which operates the 1,000 megawatt (MW) combined cycle, natural gas-fired Santa Rita power plant, and where the Parent Company has a 100% equity interest;
- FGP, which operates the 500 MW combined cycle, natural gas-fired San Lorenzo power plant, and where the Parent Company has a 100% equity interest;
- FNPC, which owns and operates the 420 MW natural gas-fired San Gabriel power plant, and where the Parent Company has a 100% equity interest;
- Prime Meridian, which owns and operates the 97 MW Avion open-cycle natural gas-fired power plant, and where the Parent Company has a 100% equity interest;
- LNG, which owns and operates the offshore LNG Terminal, and where the Parent Company has an 80% equity interest as of September 30, 2025 and a 100% equity interest as of December 31, 2024;
- EDC and Subsidiaries, excluding FG Hydro, which holds service contracts with the DOE corresponding to 10 geothermal contract areas each granting EDC exclusive rights to explore, develop, and utilize the corresponding resources in the relevant contract area. EDC conducts commercial operations in four (4) out of its 10 geothermal contract areas. Likewise, EDC owns the 150 MW Burgos Wind Power Plant (Burgos Wind) and the 6.82 MW Burgos Solar Power Plant Phase 1 and Phase 2 (Burgos Solar) both situated in Burgos, Ilocos Norte. As of September 30, 2025, Burgos Wind and Burgos Solar power plants are entitled to the FIT rates. Also, EDC, through EDC Siklab, earns revenue from its solar rooftop PPAs and lease agreements. As of September 30, 2025, the Parent Company has a 100.0% direct voting interest in Prime Terracota and 45.8% effective economic interest in EDC through Prime Terracota;
- FG Hydro, which operates the 132 MW Pantabangan-Masiway Hydroelectric Power Plants (PAHEP/MAHEP), and where the Parent Company has a 40% direct economic interest and 67.5% effective economic interest (including 27.5% indirect interest through EDC) as of September 30, 2025; and,
- FRLC, which owns and operates the 165MW CHEPP effective February 26, 2024, and where the Parent Company has a 100% equity interest.

Management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment revenue and segment expenses are measured in accordance with PFRS. The classification of segment revenue is consistent with the unaudited interim consolidated statement of income. Segment expenses pertain to the costs and expenses presented in the unaudited interim consolidated statement of income excluding interest expense and financing charges, depreciation and amortization expense and income taxes, which are managed on a per company basis.

First Gen has only one geographical segment as all of its operating assets are currently located in the Philippines. First Gen Group operates and derives principally all of its revenue from domestic operations. Thus, geographical business information is not required.

Substantially, the segment revenues of FGP, FGPC and FNPC (until February 2024) are derived from Meralco, while close to 2.0% of EDC's total revenues are derived from existing long-term Power Purchase Agreement (PPA) with National Power Corporation (NPC).

Financial information on the business segments are summarized as follows:

For the Nine-Month Period Ended September 30, 2025 (Unaudited)										
	FGPC	FGP	FNPC	Prime Meridian	EDC and Subsidiaries*	FG Hydro & FRLC	LNG	Others	Eliminating Entries**	Total

4. Cash and Cash Equivalents

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Cash on hand and in banks	\$447,948	\$297,867
Short-term deposits	391,960	378,931
	\$839,908	\$676,798

Cash in banks earn interest at the respective bank deposit rates. Short-term deposits are made for varying periods of up to three months depending on the immediate cash requirements of First Gen Group, and earn interest at the respective short-term deposits rates.

5. Receivables

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Trade	\$339,537	\$525,812
Due from related parties (see Note 18)	998	1,393
Loans and notes receivables	1,034	783
Others	13,992	22,230
	355,561	550,218
Less: allowance for expected credit losses	19,724	20,649
	\$335,837	\$529,569

Aging of trade receivables:

Current	\$259,114
More than 1 day to 30 days past due	33,532
More than 30 days to one year past due	36,325
More than one year past due	6,866
	<u>\$335,837</u>

Trade receivables are non-interest bearing and are generally collectible on 30 to 60 days. Other receivables comprise mainly of receivables from employees, contractors and suppliers, which are collectible upon demand.

6. Inventories

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
At cost:		
Fuel inventories	\$41,394	\$71,461
Spare parts and supplies	179,866	170,761
	221,260	242,222
At NRV - spare parts and supplies	67,539	57,170
	<u>\$288,799</u>	<u>\$299,392</u>

Fuel inventories recognized as expense were \$113.5 million and \$115.4 million for the nine-month periods ended September 30, 2025 and 2024, respectively, which are recognized as part of the "Costs of sale of electricity" account in the unaudited interim consolidated statements of income (see Note 16).

7. Financial Assets at FVPL

First Gen Group entered into various investment management agreements (IMA) with various Investment Managers, whereby First Gen Group availed the service of the Investment Manager relative to the management and investment of funds.

Among others, following are the significant provisions of the IMA of First Gen Group:

- The investment managers shall administer and manage the fund as allowed and subject to the requirements of the Bangko Sentral ng Pilipinas (BSP), and in accordance with the written investment policy and guidelines mutually agreed upon and signed by the respective investment managers of First Gen Group.
- The agreement is considered as an agency and not a trust agreement. First Gen Group, therefore, shall at all times retain legal title to the fund.
- The IMA does not guaranty a yield, return, or income on the investments or reinvestments made by the investment manager. Any loss or depreciation in the value of the assets of the fund shall be for the account of First Gen Group.

In addition, First Gen Group has investments in various money unit investment trust fund. Fund investments include quoted government securities and other quoted securities. First Gen Group accounts for the entire investment as a financial asset to be carried at FVPL. Mark-to-market gains on the securities amounted to \$1.1 million and \$0.02 million for the nine-month periods ended September 30, 2025 and 2024, respectively, are taken up in the unaudited interim consolidated statements of income.

The movements of the financial assets at FVPL account are as follows:

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Balance at beginning of period	\$1,173	\$362
Additions	113,539	918
Mark-to-market gains	1,132	35
Realized income	615	5
Redemptions	(63,816)	(122)
Foreign exchange adjustments	(163)	(25)
Trustee fees	(22)	—
Balance at end of period	\$52,458	\$1,173

8. Other Current Assets

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Prepaid expenses	\$58,908	\$32,106
Input VAT	14,373	20,250
Prepaid taxes	2,887	2,645
Advances to suppliers	2,252	7,078
Derivative assets (see Notes 19 and 20)	37	4
Short-term investments (see Notes 19 and 20)	—	3,458
Others	15,531	13,221
	\$93,988	\$78,762

Prepaid expenses consist mainly of prepaid insurance, rentals and creditable withholding tax certificates.

Prepaid taxes consist mainly of tax credits that may be used in the future by the operating subsidiaries of First Gen Group.

Advances to suppliers pertains mainly to the advances made by First Gen Group for the purchase of parts and supplies, and other goods and services.

Short-term investments consist of money market securities with maturity of more than three (3) months but less than twelve (12) months.

9. Property, Plant and Equipment

Goodwill

As of September 30, 2025 and December 31, 2024, the outstanding balance of goodwill is attributable to Red Vulcan, GCGI, FG Hydro, and FGHC.

Concession rights for contracts acquired

As a result of the purchase price allocation of Red Vulcan, an intangible asset was recognized pertaining to concession rights originating from contracts of EDC amounting to \$204.3 million (P8,336.7 million). Such intangible asset pertains to the Steam Sales Agreements and PPAs of EDC. The identified intangible asset is amortized using the straight-line method over the remaining term of the existing contracts ranging from 1 to 17 years. The concession rights for contracts acquired have been valued based on the expected future cash flows using the Multiple Excess Earnings Method (MEEM) as of the date of acquisition. MEEM is the most commonly used approach in valuing customer-related assets, although it may be used to value other intangible assets as well. The asset value is estimated as the sum of the discounted future excess earnings attributable to the asset over the remaining project period. The intangible asset related to the concession rights was fully amortized as of September 30, 2025.

Water rights

Water rights include FG Hydro's right to use water from the Pantabangan reservoir for the generation of electricity. NPC, through a Certification issued to FG Hydro dated July 27, 2006, has given its consent to the transfer to FG Hydro, as the winning bidder of the PAHEP/MAHEP, of the water permit for Pantabangan river issued by the National Water Resources Council on March 15, 1977.

Water rights are amortized using the straight-line method over 25 years, which is the term of FG Hydro's agreement with the NIA. The remaining amortization period of water rights is 6.15 years as of September 30, 2025.

Pipeline rights

Pipeline rights represent the construction cost of the natural gas pipeline facility connecting the natural gas supplier's refinery to FGP's power plant including incidental transfer costs incurred in connection with the transfer of ownership of the pipeline facility to the natural gas supplier. The cost of pipeline rights is amortized using the straight-line method over 22 years, which is the term of the Gas Sale and Purchase Agreement (GSPA). The pipeline rights were fully amortized as of September 30, 2025.

Intangible Asset on Acquired O&M Agreements

The intangible asset recognized by FRLC arises from the O&M Agreements for the non-power components and trans-basin facilities contracted with PSALM and NIA, in furtherance of and ancillary to the Asset Purchase Agreement (APA).

The intangible asset is amortized using the straight-line method over 50 years and has a remaining amortization period of 48.20 years as of September 30, 2025.

Rights to use transmission line

On July 15, 2015, FGPC agreed to give, transfer and convey, by way of donation, the Substation Improvements to TransCo amounting to \$1.2 million pursuant to the Substation Interconnection Agreement (SIA) dated September 2, 1997 entered into among FGPC, NPC and Meralco. The transferred substation improvements were accounted for as intangible assets since FGPC still maintains the right to use these assets under the provisions of the PPA with Meralco and the SIA. The cost of the rights to use the Substation Improvements is amortized using the straight-line method over 10 years, which was then the remaining term of the PPA with Meralco. The rights to use were fully amortized as of September 30, 2025.

Other intangible assets

Other intangible assets pertain to computer software and licenses.

11. Other Noncurrent Assets

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Right-of-use assets – net	\$224,073	\$261,022
Input VAT	143,969	139,233
Prepaid major spare parts	76,681	61,173
Exploration and evaluation assets	54,192	45,805
Prepaid expenses - net of current portion	52,256	52,822
Long-term receivables (see Notes 19 and 20)	51,116	49,292
Financial assets at FVOCI (see Notes 19 and 20)	5,977	6,023
Special deposits and funds (see Notes 19 and 20)	2,685	749
Derivative assets (see Notes 19 and 20)	172	15
Deferred debt issuance costs (see Note 13)	–	908
Others (Note 18)	42,591	35,181
	653,712	652,223
Less allowance for impairment losses	31,559	30,337
	\$622,153	\$621,886

The provision for impairment losses pertaining to prepaid taxes and long-term receivables amounted to \$1.6 million and \$5.8 million for the nine-month periods ended September 30, 2025 and 2024, respectively (see Note 16).

“Others” account includes investment made by EDC to Compañía De Energia (Enerco) which is accounted as investment in joint venture amounting to \$20.6 million and \$19.8 million as of September 30, 2025 and December 31, 2024, respectively. As of September 30, 2025, basic surface studies as well as civil works, road rehabilitation, base camp and avalanche controls have already been completed. Additional roads, drilling pad construction, base camp expansion and water supply system have been installed and completed. Exploration drilling program is intended to resume as soon as power supply agreements have been secured, access to transmission line has been negotiated and all the relevant permits have been obtained.

“Others” account also includes advances to contractors, deposits for land acquisitions, and power plant spares totaling to \$21.9 million and \$15.4 million as of September 30, 2025 and December 31, 2024, respectively.

12. Accounts Payable and Accrued Expenses

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Trade (see Note 18)	\$346,067	\$520,940
Deferred output VAT	58,805	67,319
Output VAT	40,732	36,823
Accrued interest and financing costs	27,740	25,615
Withholding and other taxes payable	18,239	23,664
Contract liabilities – current	3,784	–

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Government share payable	\$344	\$859
Due to a related party (see Note 18)	145	145
Others	34,562	34,655
	\$530,418	\$710,020

Trade payables are noninterest-bearing and are normally settled on 30 to 60-day payment terms.

Deferred output VAT pertains to uncollected VAT for sales prior to the effectivity of the “Ease of Paying Taxes” (EOPT) Act.

The accrued interest and financing costs represents interest accrued on the outstanding loans, which is reckoned from the last payment date up to the financial reporting date.

As of September 30, 2025 and December 31, 2024, the “Others” account includes EDC’s provision for shortfall generation, and a portion of liabilities on regulatory assessments and other contingencies.

13. Loans Payable and Long-term Debts

Loans payable

Entities	Dates	Maturities	Interest Rates	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
FGPC

BDO ₱2.0 Billion Term Loan

On January 21, 2025, EDC secured a ₱2.0 billion loan maturing on November 7, 2034 with BDO. The loan was repriced and currently has a six (6)-month floating rate of 6.2336% per annum until its next repricing date in November 2025.

CBC ₱2.0 Billion Term Loan

On February 26, 2025, EDC secured a ₱2.0 billion loan maturing on December 12, 2034 with China Banking Corporation (CBC). The loan was repriced and currently has a six (6)-month floating rate of 6.1419% per annum until its next repricing date in December 2025.

BDO ₱2.0 Billion Term Loan

On March 24, 2025, EDC secured a ₱2.0 billion loan maturing on November 7, 2034 with BDO. The loan was repriced and currently has a six (6)-month floating rate of 6.2336% per annum until its next repricing date in November 2025.

CBC ₱2.0 Billion Term Loan

On April 23, 2025, EDC secured a ₱2.0 billion loan maturing on December 12, 2034 with CBC. The loan was repriced and currently has a six (6)-month floating rate of 6.1419% per annum until its next repricing date in December 2025.

ANZ ₱2.15 Billion Term Loan

On April 24, 2025, EBWPC secured a ₱2.15 billion loan maturing on April 24, 2030 with Australia and New Zealand Banking Group Limited. The loan was priced at a six (6)-month floating rate of 5.9099% per annum until its next repricing date in October 2025.

ING \$50.0 Million Term Loan

On May 22, 2025, EBWPC secured a \$50.0 million loan maturing on May 22, 2030 with Internationale Nederlanden Groep (ING). The loan was priced at a six (6)-month floating rate of 5.76976% per annum until its next repricing date in November 2025.

BPI ₱2.0 Billion Term Loan

On June 25, 2025, EDC secured a ₱2.0 billion loan maturing on September 12, 2034 from BPI. The loan was priced at a six (6)-month floating rate of 6.1147% per annum until its next repricing date in September 2025.

BDO ₱3.0 Billion Term Loan

On August 5, 2025, EDC secured a ₱3.0 billion loan maturing on November 7, 2034 with BDO. The loan was priced at a six (6)-month floating rate of 6.1352% per annum until its next repricing date in November 2025.

CBC ₱3.0 Billion Term Loan

On September 11, 2025, EDC secured a ₱2.0 billion loan maturing on December 12, 2034 with CBC. The loan was priced at a six (6)-month floating rate of 5.7306% per annum until its next repricing date in December 2025.

The movements of the unamortized debt issuance costs account are as follows:

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Balance at beginning of period	\$9,872	\$6,687
Additions during the period	3,032	7,316
Accretion during the period charged to “Interest expense and financing charges” account (see Note 16)	(2,303)	(2,055)
Write off of debt issuance costs	–	(1,398)
Foreign exchange differences	(37)	(678)
Balance at end of period	\$10,564	\$9,872

Loan Covenants. The loans of EDC and its subsidiaries are subject to certain financial covenants. EBWPC is obliged to meet an acceptable level of debt to equity ratio and debt service coverage ratio. Under the various loan agreements, EDC and EBPWC are also subject to debt incurrence ratios and equity distribution restriction ratio, depending on the counterparty, in each case subject to certain exceptions and conditions. As of September 30, 2025 and December 31, 2024, EDC and EBWPC, are in compliance with the loan covenants of all their respective outstanding debts.

Parent Company

The details of the Parent Company’s long-term debt as follows:

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
₱2.5 Billion BDO Term Loan	\$26,557	\$30,330
₱2.5 Billion BPI Term Loan	26,557	30,330
\$200.0 Million Term Facility	–	26,982
₱10.0 Billion BDO Term Loan	–	171,696
₱10.0 Billion BPI Term Loan	–	171,696
	53,114	431,034
Less current portion	9,576	34,189
	\$43,538	\$396,845

₱2.5 Billion Term Loans with BDO and BPI

On February 9, 2021, the Parent Company executed 10-year Term Loan Agreements with BPI and BDO each amounting to ₱2.5 billion (total of ₱5.0 billion). The facility imposes standard loan covenants on the Parent Company and requires the Parent Company to maintain a debt service coverage ratio of at least 1.2:1 and a debt-to-equity ratio of at most 2.5:1. The obligations of the Parent Company under these Term Loan Agreements are unsecured. As of September 30, 2025 and December 31, 2024, the Parent Company is in compliance with the terms of the Term Loan Agreements.

The movements of the unamortized debt issuance costs account are as follows:

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Balance at beginning of period	\$304	\$400
Accretion during the period charged to “Interest expense and financing charges” account (see Note 16)	(54)	(80)
Foreign exchange differences	–	(16)
Balance at end of period	\$250	\$304

₱10.0 Billion Term Loans with BDO and BPI

On November 10, 2023, the Parent Company executed 10-year Term Loan Agreements with BPI and BDO each amounting to ₱10.0 billion (total of ₱20.0 billion). The loan proceeds were used to partially finance the acquisition of CHEPP and fund other general corporate requirements. On February 16, 2024, the Parent Company fully availed the term loans with BPI and BDO.

The interest on the loans will be paid semi-annually, every six months after the initial drawdown date and every six-months thereafter. The Parent Company used floating interest rates as its preferred interest rate pricing option for the loans. The floating interest rates will be computed as the sum of the 6-month PHP Bloomberg Valuation (BVAL) rate as of the repricing date plus a margin, with a one-time option to convert to a fixed interest rate up to the second anniversary of the Term Loan Agreements.

The facility imposes standard loan covenants on the Parent Company and requires the Parent Company to maintain a debt service coverage ratio of at least 1.2:1 and a debt-to-equity ratio of at most 2.5:1. The obligations of the Parent Company under these Term Loan Agreements are unsecured. As of August 18, 2025, the Parent Company is in compliance with the terms of the Term Loan Agreements.

On August 18, 2025, with the conformity of the lenders, the Parent Company voluntarily prepaid its outstanding loan totaling to \$349.3 million (₱20.0 billion), plus accrued interest of \$20.1 million (₱1.2 billion). Debt issuance costs amounting to \$2.3 million were written off and recognized as part of “Others - net” under “Other income (charges)” account in the unaudited interim consolidated statement of income for the nine-month period ended September 30, 2025.

The movements of the unamortized debt issuance costs account are as follows:

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Balance at beginning of period	\$2,358	\$—
Debt issuance costs incurred	—	2,665
Write-off of debt issuance costs	(2,274)	
Accretion during the period charged to “Interest expense and financing charges” account (see Note 16)	(111)	(237)
Foreign exchange differences	27	(70)
Balance at end of period	\$—	\$2,358

\$200.0 Million Term Facility

The Parent Company signed an unsecured \$200.0 million Term Loan Agreement with BDO as Lender and BDO Capital as Arranger on September 22, 2015. The facility imposes standard loan covenants on the Parent Company and requires the Parent Company to maintain a debt service coverage ratio of at least 1.2:1 and a debt-to-equity ratio of at most 2.5:1. The obligations of the Parent Company under this Term Loan Agreement are unsecured. On September 30, 2025, the Parent Company fully paid the term loan.

The movements of the unamortized debt issuance costs account are as follows:

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Balance at beginning of period	\$18	\$73
Accretion during the period charged to “Interest expense and financing charges” account (see Note 16)	(18)	(55)
Balance at end of period	\$—	\$18

FGP

Long-term debt of FGP consists of U.S. dollar-denominated borrowings availed from various lenders to partly finance the operations of its power plant complex.

Nature	Repayment Schedule	Facility Amount	Outstanding Balances	
			September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Term loan facility with BDO and with interest at six-month SOFR plus 1.30% margin plus CAS	Repayment to be made in various semi-annual installments from 2021 up to 2027	\$148,000	\$54,128	\$65,529
Term loan facility with BPI and with interest at six-month SOFR plus 1.30% margin plus CAS	Repayment to be made in various semi-annual installments from 2021 up to 2027	\$70,000	\$25,601	\$30,994
Term loan facility with PNB and with interest at six-month SOFR plus 1.30% margin plus CAS	Repayment to be made in various semi-annual installments from 2021 up to 2027	\$45,000	16,458	19,924
Term loan facility with SMBC and with interest at six-month SOFR plus 1.30% margin plus CAS for Tranche 1 and fixed interest rate of 4.37% for Tranche 2	Repayment to be made in various semi-annual installments from 2021 up to 2027	\$45,000	16,438	19,881
			112,625	136,328
Less current portion			53,718	51,615
Noncurrent portion			\$58,907	\$84,713

The movements of the unamortized debt issuance costs account are as follows:

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Balance at beginning of period	\$672	\$1,189
Accretion during the period charged to “Interest expense and financing charges” account (see Note 16)	(297)	(517)
Balance at end of period	\$375	\$672

The covenants in the term loan facilities of FGP are limited to restrictions with respect to: change in corporate business; amendment of constituent documents; incurrence of other loans; granting of guarantees or right of set-off; maintenance of good, legal and valid title to the critical assets of the site free from all liens and encumbrances other than permitted liens; transactions with affiliates; and specified debt service coverage ratio during any Restricted Payment. FGP’s real and other properties and shares of stock are no longer mortgaged and pledged as part of security to the lenders. Instead, FGP covenants to its lenders that it shall not permit any indebtedness to be secured by or to benefit from any lien on the critical assets of the plant except Permitted Liens. As of September 30, 2025 and December 31, 2024, FGP is in compliance with the terms of the said agreements.

The Term Loan Facilities entered into by FGP last May 25, 2021 includes the provision to fund (in whole or in part) the DSRA with SBLC issued by an investment grade SBLC provider. On June 4, 2021, FGP provided 1-year SBLCs issued by BDO and MUFG in favor of the Lenders of the Term Loan Facilities. These SBLCs are being extended annually with the most recent extension issued by BDO expiring in June 2026. Meanwhile, the previously issued SBLC by MUFG has expired and was transferred to BPI. The new SBLC with BPI will expire in June 2026 and will be extended annually. The purpose of the SBLC is to ensure that the DSRA is fully funded at all times, in accordance with the financing agreements, until full satisfaction of the obligation of FGP under the financing agreements.

FNPC

The movements of the unamortized debt issuance costs account are as follows:

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Balance at beginning of period	\$2,172	\$3,534
Accretion during the period charged to “Interest expense and financing charges” account (see Note 16)	(823)	(1,362)
Balance at end of period	\$1,349	\$2,172

As of September 30, 2025 and December 31, 2024, FNPC is in compliance with the covenants as set forth in its agreement with KfW IPEX - Bank of Germany (KfW-IPEX).

FG Hydro

FG Hydro's long-term debt consists of:

	September 30, 2025 (Unaudited)
₱2.5 billion BDO Term Loan	\$42,435
₱2.5 billion BPI Term Loan	42,435
₱2.0 billion RCBC Term Loan	33,948
	118,818
Less current portion	1,203
Noncurrent portion	\$117,615

On November 28, 2024, FG Hydro executed a 15-year Term Loan Agreements with BDO, BPI and Rizal Commercial Banking Corporation (RCBC) for a combined total amount of ₱7.0 billion (\$121.0 million). On February 6, 2025, FG Hydro fully availed the term loans with BPI, BDO and RCBC. The loan proceeds were used to fund general corporate requirements.

The loan facilities require FG Hydro to maintain a debt-to-equity ratio, which shall not exceed 75:25, and maintain a DSCR, which shall not fall below 1.05. Interest rates on the loans are computed semi-annually. A floating interest rate was selected for each facility prior to drawdown which was computed as the 6-month BVAL plus a spread.

Total debt issuance costs incurred under the Term Loan Agreements amounted to \$0.9 million (₱52.5 million) and was presented as "Deferred debt issuance costs" in the "Other noncurrent assets" account in the unaudited interim consolidated statement of financial position as of December 31, 2024 (see Note 11). The loan was subsequently drawn in February 2025 and the corresponding debt issuance costs were offset against the long-term debt.

The movements of the unamortized debt issuance costs account follow:

	September 30, 2025 (Unaudited)
Debt issuance costs incurred	\$920
Accretion during the period charged to "Interest expense and financing charges" account (see Note 16)	(39)
Foreign exchange differences	(17)
Balance at end of period	\$864

FRLC

FRLC's long-term debt consists of:

	September 30, 2025 (Unaudited)
BDO Term Loan	\$85,279
BPI Term Loan	85,279
RCBC Term Loan	85,280
	255,838
Less current portion	11,432
Noncurrent portion	\$244,406

On July 18, 2025, FRLC executed a 15-year Term Loan Agreements with BDO, BPI and RCBC for a combined total amount of ₱15.0 billion (\$262.7 million). On August 15, 2025, FRLC fully availed the term loans with BPI, BDO and RCBC. The loan proceeds were used to fund general corporate requirements.

The loan facilities require FRLC to maintain a debt-to-equity ratio, which shall not exceed 75:25, and maintain a DSCR, which shall not fall below 1.05. Interest rates on the loans are computed semi-annually. A floating interest rate was selected for each facility prior to drawdown which was computed as the 6-month BVAL plus a spread.

Total debt issuance costs incurred under the Term Loan Agreements amounted to \$2.0 million (₱112.5 million). The movements of the unamortized debt issuance costs account as of September 30, 2025 follows:

	September 30, 2025
	(Unaudited)
Debt issuance costs incurred	\$1,970
Accretion during the period charged to “Interest expense and financing charges” account (see Note 16)	(22)
Foreign exchange differences	(36)
Balance at end of period	\$1,912

14. Other Noncurrent Liabilities

	September 30, 2025	December 31, 2024
	(Unaudited)	(Audited)
Lease liabilities – net of current portion (see Note 18)	\$178,838	\$207,307
Asset retirement obligations (see Note 9)	59,140	56,716
Provision for sick and vacation leaves	7,252	6,589
Derivative liabilities – net of current portion (see Note 20)	597	–
Contract liabilities – net of current portion	1,896	–
Others	62,924	47,718
	\$310,647	\$318,330

Asset Retirement Obligations

This account consists of the asset retirement obligations of FGP, FGPC, FNPC, Prime Meridian and FG Bukidnon. Under their respective Environmental Compliance Certificates, FGP, FGPC, FNPC and Prime Meridian have legal obligations to dismantle their respective power plant assets at the end of their useful lives. FG Bukidnon, on the other hand, has legal obligation under the Hydro Service Contract to dismantle its power plant asset at the end of its useful life. FGP, FGPC, FNPC, Prime Meridian and FG Bukidnon established their respective provisions to recognize their estimated liability for the dismantlement of the power plant assets.

This account also includes the provision for rehabilitation and restoration costs of EDC, which pertain to the present value of estimated costs of legal and constructive obligations required to restore all the existing sites upon termination of the cooperation period. The nature of these restoration activities includes dismantling and removing structures, rehabilitating wells, dismantling operating facilities, closure of plant and waste sites, and restoration, reclamation and re-vegetation of affected areas. The obligation generally arises when the asset is constructed or the

ground or environment at the site is disturbed. When the liability is initially recognized, the present value of the estimated costs were capitalized as part of the carrying amount of the related FCRS and production wells under "Property, plant and equipment" and "Exploration and evaluation assets" accounts (see Notes 9 and 11).

Lease Liabilities

First Gen Group recognized lease liabilities from its operating lease contracts based on the present value of the remaining lease payments over the lease term, discounted using the incremental borrowing rate at the date of initial application.

The movements of the lease liabilities account are as follows:

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Balance at beginning of period	\$267,298	\$223,541
Additions	1,176	83,699
Accretion during the period charged to "Power plant operations and maintenance" account under "Costs of sale of electricity"	5,855	9,132
Accretion during the period charged to "Interest expense and financing charges" account (see Note 16)	\$2,478	\$1,245
Payments	(29,119)	(50,373)
Foreign exchange adjustments	(10,380)	(3,344)
Adjustments	2,524	3,398
Balance at end of period	239,832	267,298
Less current portion	60,994	59,991
Noncurrent portion	\$178,838	\$207,307

FGEN LNG's Time Charter Hire Contract of Floating Storage Regasification Unit (FSRU) with BW Batangas

From August 4, 2024 to October 21, 2024, FGEN LNG did not pay BW Batangas for the charter hire fee due to the unavailability of the FSRU. FGEN LNG and BW Batangas ("Party", or together "Parties") agreed that for the period from August 4, 2024 to September 17, 2024, the FSRU was "not ready for hire" and therefore not billable. However, the period from September 18, 2024 to October 21, 2024 was disputed due to differing interpretations of "ready for hire".

On February 4, 2025, the Parties executed a Settlement Agreement and have agreed to a full and final settlement. As a result, FGEN LNG recognized a \$1.0 million income for the settlement of the FSRU charter hire dispute and a favorable adjustment on the related lease liability amounting to \$5.1 million, which was treated as part of "Others - net" under "Other income" account in the unaudited interim consolidated statement of income for the nine-month period ended September 30, 2025.

Provision for sick and vacation leaves

Sick and annual vacation leaves with pay are given to active employees' subject to certain requirements set by First Gen Group. These leaves are convertible into cash upon separation of the employees. At the end of the year, any remaining unused sick and vacation leave are accrued up to maximum allowed number of leave credits, which is based on the employees' length of service. For EDC, vacation and sick leave credits exceeding the maximum allowed for accrual are forfeited.

Others

Others include cash received from Tokyo Gas for the development of the FGEN Batangas LNG Terminal Project in accordance with the Joint Development Agreement (JDA) entered with the Parent Company last December 5, 2018. The JDA is a preliminary agreement between the parties to pursue development work to achieve a Final Investment Decision (FID). On October 6, 2020, the Parent Company and Tokyo Gas executed a Joint Cooperation Agreement (JCA), which represents the next phase of their joint development of FGEN LNG's Interim Offshore Terminal (IOT) Project. Under the JCA, Tokyo Gas will have a 20% participating interest in the IOT Project and provide support in development, construction, operations and maintenance work to achieve an FID.

On May 21, 2024, FGEN LNG entered into an SSA and Shareholder's Agreement (SA) with Tokyo Gas and LNG Holdings to confirm the intention to proceed with the project, provide additional respective subscription, govern each Investor's rights and obligations with respect to FGEN LNG and the other shareholders, provide for the management of the business and operations of FGEN LNG, and to underpin new large and small-scale LNG opportunities as a means to introduce natural gas throughout the many islands of the Philippines.

As of September 30, 2025 and December 31, 2024, total cash received from Tokyo Gas presented as other noncurrent liabilities amounted to \$13.1 million. On February 5, 2025, the Philippine SEC approved the amended articles of incorporation of FGEN LNG. Following the fulfillment of SSA conditions, FGEN LNG issued its shares of stock to Tokyo Gas on February 19, 2025 for its corresponding 20% stake in FGEN LNG. Consequently, FGEN LNG is now 80% owned by the Parent Company.

This account also includes EDC's estimate of the probable costs for the resolution of EDC's pending assessments from various regulatory agencies and outstanding legal cases including the corresponding interest thereon. Such estimated costs were developed in consultation with in-house and external legal counsels, and are based on the analysis of the potential outcomes. It is possible, however, that future results of operations could be materially affected by changes in the estimates or in the effectiveness of the strategies relating to these proceedings.

15. Equity

a. Capital Stock

As of September 30, 2025, the Parent Company's issued and outstanding redeemable preferred stocks consist of the following:

- The Series "B" preferred stocks have voting rights, entitled to cumulative dividends of two centavos (₱0.02) a share and redeemable at the option of the Parent Company.
- The Series "E" preferred stocks have voting rights, entitled to receive dividends at one centavo (₱0.01) a share and redeemable at the option of the Parent Company.
- The Series "G" preferred stocks have non-voting rights except in the cases provided by law, issue value of one hundred pesos (₱100) a share, dividend rate of 7.7808% on the issue price, entitled to receive cumulative dividends, and redeemable at the option of the Parent Company. As of September 30, 2025, the Parent Company has redeemed its outstanding Series "G" Preferred Shares.
- The Series "H" preferred stocks have non-voting rights except in the cases provided by law, issue value of ten pesos (₱10.0) a share, dividend rate shall be based on the 6-month BVAL

rate as published on the PDEx page plus 150 basis points on the issue price, entitled to receive cumulative dividends, and redeemable at the option of the Parent Company. As of September 30, 2025, the Parent Company has redeemed all of its outstanding Series “H” Preferred Shares.

Preferred stocks, regardless of series, are non-participating and non-convertible to common stocks.

b. Retained Earnings

Following are the dividends declared and paid by the Parent Company as of September 30, 2025:

Declaration date	Record date	Payment date	Shareholders	Description	Dividend per share	Total amount (in USD)	Total amount (in PHP)
May 30, 2025	June 17, 2025	June 30, 2025	Common	Regular	₱0.40	\$25,875	₱1,438,630
May 30, 2025	June 17, 2025	June 30, 2025	Series “H” Preferred*	Regular	1.97	993	55,206
						\$26,868	₱1,493,836

*Pertains to the Series “H” preferred stocks issued to subsidiaries that were eliminated upon consolidation.

Following are the dividends declared and paid by the Parent Company in 2024:

Declaration date	Record date	Payment date	Shareholders	Description	Dividend per share	Total amount (in USD)	Total amount (in PHP)
Nov. 28, 2024	Dec. 12, 2024	Jan. 6, 2025	Series “B” Preferred	Regular	₱0.02	\$340	₱20,000
Nov. 28, 2024	Dec. 12, 2024	Jan. 6, 2025	Series “E” Preferred	Regular	0.01	80	4,686
Nov. 28, 2024	Dec. 12, 2024	Dec. 23, 2024	Common	Regular	0.45	27,567	1,618,459
May 31, 2024	June 18, 2024	July 9, 2024	Common	Regular	0.45	28,386	1,618,459
						\$56,373	₱3,261,604

As of September 30, 2025 and December 31, 2024, total unpaid cash dividends on common and preferred stocks amounting to nil and \$0.4 million, respectively, are presented as “Dividends payable” in the unaudited interim consolidated statements of financial position.

As of September 30, 2025 and December 31, 2024, the retained earnings balance is restricted to the extent of: (a) acquisition price of the treasury shares amounting to \$695.1 million and \$646.9 million, respectively, and (b) the undistributed net earnings of investee companies (including consolidated subsidiaries) amounting to \$979.8 million and \$815.3 million as of September 30, 2025 and December 31, 2024, respectively. Undistributed earnings of the investee companies are not available for dividend distribution until such time that the Parent Company receives the dividends from these investee companies.

c. Treasury Stocks

(i) Common Stocks

Movements of common stocks held in treasury are as follows:

	September 30, 2025 (Unaudited)		December 31, 2024 (Audited)	
	Number of Shares	Cost	Number of Shares	Cost
Balances at beginning and end of period	64,368,052	\$26,169	64,368,052	\$26,169

(ii) Redeemable Preferred Stocks

Movements of redeemable preferred stocks held in treasury are as follows:

	September 30, 2025 (Unaudited)		December 31, 2024 (Audited)	
	Number of Shares	Cost	Number of Shares	Cost
Redeemable Preferred Stock Series "F": Balances at beginning and end of period	100,000,000	\$205,713	100,000,000	\$205,713
Redeemable Preferred Stock Series "G": Balances at beginning and end of period	133,750,000	\$251,754	133,750,000	\$251,754
Redeemable Preferred Stock Series "H": Balances at beginning and end of period	82,986,740	\$163,274	82,986,740	\$163,274
Acquisition of stocks held by a subsidiary	28,000,000	48,193	–	–
Balances at end of period	110,986,740	\$211,467	82,986,740	\$163,274

On February 10, 2025, the Parent Company issued 28,000,000 Series "H" redeemable preferred stocks with a par value of ₱10.0 per share to FG Hydro, with a total subscription price of ₱ 2,800.0 million (\$48.2 million), inclusive of additional paid-in capital amounting to ₱2,520.0 million (\$43.4 million).

16. Costs and Expenses

Costs of Sale of Electricity

	For the Nine-Month Periods Ended September 30	
	2025	2024
Fuel cost (see Note 6)	\$710,103	\$755,424
Depreciation and amortization (see Notes 9 and 10)	211,887	198,031
Power plant operations and maintenance	245,652	245,208
Others	63,139	70,325
	\$1,230,781	\$1,268,988

General and Administrative Expenses

	For the Nine-Month Periods Ended September 30	
	2025	2024
Staff costs	\$55,613	\$57,102
Professional fees	40,741	42,195
Insurance, taxes and licenses	38,649	42,239

Repairs and maintenance	5,438	5,853
Provision for impairment losses on prepaid taxes and long-term receivables (see Note 11)	1,640	5,820
Parts and supplies issued	1,413	1,483
Provision for (reversal of) impairment of spare parts and supplies inventories	(453)	1,091
Others	26,081	24,166
	\$176,698	\$187,908

Interest Expense and Financing Charges

	For the Nine-Month Periods Ended September 30	
	2025	2024
Interest on long-term debt and loans payable	\$87,789	\$78,361
Day 1 loss	2,944	–
Others	107	139
Accretion on:		
Debt issuance cost (see Note 13)	3,667	3,332
Asset retirement obligation (see Note 14)	2,519	2,445
Lease liabilities (see Note 14)	2,478	1,913
	\$99,504	\$86,190

17. Earnings Per Share Calculation

	For the Nine-Month Periods Ended September 30	
	2025	2024
(a) Net income attributable to equity holders of the Parent Company	\$215,372	\$206,992
Less dividends on preferred stocks	–	–
(b) Net income available to common stocks	\$215,372	\$206,992
(c) Weighted average number of common stocks for basic earnings per share	3,596,575,505	3,596,575,505
Basic Earnings Per Share (b/c)	\$0.060	\$0.058

18. Related Party Transactions

Related party relationship exists when the party has the ability to control, directly or indirectly, through one or more intermediaries, or exercise significant influence over the other party in making financial and operating decisions. Such relationships also exist between and/or among entities, which are under common control with the reporting entity and its key management personnel, directors and stockholders. In considering each possible related party relationship, attention is directed to the substance of the relationships, and not merely to the legal form.

The following are the significant transactions with related parties:

- Due to a related party represent noninterest-bearing U.S. dollar and Philippine peso-denominated emergency loans to meet working capital and investment requirements of certain entities in the Lopez Group.
- First Gen Group leases its office premises where its principal offices are located from Rockwell-Meralco BPO Venture, a joint venture of Rockwell Land Corporation (Rockwell), a subsidiary of FPH.
- Following the usual bidding process, EDC awarded to First Balfour, Inc. (First Balfour) procurement contracts for various works such as civil, structural and mechanical/piping works

in EDC's geothermal, solar and wind power plants. EDC also engaged the services of Thermaprime Drilling Corporation (Thermaprime), a subsidiary of First Balfour, for the drilling services such as, but not limited to, rig operations, rig maintenance, well design and engineering. First Balfour is a wholly owned subsidiary of FPH.

- d. On June 2, 2021, FGEN LNG executed a 10-year Tugs Time Charter Party (Tugs TCP) contract with Svitzer Bahrain W.L.L. (Svitzer), a company registered in Bahrain, for the charter of the four (4) tugs vessel. On July 13, 2022, Svitzer novated all its rights and obligations under the Tugs TCP to Batangas Bay Towage Inc. (BBTI), a Philippine-registered company. An Amended and Restated Tugs TCP was also signed on July 13, 2022 between FGEN LNG and BBTI. After the completion of the acceptance tests, the Service Commencement date of July 7, 2023 was agreed by the parties.

BBTI is 30%-owned by Therma One Transport Corp. (Therma One). Therma One is a wholly-owned subsidiary of FPH through First Balfour. Under the Tugs TCP, FGEN LNG shall pay BBTI the cost of the daily hire, from the Service Commencement date until the end of term, as well as other reimbursable costs.

- e. On July 10, 2014, the Parent Company signed a Guarantee and Indemnity Agreement with KfW-IPEX, guaranteeing FNPC's punctual performance on all its payment obligations under the Export Credit Facility loan agreement.

On July 9, 2021, the Parent Company signed a Guarantee Agreement with MUFG Bank Ltd. (MUFG) as a guarantor to the General Credit Agreement (the "Agreement") signed by FGEN LNG and MUFG last July 7, 2021. Under the Agreement, MUFG is giving credit or affording bank facilities of up to \$40.0 million to FGEN LNG. The Parent Company, as a guarantor, agrees to be jointly and severally liable with FGEN LNG to pay MUFG all sums of money which are or at any time during the term of the guarantee be owing to MUFG by FGEN LNG pursuant to the Agreement.

- f. On January 10, 2025, First Gen signed a Guarantee Agreement with Sumitomo Mitsui Banking Corporation Singapore Branch (SMBC) as a guarantor pursuant to the Supplemental Facility Letter (the "SMBC Letter") signed by FGen SG and SMBC last December 2, 2024. Under the SMBC Letter, SMBC is giving credit or affording bank facilities of up to \$150.0 million to FGen SG. First Gen, as a guarantor, agrees to be jointly and severally liable with FGen SG to pay SMBC all sums of money which are or at any time during the term of the guarantee be owing to SMBC by FGen SG pursuant to the SMBC Letter.

On June 11, 2025, First Gen signed a Guarantee Agreement with ING as a guarantor pursuant to the Reimbursement Agreement dated July 28, 2023 as Amended (the "ING Agreement") signed by FGen SG and ING. Under the ING Agreement, ING is giving credit or affording bank facilities of up to \$100.0 million to FGen SG. First Gen, as a guarantor, agrees to be jointly and severally liable with FGen SG to pay ING all sums of money, which are, or at any time during the term of the guarantee be owing to ING by FGen SG pursuant to the ING Agreement.

- g. On May 29, 2024, the Parent Company signed a Guarantee Agreement with ING as a guarantor pursuant to the Accession Agreement to the ING Agreement (the "ING Accession Agreement") signed by FGEN LNG and ING on the same date. Under the ING Accession Agreement, ING agrees to issue SBLC/s as may be required from time to time of up to \$75.0 million to FGEN LNG. The Parent Company, as a guarantor, agrees to be jointly and severally liable with FGEN LNG to pay ING all sums of money, which are, or at any time during the term of the guarantee be owing to ING by FGEN LNG pursuant to the ING Accession Agreement.

- h. EDC issued letters of credit amounting to \$80.0 million in favor of its subsidiary, EDC Chile Limitada, as evidence of its financial support for EDC Chile Limitada's participation in the bids for geothermal concession areas by the Chilean Government.

Under the bilateral corporate term loan agreements executed in December 2024 by EBWPC with BDO and Mizuho, any debt service shortfall amount under these loans is guaranteed by EDC.

Terms and Conditions of Transactions with Related Parties.

Except for the following items (a) the letters of credit issued by EDC in favor of EDC Chile Limitada, and the debt service shortfall guaranteed by EDC to the lenders of EBWPC with respect to the bilateral corporate term loan agreements executed in December 2024 and (b) the Parent Company guarantees issued to: (i) FNPC in relation to FNPC's payment obligations under its Export Credit Facility loan agreement, (ii) to FGEN LNG in relation to its General Credit Agreement with MUFG on the bank facilities of up to \$40.0 million, (iii) to FGen SG with regard to its Guarantee Agreement with SMBC signed in January 2025 on the bank facilities of up to \$150.0 million, (iv) to FGen SG with regard to its Reimbursement Agreement with ING, as amended in June 2025, on the SBLC's of up to \$100.0 million, and (v) to FGEN LNG with regard to its Accession Agreement with ING signed in May 2024 on the SBLCs of up to \$75.0 million there have been no other guarantees provided for or received from any other related party during the period ended September 30, 2025 and the year ended December 31, 2024. The outstanding balances at the end of each year are unsecured and interest-free and settlement occurs in cash.

Details of amounts due from related parties (included in the "Receivables" account) and due to a related party (included in the "Accounts payable and accrued expenses" account) are as follows:

			Transactions for the periods ended	Net Amounts due from/to related parties		
			September 30, 2025 (Unaudited)	December 31, 2024 (Audited)	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)

			\$6,332	\$93,138	\$120,749	\$129,704

Due from related parties - Others are advances to FPH, Lopez Holdings, and FPH Capital Resources, Inc. (FCRI). Lopez Holdings is the intermediate parent company of First Gen through FPH. First Philec, FCRI and FGHC International Ltd. are subsidiaries of FPH.

All related parties are incorporated in the Philippines, except for FGHC International, which was incorporated in Cayman Islands.

19. Financial Risk Management Objectives and Policies

First Gen Group's principal financial liabilities are comprised of loans payable and long-term debts, among others. The main purpose of these financial liabilities is to raise financing for First Gen Group's growth and operations. First Gen Group has other various financial assets and liabilities such as cash and cash equivalents, receivables, amounts due to and from related parties and accounts payable and accrued expenses, which arise directly from its operations.

As a matter of policy, First Gen Group does not trade its financial instruments. However, First Gen Group enters into derivative and hedging transactions, primarily interest rate swaps, cross currency swaps, and foreign currency forwards, as needed, for the sole purpose of managing the relevant financial risks that are associated with First Gen Group's borrowing activities and as required by the lenders in certain cases.

First Gen Group has an Enterprise Wide Risk Management Program, which is aimed to identify risks based on the likelihood of occurrence and impact to the business, formulate risk management strategies, assess risk management capabilities and continuously monitor the risk management efforts.

The main financial risks arising from First Gen Group's financial instruments are interest rate risk, foreign currency risk, credit risk and liquidity risk. The BOD reviews and approves policies for managing each of these risks.

Credit Risk

First Gen Group trades only with recognized, reputable and creditworthy third parties and/or transacts only with institutions and/or banks which have demonstrated financial soundness. It is First Gen Group's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, receivable balances are monitored on an ongoing basis and the level of the allowance account is reviewed on an ongoing basis to ensure that First Gen Group's exposure to doubtful accounts is not significant.

For EDC, the geothermal and power generation businesses trade with NPC and National Transmission Corporation (TransCo), both are government-owned-and-controlled corporations. Any failure on the part of NPC and TransCo to pay their obligations to EDC would affect EDC's business operations. As a practice, EDC monitors closely its collections from NPC and TransCo, and may charge interest on delayed payments following the provisions of the PPAs and Renewable Energy Payment Agreement (REPA), respectively. Receivable balances are monitored on an ongoing basis to ensure that EDC's exposure to bad debts is not significant. The maximum exposure of trade receivable is equal to the carrying amount.

Set out below is the information about the credit risk exposure on EDC's trade receivables using a provision matrix:

September 30, 2025		Days past due					Total
	Current	<30 days	30-60 days	61-90 days	>91 days	Past Due	
Expected credit loss rate	0.0%	0.0%	0.0%	0.0%	1.6%	100.0%	17.10%
Estimated total gross carrying amount at default	\$67,838	\$3,350	\$881	\$793	\$20,730	\$18,846	\$112,438
Expected credit loss	–	–	–	–	341	18,846	19,187

December 31, 2024		Days past due					Total
	Current	<30 days	30-60 days	61-90 days	>91 days	Past Due	
Expected credit loss rate	0.0%	0.0%	0.0%	0.0%	0.9%	100.0%	15.1%
Estimated total gross carrying amount at default	\$64,203	\$3,024	\$1,389	\$430	\$38,379	\$18,712	\$126,137
Expected credit loss	–	–	–	–	342	18,712	19,054

With respect to credit risk arising from the other financial assets of First Gen Group, which comprise of cash and cash equivalents (excluding cash on hand), trade and other receivables, financial assets at FVPL, and short-term investments, First Gen Group's exposure to credit risk arises from a possible default of the counterparties with a maximum exposure equal to the carrying amount of these instruments before taking into account any collateral and other credit enhancements.

Credit Risk Exposure. The table below shows the gross maximum exposure to credit risk of First Gen Group's financial assets as of September 30, 2025 and December 31, 2024.

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Accounted for as cash flow hedge

Credit Quality of Financial Assets

The evaluation of the credit quality of First Gen Group's financial assets considers the payment history of the counterparties.

Financial assets are classified as 'high grade' if the counterparties are not expected to default in settling their obligations, thus, credit risk exposure is minimal. These counterparties normally include banks, related parties and customers who pay on or before due date. Financial assets are classified as 'standard grade' if the counterparties settle their obligations to First Gen Group with tolerable delays.

As of September 30, 2025 and December 31, 2024, substantially all financial assets are viewed by management as 'high grade', considering the collectability of the receivables and the credit history of the counterparties. Meanwhile, past due but not impaired financial assets are classified as standard grade.

Concentration of Credit Risk

The Parent Company, through its operating subsidiaries FGP and FGPC earns substantially all of its revenue from Meralco. Meralco is committed to pay for the capacity and energy generated by the natural gas power plants under the existing PPAs and PSA. While the PPAs and PSA provide for the mechanisms by which certain costs and obligations including fuel costs, among others, are pass-through to Meralco or are otherwise recoverable from Meralco, it is the intention of the Parent Company, FGP and FGPC to ensure that the pass-through mechanisms, as provided for in their respective PPAs and PSA, are followed.

EDC's geothermal and power generation businesses trade with NPC and TransCo. Any failure on the part of NPC and TransCo to pay their obligations to EDC would affect EDC's business operations.

First Gen Group's exposure to credit risk arises from default of the counterparties, with a maximum exposure equal to the carrying amounts of the receivables from Meralco, in the case of FGP and FGPC, and the receivables from NPC and TransCo, in the case of EDC.

The table below shows the risk exposure in respect to credit concentration of First Gen Group as of September 30, 2025 and December 31, 2024:

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Trade receivables from Meralco	\$153,831	\$327,692
Trade receivables from NPC and TransCo	40,775	43,538
Total credit concentration risk	\$194,606	\$371,230
Total receivables	\$335,837	\$529,569
Credit concentration percentage	57.95%	70.10%

Merchant Risk

Currently, a portion of First Gen Group's portfolio is exposed to the volatility of spot prices because of supply and demand changes, which are mostly driven by factors that are outside of First Gen Group's control. These factors include (but are not limited to) unexpected outages, weather conditions, transmission constraints, and changes in fuel prices. These have caused and are expected to cause instability in the First Gen Group's operating results.

First Gen Group plans to mitigate the risks by having a balanced portfolio of contracted and spot capacities. As of September 30, 2025 and December 31, 2024, First Gen Group is 68% and 69%, respectively, contracted in terms of installed capacity.

Capital Management

The primary objective of First Gen Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business, comply with its financial loan covenants and maximize shareholder value. Core capital includes long-term debt and equity.

First Gen Group manages its capital structure and makes adjustments to it, in light of changes in business and economic conditions. To maintain or adjust the capital structure, First Gen Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. No changes were made in the objectives, policies or processes during the period ended September 30, 2025 and the year ended December 31, 2024.

First Gen Group monitors capital using a debt ratio, which is total debt (net of debt issuance costs) divided by total debt plus total equity. The amounts considered as total debt are mostly interest-bearing debt and First Gen Group's practice is to keep the debt ratio lower than 75:25.

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Long-term debts (current and non-current portions)	\$2,106,207	\$1,920,687
Loans payable	–	47,000
Total debt	\$2,106,207	\$1,967,687
Equity attributable to equity holders of the Parent Company	\$2,937,106	\$2,762,899
Non-controlling interests	665,136	686,254
Total equity	\$3,602,242	\$3,449,153
Total debt and equity	\$5,708,449	\$5,416,840
Debt ratio	37:63	36:64

First Gen Group's subsidiaries are obligated to perform certain covenants with respect to maintaining specified debt-to-equity and minimum debt-service-coverage ratios, as set forth in their respective agreements with the creditors. As of September 30, 2025 and December 31, 2024, First Gen Group is in compliance with those covenants.

20. Financial Instruments

Set out below is a comparison by category of the carrying values and fair values of First Gen Group's financial instruments as of September 30, 2025 and December 31, 2024 that are carried in the unaudited interim condensed consolidated financial statements:

	September 30 2025 (Unaudited)		December 31, 2024 (Audited)	
	Carrying Value	Fair Value	Carrying Value	Fair Value

Financial liability accounted for as cash flow hedges - Derivative liabilities	\$719	\$719	\$-	\$-
	\$2,759,056	\$2,994,867	\$2,294,735	\$2,470,799

*Excluding output VAT, local and other taxes and payables to government agencies.

Fair Value and Categories of Financial Instruments

The fair values of cash and cash equivalents, receivables, short-term investments, other current assets, accounts payable and accrued expenses, dividends payable, loans payable, and amounts due to/from related parties approximate the carrying values at financial reporting date, due to the short-term maturities of the transactions.

Long-term receivables

The fair value of long-term receivables was computed by discounting the expected cash flow using the applicable rates of 5.55% as of September 30, 2025 and 5.85% as of December 31, 2024.

Financial assets at FVOCI

Fair values of quoted debt and equity securities are based on quoted market prices and other observable data.

Financial instruments at FVPL

The fair values of financial instruments at FVPL are based on quotations provided by the investment manager.

Long-term debts

The fair values of long-term debts were computed by discounting the instruments expected future cash flows using the following prevailing rates as of September 30, 2025 and December 31, 2024:

Long term Debts	Basis	September 30, 2025	December 31, 2024
FGP, First Gen* and FNPC (U.S. dollar denominated)	Credit adjusted U.S. dollar interest rates	3.39% to 3.94%	4.04% to 4.30%
Parent Company and FRLC (Peso-denominated)	Applicable rates	5.25% to 6.44%	6.04% to 6.24%
EDC	Applicable rates	1.70% to 8.86%	2.90% to 3.26%

*The fair value of First Gen's U.S. dollar long-term debt approximates the carrying value at financial reporting date as it matured in September 2025.

Lease liabilities

The fair values for the lease liabilities are estimated using the discounted cash flow methodology with the applicable rates ranging from 6.17% to 7.44% as of September 30, 2025 and 6.65% to 7.23% as of December 31, 2024.

Fair Value Hierarchy of Financial Assets and Liabilities

The table below summarizes the fair value hierarchy of First Gen Group's financial assets and liabilities that are recorded at fair value. The hierarchy of these assets and liabilities are based on the inputs used to derive the fair value of such financial assets and liabilities and are categorized as follows:

- Level 1 category includes financial assets and liabilities whose fair value is based on quoted market price in active markets for identical assets and liabilities;

- b) Level 2 category includes financial assets and liabilities whose fair value uses inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and
- c) Level 3 category includes those financial assets and liabilities whose fair value is derived using inputs that are not based on observable market data.

	September 30, 2025 (Unaudited)			
	Fair value	Level 1	Level 2	Level 3
Financial assets at amortized cost -				
Long-term receivables	\$44,979	\$-	\$-	\$44,979
Financial assets at FVOCI:				
Debt instruments	3,248	3,248	-	-
Equity instruments	1,913	-	1,913	-
Financial assets accounted for as cash flow hedges - Derivative assets	209	-	209	-
Financial assets designated at FVPL	52,458	31,277	21,181	-
Long-term debts	2,339,280	-	-	2,339,280
Lease liabilities	242,570	-	-	242,570

	December 31, 2024 (Audited)			
	Fair value	Level 1	Level 2	Level 3
Financial assets at amortized cost -				
Long-term receivables	\$39,737	\$-	\$-	\$39,737
Financial assets at FVOCI:				
Debt instruments	3,240	3,240	-	-
Equity instruments	1,967	-	1,967	-
Financial assets accounted for as cash flow hedges - Derivative assets	19	-	19	-
Financial assets designated at FVPL	1,173	1,132	41	-
Long-term debts	2,096,810	-	-	2,096,810
Lease liabilities	267,239	-	-	267,239

As of September 30, 2025 and December 31, 2024, there were no transfers between Level 1 and Level 2 fair value measurements and there were no transfers into and out of Level 3 fair value measurements.

Derivative Financial Instruments

First Gen Group enters into derivative transactions such as interest rate swaps to hedge its interest rate risks arising from its floating rate borrowings, and cross currency swaps and foreign currency forwards to hedge the foreign exchange risk arising from its payables, loans, and long-term debts. These derivatives (including embedded derivatives) are accounted for either as derivatives not designated as accounting hedges or derivatives designated as accounting hedges.

The tables below show the fair values of First Gen Group's outstanding derivative financial instruments, reported as assets or liabilities, together with their notional amounts as of September 30, 2025 and December 31, 2024. The notional amount is the basis upon which changes in the value of derivatives are measured.

	September 30, 2025 (Unaudited)			December 31, 2024 (Audited)		
	Derivative Assets	Derivative Liabilities	Notional Amount	Derivative Assets	Derivative Liabilities	Notional Amount
Derivatives Designated as Accounting Hedges						
Freestanding derivatives:						
Cross currency swaps	\$99	\$74	\$40,000	\$19	\$-	\$
Call spread swaps	51	-	60,000	-	-	-
Interest rate swaps	59	645	190,000	-	-	10,000
Total derivatives	\$209	\$719		\$19	\$-	
Presented as:						
Current	\$37	\$122		\$4	\$-	
Noncurrent	172	597		15	-	
Total derivatives	\$209	\$719		\$19	\$-	

Derivatives not Designated as Accounting Hedges

These derivatives may include freestanding derivatives used to economically hedge certain exposures but were not designated by management as accounting hedges. Such derivatives are classified as at FVPL with changes in fair value directly taken to the unaudited interim consolidated statement of income.

EDC and EBWPC entered into various call spread swaps (CSS), cross currency swaps (CCS), and interest rate swap (IRS) contracts to hedge its U.S. dollar-denominated long-term debts.

CCS Contracts - EDC

As of September 30, 2025, EDC entered into various CCS with aggregate notional amount of \$40.0 million. These derivative contracts are designated to partially hedge the interest rate and foreign exchange risks on its Mizuho \$50.0 million term loan.

As of September 30, 2025 and December 31, 2024, the outstanding aggregate notional amount of CCS amounted to \$40.0 million and nil, respectively.

The aggregate fair value change of these CCS amounted to \$0.3 million and nil as of September 30, 2025 and December 31, 2024, respectively.

CSS Contracts - EDC

EDC entered into various CSS with aggregate notional amount of \$60.0 million in the first quarter of 2025. These derivative contracts are designated to hedge the possible foreign exchange loss on its CTBC \$50.0 million and Mizuho \$50.0 million term loans.

As of September 30, 2025 and December 31, 2024, the outstanding aggregate notional amount of CSS amounted to \$60.0 million and nil, respectively.

The aggregate fair value gains on these CSS amounted to \$0.4 million and nil as of September 30, 2025 and December 31, 2024, respectively.

IRS Contracts – EDC and EBWPC

As of September 30, 2025, EDC and EBWPC entered into various IRS with aggregate notional amount of \$60.0 million and \$117.2 million, respectively.

These derivative contracts are designated to partially hedge the interest rate risk on the EDC's and EBWPC's Commercial Debt Facility (Foreign Facility) that is benchmarked against six (6)-month USD Term SOFR and with flexible interest reset feature that allows EDC and EBWPC to select what interest reset frequency to apply (i.e., monthly, quarterly or semi-annually). As it is EDC's and EBWPC's intention to reprice the interest rate on the Foreign Facility semi-annually, EDC and EBWPC utilize the IRS with semi-annual interest payments and receipts.

As of September 30, 2025 and December 31, 2024, the outstanding aggregate notional amount of IRS amounted to \$190.0 million and \$10.0 million, respectively.

The aggregate fair value losses on these IRS amounted to \$5.5 million and \$0.02 million as of September 30, 2025 and December 31, 2024, respectively.

Hedge Effectiveness Results

As of September 30, 2025 and December 31, 2024, the net movements of changes made to the “Cumulative translation adjustments” account pertaining to EDC’s cash flow hedges are as follows:

	September 30, 2025 (Unaudited)	December 31, 2024 (Audited)
Balance at beginning of period	(\$6,044)	(\$3,608)
Fair value changes taken into equity during the period	(3,572)	(8,692)
Gain on unwinding of derivatives	–	3,549
Fair value changes realized during the period	(382)	2,707
	(9,998)	(6,044)
Deferred income tax effect on cash flow hedges	476	1,630
Fair value deferred into equity	(\$9,522)	(\$4,414)

21. Events after Financial Reporting Date

First Gen

Following the execution of a Term Sheet by First Gen and Prime Infrastructure Capital, Inc. (Prime Infra) on May 30, 2025, the parties signed a Share Purchase Agreement on July 15, 2025 for the purchase by Prime Infra of a 60% equity stake in First Gen subsidiaries relating to its gas business. Subject to the approval of the Philippine Competition Commission (PCC) and certain conditions precedent, the transaction will result in a strategic partnership with Prime Infra indirectly owning 60% of the issued and outstanding capital stock of the Santa Rita Power Plant, San Lorenzo power plant, San Gabriel power plant, Avion power plant, the proposed 1200MW Santa Maria power plant, as well as the Interim Offshore LNG Terminal. First Gen will retain a 40% stake in the said projects. In consideration for the First Gen shares, Prime Infra has agreed to pay First Gen the amount of ₱50,000 million upon closing of the transaction, subject to adjustments and modifications as may be agreed by the parties. First Gen will likewise be entitled to receive additional earn-out amounts, subject to the fulfillment of certain conditions.

On October 23, 2025, the parties were advised by the PCC that it has rendered a decision clearing the proposed transaction. First Gen and Prime Infra continues to work towards the satisfaction of all other conditions precedent.

EDC

On October 17, 2025, EBWPC entered into \$10.0 million IRS contract with ANZ to hedge its \$80.0 million Mizuho long-term floating rate debt.

On October 22, 2025, EDC drew ₱2.0 billion from the new term loan facility signed with BPI dated August 29, 2025.

On October 29, 2025, PT FirstGen Geothermal Indonesia, a wholly owned subsidiary of EDC, has signed a Shareholders’ Agreement with PT DSSR Daya Mas Sakti, a subsidiary of PT Dian Swastatika Sentosa Tbk of the Sinar Mas Group in Indonesia, and PT Daya Mas Bumi Sentosa. The Shareholders’ Agreement sets out the terms of the strategic partnership for the development of a potential geothermal energy portfolio in Indonesia.

22. Other Matters

- *Explanatory comments about the seasonality or cyclicalities of interim operations*

Except for FG Hydro's, FRLC's, and FG Bukidnon's sale of electricity coming from hydroelectric power/operations, seasonality or cyclicalities of interim operations is not applicable to First Gen Group's type of business because of the nature of its contracts with Meralco and NPC, which includes guaranteed volume under the applicable take-or-pay, minimum energy off-take or contracted energy provisions. BGI's and GCGI's sales to cooperatives and industries are also not subject to seasonality or cyclicalities.

For EDC's Burgos Wind, higher revenue and operating profits are expected in the first and last quarters of the year based on the generation profile of Burgos due to stronger average wind speed. Meanwhile, EDC's Solar power plants is expected to generate its highest revenue during the summer months.

- *The nature and amount of items affecting assets, liabilities, equity, net income, or cash flows that are unusual because of their nature, size or incidence*

There are no assets, liabilities, equity, net income or cash flows that are unusual because of their nature, size or incidence during the current period.

- *The nature and amount of changes in estimates of amounts reported in prior interim periods of the current fiscal year or changes in estimates of amounts reported in prior financial years, if those changes have a material effect in the current interim period.*

The key assumptions concerning the future and other key sources of estimation used in the preparation of the unaudited interim condensed consolidated financial statements are consistent with those followed in the preparation of First Gen Group's annual consolidated financial statements as of and for the year ended December 31, 2024.

- *The effect of changes in the composition of the issuer during the interim period, including business combinations, acquisition or disposal of subsidiaries and long-term investments, restructurings, and discontinuing operations.*

On May 16, 2025, the Parent Company and FPH executed a Deed of Assignment over 210,330 common shares and 2,781,764 preferred shares of Pi Energy for a total acquisition price of ₱1,006.9 million, divided into ₱0.2 million for the common shares and ₱1,006.7 million for the preferred shares. In May 2025, the Parent Company paid FPH the acquisition cost of ₱1,006.9 million (\$18.0 million). The transaction resulted to a recognition of equity reserve amounting to \$0.5 million.

There are no other material changes in the composition of the issuer during the interim period.

- *Changes in contingent liabilities or contingent assets since the last annual reporting date*

There are no material changes in the contingent liabilities or contingent assets since the last annual financial reporting date.
