Date: Saturday, November 15, 2025 at 10:23 AM GMT+8

Dear **NEXTGENESIS CORPORATION**,

Greetings!

This serves as a temporary receipt of your submission, subject to verification of the form and the quality of the image of the submitted report.

SEC Registration No: 0000017596

Company Name: NEXTGENESIS CORPORATION

Document Code: SEC_Form_17-Q

A separate email will be sent as proof of review and/or final acceptance.

Thank you.

SECURITIES AND EXCHANGE COMMISSION
SEC Headquarters, 7907 Makati Avenue,
Salcedo Village, Barangay Bel-Air, Makati City,
1209, Metro Manila, Philippines

REMINDER:

TO ALL FILERS OF REPORTS IN THE e-FAST

Please strictly follow the instructions stated in the form. Filings not in accordance with the prescribed template for the following reports will be automatically reverted by the system to the filer: 1. General Information Sheet (GIS-Stock); 2. General Information Sheet (GIS-Non-stock); 3. General Information Sheet (GIS- Foreign stock & non-stock); 4. Broker Dealer Financial Statements (BDFS); 5. Financing Company Financial Statements (FCFS); 6. Investment Houses Financial Statements (IHFS); 7. Publicly – Held Company Financial Statement; 8. General Form for Financial Statements; 9. Financing Companies Interim Financial Statements (FCIF;) 10. Lending Companies Interim Financial Statements (LCIF).

Per Section 18 of SEC Memorandum Circular No. 3 series of 2021, the reckoning date of receipt of reports is the date the report was initially submitted to the eFAST, if the filed report is compliant with the existing requirements. A report, which was reverted or rejected, is considered not filed or not received. A notification will be sent to the filer, stating the reason for the report's rejection in the remarks box.

THIS IS AN AUTOMATED MESSAGE - PLEASE DO NOT REPLY DIRECTLY TO THIS EMAIL

NEXTGENESIS CORPORATION
(Formerly ASIATRUST DEVELOPMENT BANK, INC.)
NOTES TO FINANCIAL STATEMENTS

General Information

NextGenesis Corporation (formerly Asiatrue Development Bank, Inc) was incorporated on October 05, 1960 as a private development bank under the name of Quezon City Development Bank with the support of DBP by way of counterpart equity investments and loan rediscounting facilities. The Bank changed its name to ASIATRUST BANK in 1982. It became a publicly listed company through its Initial Public Offering (IPO) with the Philippine Stock Exchange (PSE: "ASIA") on October 08, 1996.

On the special meeting of the Board of Directors on November 4, 2010, the Board approved for the voluntary suspension of trading of the Company's common shares in the PSE effective immediately. On the same date, the Company made a disclosure to the PSE on their voluntary suspension and advised that the major stockholders of the Company were already in an advanced stage of discussion with an investor. Management desired to incorporate the material terms of the transaction in the Company's financial statements in order to better apprise the public and other interested parties. On November 5, 2010, PSE implemented the trading suspension of the Company's shares.

By virtue of the Company's Corporate Resolution No. 4809 dated March 22, 2012, it was resolved to change its primary purpose as a Company to a holding Company, and the change of its corporate name was approved by its stockholders.

On June 15, 2012, the Company's assets and liabilities of Asiatrue were assumed by Asia United Bank (AUB) following shareholders' and regulatory approvals. The transaction, however, excluded the bank's trust business. Since then, the Company exists as a non-bank shell company to liquidate the trust business under BSP supervision.

On January 31, 2013, the Board of Directors approved the quasi-reorganization of the Bank through the reduction of its authorized capital stock by way of decreasing the par value of the common shares from P10.00 to P0.64 to wipe out the deficit. This was ratified by the stockholders on a Special Stockholders' Meeting held on February 27, 2013. On the same meeting, it was also approved that the Articles of Incorporation of the Company be amended in connection with the decrease in the authorized capital stock.

On June 26, 2013, the Company applied to Bangko Sentral ng Pilipinas (BSP) for the revocation of its banking license and submitted an amended Articles of Incorporation and By-laws reflecting change in purpose from bank to non-bank company.

In the Monetary Board's Resolution No. 1815 dated October 31, 2013, approved-in-principle the proposal of the Company to consign the Company's trust assets in a court of competent jurisdiction, as part of the Company's exit plan for the liquidation of its remaining trust assets, in compliance with Resolution No. 760 dated May 10, 2012. In the Order dated April 29, 2014, the Court directed the Company to deliver and surrender to the Court within fifteen (15) days from receipt of the said Order all the assets, cash and non-cash of respondents. Pursuant to the Order of the Court dated May 6, 2014, the cash assets of respondents were deposited with the Office of the Clerk of Court – Regional Trial Court of Quezon City on May 8, 2014. On May 7, 8 and 9, 2014, the Company turned over the non-cash assets of respondents. In the Court Order dated May 14, 2014, the Trust Banking Sector of the Company is relieved from any obligations as trustee/manager.

The BSP in its letter dated September 07, 2015 informed the Company that the Monetary Board in its Resolution No. 1376 dated August 27, 2015 noted the consignment of the cash and non-cash trust assets surrendered and deposited with the Office of the Clerk of Court and Branch 83 of the Regional Trial Court, as approved under Court Order date May 14, 2014

with Certificate of Finality date July 07, 2014 as part of the liquidation of the remaining trust assets and the amendments of the Company's Articles of Incorporation and By-Laws on the change in purpose to that of non-bank entity and change in corporate name to reflect that it is no longer engaged in banking and trust business. In the same letter, the Monetary Board also approved the surrender of the trust license/authority of Asiatrust Bank to the BSP pursuant to Section X429 of the MORB and ordered the release of the government securities deposited with the BSP for the faithful performance of trust and other fiduciary business.

On December 29, 2015, SEC approved and released the Amended Articles of Incorporation and By-laws stating that the new name of the Company shall be NextGenesis Corporation and amending the primary and secondary purposes from being in a banking and trust business into a holding Company. The Company's Stock Symbol under its new name is "NXGEN".

On May 03, 2017, SEC approved the decrease in capital stock by way of decrease in par value and equity restructuring to wipe out the deficit as of June 30, 2016.

On December 13, 2017, the Board of Directors approved the appointment of two Directors to replace two resigning Directors. The disclosure was made to the SEC and PSE on December 15, 2017 and December 14, 2017, respectively.

On April 05, 2018, the Board of Directors accepted the resignation and appointment of principal officers. The disclosure was made to the SEC and PSE on the same day.

On May 7, 2021, the Board of Directors in a special meeting accepted the resignation of MR. CANDON B. GUERRERO as member of the Board effective immediately.

As of March 31, 2022, the Company's Board of Directors and Principal Officers are as follows:

Regular Directors

1. Roland M. Garcia - Chairman
2. Gary M. Garcia - President
3. Ma. Victoria C. Padilla
4. Dionisio C. Ong
5. Arsenio A. Alfiler
6. Roberito P. Marasigan
7. Juan Gabriel G. Garcia

Independent Directors

8. Coney D. C. Mateo
9. Marilyn P. Roque
10. Marjorie T. Fernandez

The Company's registered office address is located at 1424 Asiatrust Building, Quezon Avenue, South Triangle, Quezon City. The amendment of the principal office address is not yet applied with BIR and SEC for approval.

As of reporting date, the company has no operation and is not ready to discuss new business that it wants to pursue under NextGenesis Corporation.

Basis for the Preparation and Presentation of Financial Statements

Statement of Compliance

The financial statements have been prepared in conformity with the Philippine Financial Reporting Standards (PFRS) and are under the historical cost convention, except for certain financial instruments that are carried at amortized cost.

Functional and Presentation Currency

Items included in the financial statements of the Company are measured using the Philippine Peso (P), the currency of the primary economic environment in which the Company operates (the "functional currency").

The Company chose to present its financial statements using its functional currency.

Current and Non-Current Presentation

The Company classifies an asset as current when:

- It expects to realize the asset, or intends to sell or consume it, in its normal operating cycle;
- It holds the asset primarily for the purpose of trading;
- It expects to realize the asset within twelve (12) months after the reporting period; or
- The asset is cash or cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve (12) months after the reporting period.

The Company classifies all other assets as non-current.

The Company classifies a liability as current when:

- It expects to settle the liability in its normal operating cycle;
- It holds the liability primarily for the purpose of trading;
- The liability is due to be settled within twelve (12) months after the reporting period; or
- It does not have an unconditional right to defer settlement of the liability for at least twelve (12) months after the reporting period.

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities, respectively.

Significant Accounting Policies

Principal accounting and financial reporting policies applied by the Company in the preparation of its financial statements are enumerated below and are consistently applied to all the years presented, unless otherwise stated.

Fair Value Measurement

The Company considers the fair value of an asset or a liability using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs.

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3 inputs are unobservable inputs for the asset or liability.

Financial Assets

The Company recognizes a financial asset in its statements of financial position when, and only when, the Company becomes a party to the contractual provisions of the instrument.

Except for receivables that do not have a significant financing component, at initial recognition, the Company measures a financial asset at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset.

At initial recognition, the Company measures receivables that do not have a significant financing component at their transaction price.

The Company's financial assets measured at amortized cost include cash, trust fees under 'receivables' and security deposits under 'prepayment and other current assets'.

Cash

Cash includes cash on hand and in banks. Cash on hand is measured at face value. Cash in banks pertain to cash deposits held at call with banks that are subject to insignificant risk of change in value. This shall be measured at the undiscounted amount of the cash or other consideration expected to be paid or received.

Trust Fees

Trust fees are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. This category includes financial assets arising from interest earned but are not yet collected for financial asset at amortized cost, uncollected income from trust fees and other receivables.

Trust fees are measured at amortized cost using the effective interest method, less any impairment. Finance income is recognized by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial. The Company does not have financial assets measured at fair value either through profit or loss or through other comprehensive income,

Reclassification

When, and only when, the Company changes its business model for managing financial assets it shall reclassify all affected financial assets in accordance with the classification of financial assets. If the Company reclassifies financial assets, it shall apply the reclassification prospectively from the reclassification date. The Company shall not restate any previously recognized gains, losses (including impairment gains or losses) or interest.

Effective Interest Method

Interest revenue is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for: purchased or originated credit-impaired financial assets and financial assets that are not purchased or originated credit-impaired but subsequently have become credit-impaired.

Impairment

The Company measures expected losses of a financial instrument in a way that reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable assumption that is available without undue cost or effort at the reporting date about past events, current conditions and forecast of future economic conditions.

The company adopted the General Approach in accounting for impairment.

The Company applies general approach to cash in banks, trust fees and security deposits' At each reporting date, the Company measures the loss allowance for a financial asset at an amount equal to the lifetime expected credit losses if the credit risk on that financial asset has increased significantly since initial recognition' However, if the credit risk has not increased significantly, the Company measures the loss allowance equal to 12-month expected credit losses.

The Company compares the risk of default occurring as at the reporting date with the risk of default occurring as at the date of initial recognition and consider the macro-economic factors such as GDP, interest, and inflation rates, the performance of the counterparties' industry, and the available financial information of each counterparty to determine whether there is a significant increase in credit risk or not since initial recognition.

The Company assumes that the credit risk on a financial instrument has not increased significantly since initial recognition because the financial instrument is determined to have low credit risk at the reporting date.

If the Company has measured the loss allowance at an amount equal to lifetime expected credit losses in the previous reporting period, but determines at the current reporting date, that the credit quality improves (i.e. there is no longer a significant increase in credit risk since initial recognition), then the Company shall measure the loss allowance at an amount equal to 12-month expected credit losses at the current reporting date,

The company recognizes in profit or loss, as an impairment gain or loss, the amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date.

The Company performs the assessment of significant increases in credit risk on collective basis for financial assets with collateral otherwise it is assessed on an individual basis.

The Company determines that a financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred.

Evidence that a financial asset is credit-impaired includes observable data about the following events:

- Significant financial difficulty of the counterparty;
- A breach of contract, such as a default or past due event;
- The lender(s) of the counterparty, for economic or contractual reasons relating to the counterparty's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider; and
- It is becoming probable that the counterparty will enter bankruptcy or other financial reorganization.

Derecognition

The Company derecognizes a financial asset when, and only when the contractual rights to the cash flows of the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition. The difference between the carrying amount and the consideration received is recognized in profit or loss.

Write-off

The Company directly reduces the gross carrying amount of a financial asset when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. A write-off constitutes a derecognition event.

Prepayment

Prepayment represents expenses not yet incurred but already paid in cash. This is initially recorded as asset and measured at the amount of cash paid. Subsequently, this is charged to profit or loss as they are consumed in operations or expire with the passage of time.

Prepayment is classified in the statements of financial position as current assets when the expenses related to prepayment is expected to be incurred within one (1) year or the Company's normal operating cycle whichever is longer. Otherwise, prepayment is classified as non-current assets.

Excess Tax Credits

Excess tax credits arise from creditable withholding tax certificates obtained from the Company's customers and overpayment of income taxes in prior years. These are accumulated and are reduced when deducted from income tax due.

Furniture and Equipment

Furniture and equipment are initially measured at cost. The cost of an asset consists of its purchase price and costs directly attributable to bringing the asset to its working condition for its intended use. Subsequent to initial recognition furniture and equipment are carried at cost less accumulated depreciation and accumulated impairment losses.

Subsequent expenditures relating to an item of furniture and equipment that have already been recognized are added to the carrying amount of the asset when it is probable that future economic benefits, in excess of the originally assessed standard of performance of the existing asset, will flow to the Company. All other subsequent expenditures are recognized as expenses in the period in which those are incurred.

Depreciation is computed on the straight-line method based on the estimated useful lives of the assets. Furniture and equipment is depreciated over five (5) years.

The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted prospectively if appropriate, if there is an indication of a significant change since the last reporting date.

An item of furniture and equipment is derecognized on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of a furniture and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in profit or loss when the asset is derecognized.

Impairment of Assets

At each reporting date, the Company assesses whether there is any indication that any assets other than financial assets that are within the scope of PFRS 9, Financial Instruments, may have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest

group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount. An impairment loss is recognized as an expense unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

When an impairment loss subsequently reverses, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset or cash-generating unit in prior years. A reversal of an impairment loss is recognized as income unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

Financial Liabilities

The Company recognizes a financial liability in its statements of financial position when, and only when, the Company becomes party to the contractual provisions of the instrument. The Company measures a financial liability at its fair value minus, in the case of financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the liability.

Derecognition

The Company removes a financial liability (or part of a financial liability) from its statements of financial position when, and only when, it is extinguished (i.e. when the obligation in the contract is discharged or cancelled or has expired). The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

Classification

The Company classifies all financial liabilities as subsequently measured at amortized cost, except for:

- financial liabilities at fair value through profit or loss;
- financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies;
- financial guarantee contracts;
- commitments to provide a loan at a below-market interest rate; and
- contingent consideration recognized by an acquirer in a business combination.

The Company's financial liabilities at amortized cost pertain to accrued expenses and advances from a related party.

The Company does not have financial liabilities at fair value through profit or loss.

Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue costs. Ordinary shares are classified as equity.

Employee Benefits

- **Short-term Benefits**

The Company recognizes a liability net of amounts already paid and an expense for services rendered by employees during the accounting period. Said benefits are measured at the undiscounted amount expected to be paid in exchange for services rendered. The Company as of the current year has no employees and no remuneration given to its Directors, but if the Company will have employees, the following short-term benefits may be given to them which includes but not limited to salaries and allowances, SSS, PHIC, and HDMF contributions.

Provisions and Contingencies

Provisions

Provisions are recognized when the Company has a present obligation, whether legal or constructive, as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

Contingent Liabilities and Assets

Contingent liabilities and assets are not recognized because their existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company.

Contingent liabilities are disclosed, unless the possibility of an outflow of resources embodying economic benefits is remote.

Contingent assets are disclosed only when an inflow of economic benefits is probable.

Expense Recognition

Expense encompasses losses as well as those expenses that arise in the course of the ordinary activities of the Company.

The Company recognizes expenses in the statements of comprehensive income when a decrease in future economic benefits related to a decrease in an asset or an increase of a liability has arisen that can be measured reliably.

Leases

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

Related Parties and Related Party Transactions

A related party is a person or entity that is related to the Company that is preparing its financial statements. A person or a close member of that person's family is related to Company if that person has control or joint control over the Company, has significant influence over the Company, or is a member of the key management personnel of the Company or of a parent of the Company.

An entity is related to the Company if any of the following conditions applies:

- The entity and the Company are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).
- One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).
- Both entities are joint ventures of the same third party.
- One entity is a joint venture of a third entity and the other entity is an associate of the third entity.
- The entity is a post-employment benefit plan for the benefit of employees of either the Company or an entity related to the Company. If the Company is itself such a plan, the sponsoring employers are also related to the Company.
- The entity is controlled or jointly controlled by a person identified above.
- A person identified above has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).
- Management entity providing key management personnel services to a reporting entity.

Close members of the family of a person are those family members, who may be expected to influence, or be influenced by, that person in their dealings with the Company and include that person's children and spouse or domestic partner; children of that person's spouse or domestic partner; and dependents of that person or that person's spouse or domestic partner. A related party transaction is a transfer of resources, services or obligations between related parties, regardless of whether a price is charged.

Current Tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the statements of comprehensive income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred Tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences, carry forward of unused tax credits from excess Minimum Corporate Income Tax (MCIT) over Regular Corporate Income Tax (RCIT) and unused Net Operating Loss Carryover (NOLCO), to the extent that it is probable that taxable profits will be available against which those deductible temporary differences and carry forward of unused MCIT and unused NOTCO can be utilized. Deferred income tax, however, is not recognized when it arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction that affects neither the accounting profit nor taxable profit or loss.

Deferred tax liabilities are recognized for taxable temporary differences. Deferred tax assets arising from deductible temporary differences are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Current and deferred taxes are recognized as an expense or income in profit or loss, except when they relate to items that are recognized outside profit or loss, whether in other comprehensive income or directly in equity, in which case the tax is also recognized outside profit or loss.

Basic Loss Per Share

The Company computes its basic loss per share by dividing net loss attributable to ordinary equity holders of the Company by the weighted average number of ordinary shares outstanding during the period.

Events after the Reporting Period

The Company identifies subsequent events as events that occurred after the reporting period but before the date when the financial statements were authorized for issue. Any subsequent events that provide additional information about the Company's position at the reporting period, adjusting events, are reflected in the financial statements, while subsequent events that do not require adjustments, non-adjusting events, are disclosed in the notes to financial statements when material.

Changes in Accounting Policies

The adoption of the new and revised standards was made in accordance with their transitional provisions, otherwise the adoption is accounted for as change in accounting policy under PAS B, Accounting Policies, Changes in Accounting Estimates and Errors.

Critical Accounting Judgments and Key Resources of Estimation Uncertainties

In the application of the Company's accounting policies, Management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Critical Judgments in Applying Accounting Policies

The following are critical judgments, apart from those involving estimations that Management has made in the process of applying the entity's accounting policies and that have the most significant effect on the amounts recognized in financial statements.

Assessment of Going Concern Assumption

When preparing financial statements, Management shall make an assessment of the Company's ability to continue as a going concern. An entity shall prepare financial statements on a going concern basis unless management either intends to liquidate the entity or to cease trading, or has no realistic alternative but to do so. When Management is aware in making its assessment of material uncertainties related to events or conditions that may cast significant

doubt upon the entity's ability to continue as a going concern, the entity shall disclose those uncertainties. In assessing whether the going concern assumption is appropriate, Management takes into account all available information about the future, which is at least, but is not limited to, twelve months from the end of the reporting period. The degree of consideration depends on the facts in each case.

Assessment of Classification of Lease

The Company determines whether a lease qualifies as an operating lease. In making its judgments, the Company considers whether the risk and reward of the leased property will be transferred to the lessee. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership. Whether a lease is a finance lease or an operating lease depends on the substance of the transaction rather than the form of the contract.

In June 2019, 2018 and 2017, the Company's lease agreement was classified as operating lease because it does not transfer substantially all the risks and rewards incidental to ownership.

Assessment of Contractual Terms of a Financial Asset

The Company determines whether the contractual terms of a financial asset give rise on a specified date to cash flows that are solely payments of principal and interest on the principal amount outstanding. In making its judgments, the Company considers whether the cash flows before and after the changes in timing or in the amount of payments represent only payments of principal and interest on the principal amount outstanding.

Recognition of Provision and Contingencies

Judgement is exercised by Management to distinguish between provisions and contingencies.

Key Sources of Estimation Uncertainties

The following are the key assumptions concerning the future, and other key sources of estimation uncertainties at the end of the reporting periods that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Estimating Expected credit Losses of Financial Assets

The Company evaluates the expected credit losses related to its financial assets based on an individual assessment for significant financial assets and collective assessment on other financial assets by grouping financial assets that shares similar credit risk characteristics and available facts and circumstances, including, but not limited to historical loss experience, current information and macro-economic factors.

The Company uses credit ratings, performance of banking industry, macro-economic factors and bank's financial information to assess the expected credit losses on its cash in banks. In view of the foregoing factors, Management believes that the expected credit loss is nil.

The Company uses historical experience with the counterparty, credit ratings, and macro-economic factors to assess the expected credit losses on its accounts receivable.

Reviewing Residual Values, Useful Lives and Depreciation Method of Furniture and Equipment

The residual values, useful lives and depreciation method of the furniture and equipment are reviewed at least annually, and adjusted prospectively if appropriate, if there is an indication of a significant change in, how an asset is used; significant unexpected wear and tear; technological advancement; and changes in market prices since the most recent annual reporting date. The useful lives of the Company's assets are estimated based on the period over which the assets are expected to be available for use. In determining the useful life of an asset, the Company considers the expected usage, expected physical wear and tear, technical or commercial obsolescence arising from changes or improvements in production,

or from a change in the market demand for the product or service output and legal or other limits on the use of the Company's assets. In addition, the estimation of the useful lives is based on Company's collective assessment of industry practice, internal technical evaluation and experience with similar assets. It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in factors mentioned above.

The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of furniture and equipment would increase the recognized operating expenses and decrease non-current asset. The Company uses a depreciation method that reflects the pattern in which it expects to consume the asset's future economic benefits. If there is an indication that there has been a significant change in the pattern used by which a Company expects to consume an asset's future economic benefits, the entity shall review its present depreciation method and, if current expectations differ, change the depreciation method to reflect the new pattern. '

Impairment of Non-Financial Assets

The Company performs an impairment review when present. certain impairment indicators are Determining the fair value of accounts receivables (except trust fees), prepayment and other current assets (except security deposits), and furniture and equipment requires the determination of future cash flows expected to be generated from the continued use and ultimate disposition of such assets, requires the Company to make estimates and assumptions that can materially affect the financial statements. Future events could cause the Company to conclude that foregoing assets are impaired' Any resulting impairment loss could have a material adverse impact on the financial position and results of operations.

The preparation of the estimated future cash flows involves significant judgment and estimations' While the Company believes that its assumptions are appropriate and reasonable, significant changes in the assumptions may materially affect the assessment of recoverable values and may lead to future additional impairment charges under PFRS.

Non-recognition of Deferred Tax Assets

The Company reviews the carrying amounts at each reporting date and reduces deferred tax assets to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized prior to expiration.

Contingencies

The Company is currently involved in legal proceedings. The estimate of the probable cost for the resolution of claims has been developed in consultation with the aid of the outside legal counsel handling the Company's defense in this matter and is based upon an analysis of potential results.

Management does not believe that the outcome of this matter will significantly affect the results of operations. It is probable, however, that future results of operations could materially be affected by the changes in the estimates or in the effectiveness of the strategies relating to the proceedings.

Contingent and Commitments

All outstanding Trust accounts have been consigned to the court (RTC 83, Quezon City) per the Order dated April 29, 2014. The Monetary Board noted this in its Resolution No. 1376 dated August 27, 2015.

Additional Disclosures

Other than what was reported or disclosed in the accompanying financial statements, there are no:

- Material transactions that affect the assets, liabilities, equity, net income, or cash flows that are unusual in size or are brought about by seasonal or cyclical events.
- Changes in estimates of amounts in prior financial years.
- Issuances, repurchases, and repayments of debt and equity securities.
- Dividends paid (aggregate or per share) separately for common shares.
- Material events after the date of this report that have not been reflected in the financial statements.
- Changes in the composition of the Bank during the interim period, including business combinations, acquisition or disposal of subsidiaries and long-term investments, restructurings, and discontinuing operations.
- Material contingencies and any other events or transactions that are material to an understanding of the current interim period.

PART I – FINANCIAL INFORMATION

Item 1. Financial Statements.

Please refer to the financial statements

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

September 30, 2025 vs June 30, 2025, Financial Condition

At the end of the first quarter of the fiscal year, total resources reached ₱123.350M, ₱0.070M or 0.06% lower than the year-end June 30, 2025 level of ₱123.421M.

The bulk of the decrease in total assets was due to Other Current Assets amounting to (₱0.071M) or (0.07%) offset by the increase in Cash at ₱0.001M or 0.00%.

Other Assets decreased by ₱0.071M due to amortized prepayment on the annual listing fee with the PSE. The increase in cash was due to a lesser amount of payment for expenses.

Total liabilities accounted for 71.81% of the total resources. Total Liabilities increased by 0.34% or ₱0.301M from ₱88.273M as of June 30, 2025, to ₱88.574M as of September 30, 2025 due to an increase in advances from stockholders and accrual of expenses.

The Company's capital funds decreased by ₱0.371M as of September 30, 2025 compared to that of June 30, 2025. The decrease was accounted for by the operating losses for the period.

September 30, 2025 vs. September 30, 2024, Results of Operation

The Company posted a ₱0.371M year-to-date net loss as of the first quarter of the fiscal year, lower by ₱0.007M compared to ₱0.378M net loss for the same period last year.

Operating expenses amounting to ₱0.371M was lower by ₱0.007M or 1.91% against that of September 30, 2024 with total of ₱0.378M. The decrease was mainly due to Management and Professional Fees ₱0.001M and Travel and Transportation ₱0.004M.

Management and professional fees represent fees paid by the Company to consultants employed to operate the shell company as well as legal fees and fees paid to our external auditors.

Other than the aforementioned, there are no known trends, events or uncertainties, as of now, which the Company projects to have significant or material impact on its liquidity. There are no material commitments for capital expenditures, nor any material changes expected.

Plan of Operation

On February 15, 2012, the Bank and Asia United Bank Corporation (AUB) announced that they have entered into an agreement for AUB to acquire the banking assets and assume the banking liabilities of Asiatruster. The transaction excluded the trust business of Asiatruster.

Subsequently, the Company proceeded in implementing the trust liquidation plan submitted to BSP. The activity culminated on May 04, 2014, when Quezon City RTC 83, issued as order relieving ATB-TBG of its obligation as trustee for accounts it consigned. These were

accounts not closed for certain reasons, most notably beneficiaries/trustors that can no longer be contacted despite diligent efforts and those that have two or more conflicting claimants.

On January 31, 2013, the Board of Directors approved the reorganization of the Company through the reduction of the par value of the common shares from P10.00 to P0.64 to wipe out the deficit in order to allow the Company to have a fresh start following the disposal of its Companying business. This was ratified by the stockholders on a Special Stockholders' Meeting held on February 27, 2013.

On the same meeting, it was also approved that the Articles of Incorporation of the Company be amended in connection with the decrease in the authorized capital stock.

On June 26, 2013, the Company applied to Bangko Sentral ng Pilipinas (BSP) for the revocation of its banking and trust licenses and submitted an amended Articles of Incorporation and By-laws for the change from bank to a non-bank company.

The BSP in its letter dated September 07, 2015 informed the Company that the Monetary Board in its Resolution No. 1376 dated August 27, 2015 noted the consignment of the cash and non-cash trust assets surrendered and deposited with the Office of the Clerk of Court and Branch 83 of the Regional Trial Court, as approved under Court Order date May 14, 2014 with Certificate of Finality date July 07, 2014 as part of the liquidation of the remaining trust assets and the amendments of the Company's Articles of Incorporation and By-Laws on the change in purpose to that of non-bank entity and change in corporate name to reflect that it is no longer engaged in banking and trust business. In the same letter, the Monetary Board also approved the surrender of the trust license/authority of Asiatrust Bank to the BSP pursuant to Section X429 of the MORB and ordered the release of the government securities deposited with the BSP for the faithful performance of trust and other fiduciary business.

On December 29, 2015, SEC approved and released the Amended Articles of Incorporation and By-laws stating that the new name of the Company shall be NextGenesis Corporation and amending the primary and secondary purposes from being in a banking and trust business into a holding Company. The Company's Stock Symbol under its new name is "NXGEN".

On May 03, 2017, SEC approved the decrease in capital stock by way of decrease in par value and equity restructuring to wipe out the deficit as of June 30, 2016.

On December 17, 2018, the Company held its annual stockholders' meeting attended in person or by proxy by more than 59% of the issued and outstanding shares. In the said meeting, the actions of the Company from 2012 to 2018 were ratified by the stockholders. The Board of Directors also held its organizational meeting on the same day.

The company continues to carefully study its business options as a holding company and will come up with specific business plans when they are ready at the right opportune time.

OTHER INFORMATION

Asiatrust used the following financial ratios as key performance indicators, namely: Capital Adequacy Ratios, Asset Quality Ratios, Liquidity Ratios, Profitability Ratios, and Efficiency Ratios up to June 17, 2012. Some of these ratios will no longer apply after said date [June 17, 2012] as it is no longer a bank after the consummation of the ASPA transaction. Below is the table showing how the Bank calculates them.
