Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Description of Business

Atok-Big Wedge Co. Inc., formerly Atok-Big Wedge Mining Co., Inc. (the "Parent Company"), was incorporated and registered with the Securities and Exchange Commission ("SEC") on September 4, 1931. Its corporate life was extended on September 25, 1981 for another fifty (50) years to expire on September 25, 2031. The common shares of the Parent Company are listed in the Philippine Stock Exchange, Inc. ("PSE") under the ticker symbol: AB.

Since its incorporation, the Parent Company engaged in mining as its primary purpose, producing gold as its major product and silver as a by-product. Its production was all sold to the Central Bank of the Philippines at a price subsidized by the Philippine Government, and later at the prevailing world market price. Gold bullions are used by the Philippine Government as one of the components in the monetary reserve.

Although the Parent Company changed its primary purpose in 1996 from mining to general investment, it reverted to its original purpose of engaging in exploration and development of mining, oil, gas, and other natural resources when it amended its Articles of Incorporation, which was approved by the SEC on May 24, 2010.

The Parent Company has two wholly owned subsidiaries, AB Stock Transfers Corporation ("ABSTC") and Tidemark Holdings Limited ("Tidemark").

ABSTC was incorporated on June 24, 2010, with the purpose of establishing, operating, and acting as a transfer agent and/or registrar of corporations.

On the other hand, Tidemark is a holding company registered and domiciled in Hongkong SAR, which the Company bought on 3 October 2011. Tidemark used to own 9,646,757 ordinary shares of Forum Energy plc, now Forum Energy Limited ("Forum"), a company registered and domiciled in the United Kingdom representing, approximately 27.14% of Forum's outstanding capital. In March 2017, Tidemark subscribed to 6,666,667 new shares of Forum, together with the subscription simultaneously made by the other

shareholder of Forum. This new subscription resulted in Tidemark owning 20% of Forum. In March 2020, in response to a capital call made by Forum, Tidemark subscribed to another 1,666,666 new shares of Forum to maintain its shareholdings in Forum at 20%. Forum then issued 6,145,293 shares of stock to Tidemark to offset shareholder advances as of December 2023. Tidemark's shareholdings in Forum remain at 20% following this latest transaction.

Tidemark expects the absolute value of its 20% stake in Forum to exceed the value of its 27.14% stake. Forum is a gas & oil exploration and production company with a portfolio of projects in the Philippines. Among these projects is the Service Contract (SC) 72 where Forum holds 70% equity. SC72 is situated offshore West of Palawan Island and is host to the Sampaguita offshore gas/condensate discovery. Drilling plans for SC72 have been placed on hold by the Philippine government pending the resolution of territorial sovereignty disputes involving claimant countries surrounding West Philippine Sea.

The Parent Company is a regular member and signatory of the Chamber of Mines. It has adopted the spirit and substance of the Chamber of Mines' Code of Conduct which calls for sustainable mineral resources development, environmental responsibility and a social commitment to the general welfare and economic development of the people in the localities in which it operates.

Over the past seven decades, the Parent Company has established a strong foundation in the Philippine mining industry.

Pursuant to its goal of seeking out projects to put into operation, the Parent Company made a continued careful and diligent evaluation of multiple metallic and non-metallic prospects for possible investment. While it looked into investment possibilities in Laos, it recently decided to re-focus its efforts on the Philippines with priority on projects in the advanced stage, but not disregarding green field exploration prospects with potential. Discussions also continued for mines with confirmed potential and previously operated but closed during the period with low metal prices. However, the Parent Company has not made any publicly announced new products or services nor it or any of its security holders of another person, aside from the previously stated acquisition by Tidemark of additional shares of Forum. The Parent Company has no plans of purchasing or selling any significant equipment.

The Share Swap

In May 2024, the BOD approved the exchange of 24,125,383 shares in FEL with 430,243,903 common shares in PXP Energy Corporation (PXP) (Share Swap).

After the Share Swap, the Group will no longer have a direct interest in FEL and will instead own 18% of the resulting total issued and outstanding capital stock of PXP. The aggregate value of the PXP Shares, as approved by the SEC on February 13, 2025, amounted to P1,557.0 million (at an issue price of P3.62 per share).

Following the approval by the SEC of the valuation and satisfaction of other closing conditions, on March 18, 2025, PXP issued the PXP Shares to the Group, and the Group transferred the FEL Shares to PXP.

The related gain from the transaction to be recognized in 2025 amounted to P813.7 million, which is the difference between the fair value of PXP shares as compared to the carrying amount of investment in an associate.

Management Plan of Operations

The Parent Company is hoping to get the government approval for its application for an Exploration Permit over an area of 3,375 Hectares in CADT134, Agusan Del Norte. While in the process, it will continue to conduct a series of field inspections to understand the mineralization occurrence in preparation for more

detailed exploration activities. Concurrent to the field activities in CADT134, exploration works continue in Mt. Daraga (587 Hectares), Mendez (486 Hectares) and Aboloc (567 Hectares) areas also in Agusan Del Norte, all under Memoranda of Agreement. "Sweet" areas (High Grade areas for gold mineralization) within Mt. Daraga and Mendez have been identified for more detailed subsurface activities. From November 2013 to June 2025, the mining exploration cost of the Group amounted to ₱5,299,494.

Plans involving oil and gas exploration have been shelved in relation to uncertainty in the supply and demand situation. SC72 is kept on hold depending on the outcome of Philippines Government initiatives involving West Philippine Sea. The Philippine Department of Energy has granted a force majeure on SC72 because this contract area falls within the territorial disputed area of the West Philippine Sea, which is the subject of a United Nations arbitration process between the Republic of the Philippines and the People's Republic of China.

The Group will continue to fund its operations in the next year or two depending on the activities that will materialize using its cash and its money market investments.

The vision of the Group remains and that is to have a substantial involvement in the exploration and judicious development of various natural resources that will contribute to the economic development of the Philippines. The Group's mission is to be the leader in chosen fields by creating value through change, utilizing the group's knowledge capital and adopting leading technologies, to enhance shareholders' value and profit through growth in earnings and in intrinsic worth, to be committed to a culture of excellence, loyalty and pride, and to be a socially responsible and environmentally conscious corporate citizen, adhering to the highest ethical standards and respecting the communities to which it belongs.

Currently, the Group has no plan of increasing its number of employees during the next twelve (12) months, however, if the level of activities increases parallel to a more supporting regulatory position on exploration and mining, the Group is expected to increase the number of its employees.

There were no material off-balance sheet transactions, arrangements, obligations, and other relationships of the Group with unconsolidated entities or other persons during the reporting period.

The general purposes of the capital expenditures are to explore and locate additional gold ore reserves of better grade, conduct pilot tests, secure all the Group's assets, and keep the mineral rights in good standing.
