TKC METALS CORPORATION AND SUBSIDIARIES

NOTES UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. Corporate Information

TKC Metals Corporation, (the Parent Company or TKC) was organized and registered with the Philippine Securities and Exchange Commission (SEC) on November 28, 1996. TKC's shares of stock were listed for trading in the Philippine Stock Exchange (PSE) on July 20, 2001. The Company is primarily a holding company and is engaged in marketing and selling of purlins and galvanized iron sheets.

As at December 31, 2024, TKC is 44.38% directly owned by JTKC Equities, Inc. (JEI) and 39.47% indirectly owned by JEI through Star Equities, Inc. (SEI). Accordingly, JEI is the Ultimate Parent of TKC. JEI and SEI are both holding companies and were incorporated in the Philippines.

On August 9, 2024, the Board of Directors approved the amendment of the Company name from TKC Metals Corporation to Tiger World Holdings Corporation. The approval of the application from SEC is still pending as of December 31, 2024.

On December 5, 2023, the SEC approved the Company's application to increase its authorized capital stock. Consequently, the deposit for future subscriptions amounting to P1,500.0 million was applied to capital stock and additional paid-in capital.

On the same date, the SEC also approved the amendment of the Company's Articles of Incorporation (AOI) to change its principal office address from Unit B1-A/C, 2nd Floor, W Tower Condominium, 39th Street, North Bonifacio Triangle, Bonifacio Global City, Taguig.

On October 3, 2024, the Corporation decided to sell its subsidiaries, Treasure Steelworks Corporation and Campanilla Mineral Resources, Inc., due to their continuous operational losses.

2. Summary of Material Accounting Policy Information

Basis of Preparation

The financial statements have been prepared in compliance with Philippine Financial Reporting Standards (PFRS) issued by the Philippine Financial and adopted by the SEC. This financial reporting framework includes PFRS, Philippine Accounting Standards (PAS) and Philippine Interpretations from International Financial Reporting Interpretations Committee (IFRIC) and SEC provisions.

Measurement Bases

The financial statements are presented in Philippine Peso (PHP), the Company's functional and presentation currency. All values represent absolute amounts except when otherwise stated.

The financial statements of the Company have been prepared on the historical cost basis of accounting, except for retirement liability which is measured at present value of defined benefit obligation. Historical cost is generally based on the fair value of the consideration given in exchange for an asset or consideration paid in exchange for the incurrence of a liability.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Adoption of Amendments to PFRS

The accounting policies adopted are consistent with those of the previous financial year, except for the adoption of the following amendments to PFRS effective January 1, 2024:

•Amendments to PAS 1, *Classification of Liabilities as Current or Noncurrent* – The amendments clarify the requirements for an entity to have the right to defer settlement of the liability for at least 12 months after the reporting period. The amendments also specify and clarify the following: (i) an entity's right to defer settlement must exist at the end of the reporting period,(ii) the classification is unaffected by management's intentions or expectations about whether the entity will exercise its right to defer settlement, (iii) how lending conditions affect classification, and (iv) requirements for classifying liabilities where an entity will or may settle by issuing its own equity instruments.

•Amendments to PAS 7 and PFRS 7, *Supplier Finance Arrangements* – The amendments introduce new disclosure requirements to enhance transparency and, thus, the usefulness of the information provided by entities about supplier finance arrangements.

•Amendments to PAS 1, *Non-current Liabilities with Covenants* – The amendments clarify that only covenants with which an entity must comply on or before the reporting date will affect a liability's classification as current or non-current. Additional disclosures are required for non-current liabilities arising from loan arrangements that are subject to covenants to be complied with within twelve months after the reporting period.

•Amendments to PAS 16, *Lease Liability in Sale and Leaseback* – The amendments clarify how a seller-lessee measures the lease liability arising in a sale and leaseback transaction in a way that it does not recognize any amount of the gain or loss that relates to the right of use retained.

The adoption of the foregoing amendments to PFRS did not materially affect the financial statements of the company. Additional disclosures were included in the financial statements, as applicable.

Amendments to PFRS and in Issue But Not Yet Effective or Adopted

Relevant amendments to PFRS, which are not yet effective as at December 31, 2024 and have not been applied in preparing the financial statements, are summarized below.

Effective for annual periods beginning on or after January 1, 2026 –

- PFRS 17, *Insurance Contracts* – PFRS 17 sets out the requirements that an entity should apply in reporting information about insurance contracts it issues and reinsurance contracts it holds. It requires an entity that issues insurance contracts to report them on the balance sheet as the total of the fulfillment cash flows and the contractual service margin. It requires an entity to provide information that distinguishes two ways insurers earn profits from insurance contracts: the insurance service result and the financial result. It requires an entity to report as insurance revenue the amount charged for insurance coverage when it is earned, rather than when the entity receives premium. It requires that insurance revenue to exclude the deposits that represent the investment of the policyholder, rather than an amount charged for services. Similarly, it requires the entity to present deposit repayments as settlements of liabilities rather than as insurance expense. PFRS 17 is effective for annual periods beginning on or after January 1, 2027. However, all Mutual Benefits Associations (MBAs) doing business in the Philippines is effective beginning on or after January 1, 2030. Early application is permitted for entities that apply PFRS 9, Financial Instrument and PFRS 15, Revenue from Contracts with Customers on or before the date of initial application of PFRS 17. An entity shall apply PFRS 17 retrospectively unless impracticable, except that an entity is not required to present the quantitative information required by paragraph 28 of PAS 8, Accounting Policies, Changes in Accounting Estimates and Errors and an entity shall not apply
- Amendments to PAS 21, *The Effects of Changes in Foreign Exchange Rates - Lack of Exchangeability* – The amendments clarify when a currency is considered exchangeable into another currency and how an entity determines the exchange rate for currencies that lack exchangeability. The amendments also introduce new disclosure requirements to help users of financial statements assess the impact when a currency is not exchangeable. An entity does not apply the amendments retrospectively. Instead, an entity recognizes any effect of initially applying the amendments as an adjustment to the opening balance of retained earnings when the entity reports foreign currency transactions. When an entity uses a presentation currency other than its functional currency, it recognizes the cumulative amount of translation differences in equity. Earlier application is permitted.

Under prevailing circumstances, the adoption of the foregoing amendments to PFRS is not expected to have any material effect on the consolidated financial statements of the Group. Additional disclosures will be included in the consolidated financial statements, as applicable.

Financial Assets and Liabilities

Date of Recognition. The Company recognizes a financial asset or a financial liability in the statement of financial position when it becomes a party to the contractual provisions of a financial instrument. In the case of a regular way purchase or sale of financial assets, recognition and derecognition, as applicable, is done using settlement date accounting.

Initial Recognition and Measurement. Financial instruments are recognized initially at fair value, which is the fair value of the consideration given (in case of an asset) or received (in case of a liability). The initial measurement of financial instruments, except for those designated at fair value through profit and loss (FVPL), includes transaction cost.

Classification. The Company classifies its financial assets at initial recognition under the following categories: (a) financial assets at FVPL, (b) financial assets at amortized cost and (c) financial assets at fair value through other comprehensive income (FVOCI).

Financial Assets at Amortized Cost. Financial assets shall be measured at amortized cost if both of the following conditions are met:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, financial assets at amortized cost are subsequently measured at amortized cost using the effective interest method, less allowance for impairment, if any. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the financial assets are derecognized and through amortization process. Financial assets at amortized cost are included under current assets if realizability or collectability is within 12 months after the reporting period. Otherwise, these are classified as noncurrent assets.

As at December 31, 2024 and 2023, the Company's cash, trade and other receivables (excluding advances to officers and employees) and due from related parties are classified under this category.

Financial Liabilities

Classification. The Company classifies its financial liabilities as either financial liabilities at FVPL or financial liabilities at amortized cost. The classification of a financial instrument largely depends on the Group's business model and its contractual cash flow characteristics.

As at December 31, 2024 and 2023, the Group does not have financial liabilities at FVPL.

Financial Liabilities at Amortized Cost. Financial liabilities are categorized as financial liabilities at amortized cost when the substance of the contractual arrangement results in the Company having an obligation either to deliver cash or another financial asset to the holder, or to settle the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of its own equity instruments.

These financial liabilities are initially recognized at fair value less any directly attributable transaction costs. After initial recognition, these financial liabilities are subsequently measured at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any discount or premium on the issue and fees that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the liabilities are derecognized or impaired or through the amortization process. Financial liabilities at amortized cost are included under current liabilities if maturity is within 12 months from reporting date. Otherwise, these are classified as noncurrent liabilities.

As at December 31, 2024 and 2023, the Company's trade and other payables (excluding statutory liabilities), loans payable and due to related parties are classified under this category.

Impairment of Financial Assets at Amortized Cost

The Company records an allowance for impairment losses on its financial assets measured at amortized cost based on expected credit loss (ECL). ECL is based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive. The difference is then discounted at an approximation to the asset's original effective interest rate.

Trade Receivables, Other Receivables, Due from Related Parties and Refundable Deposits. For trade receivables, other receivables, due from related parties and refundable deposits, the Group has applied the simplified approach in measuring ECL.

The Company has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment and an assessment of both the current as well as the forecasted direction of conditions at the reporting date, including time value of money where appropriate.

Other Financial Instruments Measured at Amortized Cost. For these instruments, the ECL is based on the 12-month ECL, which pertains to the portion of lifetime ECL that result from default events on a financial instrument that are possible within 12 months after the reporting date.

However, when there has been a significant increase in credit risk since initial recognition, the allowance will be based on the lifetime ECL. When determining whether the credit risk of a financial asset has increased significantly since initial recognition, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and consider reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition.

Derecognition of Financial Assets and Liabilities

Financial Assets. A financial asset (or where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the right to receive cash flows from the asset has expired;
- the Company retains the right to receive cash flows from the financial asset, but has assumed an obligation to pay them in full without material delay to a third party under a "pass-through" arrangement; or
- the Company has transferred its right to receive cash flows from the financial asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its right to receive cash flows from a financial asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of ownership of the financial asset nor transferred control of the financial asset, the financial asset is recognized to the extent of the Company's continuing involvement in the financial asset. Continuing involvement that takes the form of a guarantee over the transferred financial asset is measured at the lower of the original carrying amount of the financial asset and the maximum amount of consideration that the Company could be required to pay.

Financial Liabilities. A financial liability is derecognized when the obligation under the liability is discharged, cancelled or has expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in profit or loss.

A modification is considered substantial if the present value of the cash flows under the new terms, including net fees paid or received and discounted using the original effective interest rate, is different by at least 10% from the discounted present value of remaining cash flows of the original liability.

The fair value of the modified financial liability is determined based on its expected cash flows, discounted using the interest rate at which the Group could raise debt with similar terms and conditions in the market. The difference between the carrying value of the original liability and fair value of the new liability is recognized in profit or loss.

On the other hand, if the difference does not meet the 10% threshold, the original debt is not extinguished but merely modified. In such case, the carrying amount is adjusted by the costs or fees paid or received in the restructuring.

Advances to Officers and Employees

Advances to officers and employees represent advances which are subject to liquidation. These are carried at face amount less impairment, if any, in the consolidated statement of financial position and are recognized to the corresponding expense account upon liquidation.

Other Current Assets

Other current assets consist of creditable withholding tax (CWT) and advances to suppliers.

CWT. CWT represents the amount withheld by the Company's customers in relation to its income. CWT can be carried forward to the succeeding year when in excess of income tax payable and utilized as payment for income taxes provided that these are properly supported with certificates of creditable tax withheld at source. CWT is stated at face amount less any impairment in value.

Advances to Suppliers. Advances to suppliers are amounts paid in advance for the purchase of goods and services. These are initially recognized at the amount of cash paid and subsequently measured at cost less any impairment in value. These are reclassified to the corresponding asset account when the goods or services for which the advances were made are received.

Property, Plant and Equipment

Property, plant and equipment are stated at cost less accumulated depreciation, amortization and any accumulated impairment value.

The initial cost of property and equipment comprises its purchase price, including import duties, nonrefundable purchase taxes after deducting trade discounts and rebates and any directly attributable costs of bringing the asset to its working condition and location for its intended use. The cost of self-constructed assets includes the cost of materials and direct labor, any other costs directly attributable to bringing the assets to a working condition for their intended use, the costs of dismantling and removing the items and restoring the site on which they are located and capitalized borrowing costs.

Expenditures incurred after the property, plant and equipment have been put into operation, such as repairs, maintenance and overhaul costs, are normally recognized in profit or loss in

the year the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property, plant and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as additional costs of property, plant and equipment. The cost of replacing a component of an item of property, plant and equipment is recognized if it is probable that the future economic benefits embodied within the component will flow to the Company, and its cost can be measured reliably. The carrying amount of the replaced component is derecognized.

When significant parts of an item of property, plant and equipment have different useful lives, these are accounted for as separate items (major components) of property, plant and equipment.

Depreciation and amortization are computed using the straight-line method over the following estimated useful lives of the property, plant and equipment:

	Number of Years
Machinery and equipment	5 to 20
Buildings and leasehold improvements	20 and 3 or term of the lease, whichever is shorter, respectively
Office equipment, furniture and fixtures	3 to 5
Tools	3 to 5
Transportation equipment	5 to 10

The assets' estimated useful lives and depreciation and amortization method are reviewed periodically to ensure that these are consistent with the expected pattern of economic benefits from items of property, plant and equipment.

Fully depreciated and amortized assets are retained in the accounts until they are no longer in use and no further charge for depreciation and amortization is made in respect of these assets. When assets are retired or otherwise disposed of, the cost and the related accumulated depreciation, amortization and any impairment in value are removed from the accounts. Any resulting gain or loss is recognized in profit or loss.

Leasehold rights are stated at cost less accumulated amortization and any impairment in value. Leasehold rights are measured on initial recognition at cost which includes purchase price and other direct costs. Subsequent to initial recognition, leasehold rights are carried at cost less any accumulated amortization and any impairment losses. Amortization is computed on a straight-line basis over 25 years based on the terms of the lease agreement.

The estimated useful lives and amortization method are reviewed periodically to ensure that these are consistent with the expected pattern of economic benefits from the leasehold rights.

When leasehold rights are retired or disposed of, the cost and the related accumulated amortization and any impairment in value are removed from the accounts. Any resulting gain or loss is recognized in profit or loss.

Borrowing Costs

Borrowing costs that are directly attributable to the acquisition, construction of a qualifying asset, which necessarily takes a substantial period of time to prepare for its intended use are included in the cost of that asset. Such borrowing costs are capitalized as part of the cost of the asset when it is probable that these will result in future economic benefits to the Company and the costs can be measured reliably. Other borrowing costs are recognized as expense.

Capitalization of borrowing costs is suspended during extended period in which the Company suspends active development of a qualifying asset and ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use are complete. An asset is normally ready for its intended use when the physical construction of the asset is complete even though routine administrative work might still continue.

Other Noncurrent Assets

Other noncurrent assets consist of input VAT and advances to contractors.

Input VAT. Revenue, expenses and assets are recognized net of the amount of VAT, except for receivables that are stated with the amount of VAT included. Input VAT is stated at face amount less impairment in value, if any. The Company classifies input VAT as current when it is expected to be realized within 12 months from the reporting period. Otherwise, this is classified as noncurrent asset.

Impairment of Nonfinancial Assets

Nonfinancial assets consisting of property, plant and equipment, leasehold rights and other nonfinancial assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If any such indication exists and where the carrying amount of an asset exceeds its recoverable amount, the asset or cash- generating unit is written down to its recoverable amount. The estimated recoverable amount is the higher of an asset's fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs. Impairment losses are recognized in profit or loss.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. After such a reversal the depreciation and amortization charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over remaining useful life.

Equity

Capital Stock and Additional Paid-in Capital. Capital stock is measured at par value for all shares issued. Proceeds and/or fair value of considerations received in excess of par value, if any, are recognized as additional paid-in capital. Incremental costs incurred directly attributable to the issuance of new shares are recognized in equity as deduction from proceeds, net of tax.

Deficit. Deficit represents the cumulative balance of net income or losses.

Other Equity Reserves. Other equity reserves represent items of income and expenses that are not recognized in the consolidated profit or loss for the year. This includes cumulative remeasurement gains and losses on retirement liability, net of deferred tax, cumulative translation adjustment and adjustments to equity.

Adjustments to Equity. Adjustments to equity pertain to adjustments resulting from changes in ownership of non-controlling interest.

Revenue Recognition

Revenue from contract with customers is recognized when the performance obligation in the contract has been satisfied, either at a point in time or over time. Revenue is recognized over time if one of the following criteria is met: (a) the customer simultaneously receives and consumes the benefits as the Group perform its obligations; (b) the Company's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or (c) the Company's performance does not create an asset with an alternative use to the Company and the Company has an enforceable right to payment for performance completed to date. Otherwise, revenue is recognized at a point in time.

Net Sales. Net sales is recognized when the risk and rewards of ownership of the goods have passed to the buyer and the amount of revenue can be measured reliably net of returns and discounts, if any. The performance obligations from sale of goods are satisfied upon delivery and are recognized at a point in time.

Revenue outside the scope of PFRS 15 is recognized as follows:

Interest Income. Income is recognized as the interest accrues taking into account the effective yield on the assets, net of final tax.

Other Income. Income from other sources is recognized when earned during the period.

Cost and Expense Recognition

Costs and expenses are recognized in profit or loss when a decrease in future economic benefit related to a decrease in an asset or an increase in a liability has arisen that can be measured reliably.

Costs of Goods Sold. Costs of goods sold are recognized as expense when the related goods are sold.

General and Administrative Expenses. General and administrative expenses constitute costs of administering the business and costs incurred to sell and market the goods. These are expensed when incurred.

Interest Expense. Interest expense is recognized in profit or loss using the effective interest method.

Basic and Diluted Income (Loss) per Share

The Company presents basic and diluted income (loss) per share. Basic income (loss) per share is calculated by dividing the income (loss) attributable to equity holders of the Company by the weighted average number of common shares outstanding during the year, excluding common shares purchased by the Company and held as treasury shares. Diluted income (loss) per share is calculated in the same manner, adjusted for the effects of all the dilutive potential common shares.

The Company has no potential dilutive common shares.

Leases

A contract is, or contains, a lease when it conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys

the right to control the use of an identified asset for a period of time, the Company assesses whether, throughout the period of use, the customers has both of the following:

- The right to obtain substantially all of the economic benefits from use of the identified asset; and
- The right to direct the use of the identified asset.

If the Company has the right to control the use of an identified asset for only a portion of the term of the contract, the contract contains a lease for that portion of the term.

The Company also assesses whether a contract contains a lease for each potential separate lease component.

Group as a Lessee. At the commencement date, the Company recognizes ROU asset and a lease liability for all leases, except for leases with lease terms of 12 months or less (short-term leases) and leases for which the underlying asset is of low value in which case the lease payments associated with those leases are recognized as an expense on a straight-line basis.

Lease Liabilities. At commencement date, the Company measures lease liabilities at the present value of future lease payments using the interest rate implicit in the lease, if that rate can be readily determined. Otherwise, the Company uses its incremental borrowing rate.

Lease payments included in the measurement of a lease liability comprise the following:

- Fixed payments, including in-substance fixed payments;
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- Amounts expected to be payable under a residual value guarantee; and
- The exercise price under a purchase option that the Group is reasonably certain to exercise, lease payments in an optional renewal period if the Group is reasonable certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonable certain not to terminate early.

A lease liability is subsequently measured at amortized cost. Interest on the lease liability and any variable lease payments not included in the measurement of lease liability are recognized in profit or loss unless these are capitalized as costs of another asset. Variable lease payments not included in the measurement of the lease liability are recognized in profit or loss when the event or condition that triggers those payments occurs.

If there is a change in the lease term or if there is a change in the assessment of an option to purchase the underlying asset, the lease liability is remeasured using a revised discount rate considering the revised lease payments on the basis of the revised lease term or reflecting the change in amounts payable under the purchase option. The lease liability is also remeasured using the revised lease payments if there is a change in the amounts expected to be payable under a residual value guarantee or a change in future lease payments resulting from a change in an index or a rate used to determine those payments.

Employee Benefits

Short-term Benefits. The Company provides short-term benefits to its employees in the form of basic pay, 13th month pay, bonuses, employer's share on government contribution, and other short-term benefits. Short-term employee benefit liabilities are measured on an undiscounted basis and are expensed as the related service is provided.

Retirement Benefits. The Company has unfunded, non-contributory retirement plan covering its qualified employees. Costs of retirement benefits are actuarially determined using the projected unit credit method. This method reflects service rendered by employees to the date of valuation and incorporates assumptions concerning employees' projected salaries.

The Company recognizes service costs, comprising of current service costs, gains and losses on curtailments and non-routine settlements, and net interest expense or income in profit or loss.

Past service costs are recognized in profit or loss on the earlier of the date of the plan amendment or curtailment; and the date that the Group recognizes restructuring-related costs.

Interest on retirement liability is the change during the period in the retirement liability that arises from the passage of time which is determined by applying the discount rate based on government bonds to the retirement liability. Interest is calculated by applying the discount rate to the defined benefit liability.

Remeasurements comprising actuarial gains and losses are recognized in the period in which they arise. Remeasurements are directly recognized in OCI and are not reclassified to profit or loss in subsequent periods.

The present value of the defined benefit liability is determined by discounting the estimated future cash outflows using interest rate on government bonds that have terms to maturity approximating the terms of the related retirement liability.

Actuarial valuations are made with sufficient regularity that the amounts recognized in the consolidated financial statements do not differ materially from the amounts that would be determined at the reporting date.

Income Taxes

Current Tax. Current tax is the expected tax payable on the taxable income for the year, using tax rate enacted or substantively enacted at the reporting date.

Deferred Tax. Deferred tax is provided on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized for all deductible temporary differences, and carry forward benefits of the excess of minimum corporate income tax (MCIT) over the regular corporate income tax (RCIT) and net operating loss carryover (NOLCO), to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences, excess MCIT and NOLCO can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient future taxable profit will be available to allow all or part of the deferred tax assets to be utilized.

Deferred tax assets and liabilities are measured at the tax rate that is expected to apply to the period when the asset is realized or the liability is settled, based on tax rate (and tax laws) in effect at the reporting date.

Deferred tax assets and liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Foreign Currency Transactions and Translation

The functional currency of the Company is the Philippine Peso and determines its own functional currency and items included in the financial statements are measured using that functional currency.

Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the reporting date. All differences are taken to the consolidated statement of comprehensive income. Nonmonetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Nonmonetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Related Parties

Related party relationship exists when one party has the ability to control, directly, or indirectly through one or more intermediaries, or exercise significant influence over the other party in making financial and operating decisions. Such relationships also exist between and/or among entities which are under common control with the reporting entity, or between, and/or among the reporting entity and its key management personnel, directors or its stockholders. In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely to the legal form. Related party transactions consist of transfers of resources, services or obligations between the Group and its related parties.

Related party transactions are considered material and/or significant if (i) these transactions amount to 10% or higher of the Group's total assets or, (ii) there are several transactions or a series of transactions over a 12-month period with the same related party amounting to 10% or higher of the Group's total assets. Details of transactions entered into by the Company with related parties are reviewed by the Risk and Audit Committee and the BOD in accordance with the Group's related party transactions policies.

Provisions and Contingencies

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events, it is more likely than not that an outflow of resources will be required to settle the obligation; and the amount can be reliably estimated.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognized as interest expense.

Provisions are reviewed at the end of each reporting year and adjusted to reflect the current best estimate.

Contingent liabilities are not recognized in the financial statements. These are disclosed in the notes to financial statements unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is not recognized in the consolidated financial statements but disclosed in the notes to financial statements when an inflow of economic benefits is probable.

Events After the Reporting Date

Post year-end events that provide additional information about the Company's financial position at the end of reporting year (adjusting events) are reflected in the financial statements when material. Post year-end events that are non-adjusting events are disclosed in the notes to financial statements when material.

3. Significant Accounting Judgments and Estimates

The preparation of the Company's financial statements in accordance with PFRS requires management to make judgment, accounting estimates and assumptions that affect the application of accounting policies and the amounts of assets, liabilities, income and expenses reported in the financial statements at the reporting date. The judgment and accounting estimates and assumptions used in the consolidated financial statements are based upon management's evaluation of relevant facts and circumstances as of the date of the consolidated financial statements. While the Company believes that the assumptions are reasonable and appropriate, significant differences in the actual experience or significant changes in the assumptions may materially affect the estimated amounts. Actual results could differ from such estimates. Such estimates will be adjusted accordingly when the results become determinable.

Judgment, accounting estimates and assumptions are continually evaluated and are based on historical experiences and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The management has an ongoing negotiation with an investor group for business ventures mainly in the field of information technology and broadband internet. Moreover, the Company's stockholders and other related parties continued to provide the necessary financial support to sustain the Company's operations and to settle its maturing obligations.

Management has assessed that the Company can continue as a going concern. Accordingly, the financial statements were prepared on a going concern basis.

Estimating the ECL on Trade Receivables, Other Receivables, Due from Related Parties and Refundable Deposits. The Company estimates ECL on these financial assets at amortized cost using a provision matrix which considers the Company's historical credit loss experience adjusted for forward- looking factors, as appropriate.

The amounts and timing of recorded expenses for any period would differ if different estimates and assumptions were made or different estimates were utilized. An increase in the allowance for ECL would increase the recognized expense and decrease current assets.

Provision for ECL on trade receivables, other receivables, due from related parties and refundable deposits in 2024 and the carrying amount of trade receivables, other receivables, due from related parties and refundable deposits as at December 31, 2024.

Estimating the ECL on Other Financial Assets at Amortized Cost. The Company determines the allowance for ECL using general approach based on probability-weighted estimate of the present value of all cash shortfalls over the expected life of the financial assets at amortized cost. ECL are provided for credit losses that result to possible default events within 12-months unless there has been a significant increase in credit risk since initial recognition, in which case, ECL are provided based on lifetime expected credit loss.

While cash in banks are subject to the impairment requirements of PFRS 9, the resulting impairment loss is not significant primarily because these are with reputable counterparty banks

that possess good credit rating. Cash in banks as at December 31, 2024 are disclosed in Note 4 to the financial statements.

No provision for ECL was recognized on nontrade receivable from a third party in 2024. The carrying amount of nontrade receivable from a third party as at December 31, 2024 is disclosed in the financial statements.

Estimating the Useful Lives of Property, Plant and Equipment and Leasehold Rights. The Company estimates the useful lives of property, plant and equipment, and leasehold rights based on the period over which the assets are expected to be available for use. The estimates are based on a collective assessment of industry practice, internal technical evaluation and experience with similar assets. The estimated useful lives of property and equipment and leasehold rights are reviewed at each reporting date and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets. Future results of operations could be materially affected by changes in estimates brought about by changes in the factors mentioned above. The amount and timing of recording of depreciation expense for any period would be affected by changes in these factors and circumstances.

There were no changes in the estimated useful lives of property, plant and equipment and leasehold rights in 2024.

Depreciation and amortization in 2024 and carrying amounts of property, plant and equipment and leasehold rights as at December 31, 2024 are disclosed in the financial statements.

Assessing the Impairment of Nonfinancial Assets

a. Property, Plant and Equipment, and Leasehold Rights

The Company assesses impairment on property, plant and equipment, and leasehold rights whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The factors that the Company considered important which could trigger an impairment review include the following:

- Significant underperformance relative to expected historical or projected future operating results;
- Significant changes in the manner of use of the acquired assets or the strategy for overall business; or
- Significant negative industry or economic trends.

Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized. Recoverable amounts are estimated for individual assets or, if it is not possible, for the cash-generating unit to which the asset belongs.

No impairment loss on property, plant and equipment, and leasehold rights was recognized by the Group in 2024. The carrying amounts of property, plant and equipment and leasehold rights as at December 31, 2024 are disclosed in the financial statements.

b. CWT and Input VAT

The carrying amounts of the CWT and input VAT are adjusted to an extent that it is probable that sufficient taxable profit and revenue subject to output VAT, respectively, will be available to allow all or part of the CWT and input VAT to be recoverable. Any allowance for unrecoverable portion of CWT and input VAT is maintained at a level considered adequate to

provide for potentially unrecoverable portion. The level of allowance is based on past application experience and other factors that may affect recoverability.

Determining the Retirement Benefit Costs. The determination of the Company's obligation and cost of retirement benefits is dependent on the assumptions used by the actuary in calculating such amounts. These assumptions to the consolidated financial statements and include, among others, discount rates and salary increase rates. Actual results that differ from the Company's assumptions are accumulated and amortized over future periods and therefore, generally affect the recognized expense and recorded obligation in such future periods. While the Company has assessed that the assumptions are reasonable and appropriate, significant differences in the actual experience or significant changes in the assumptions may materially affect the retirement benefit obligations.

Recognizing the Deferred Tax Assets. The carrying amount of deferred tax assets at each reporting date are reviewed and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized. The Company's assessment on the recognition of deferred tax assets on deductible temporary differences is based on the forecasted taxable income of the subsequent reporting periods. This forecast is based on the Company's past results and future expectations on revenue and expenses.

As at December 31, 2024, the Company did not recognize deferred tax assets. The Company has assessed that it is not probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets disclosed in the financial statements.

4. Cash

This account consists of:

	Septem 30, 2025	2024
Cash in banks	₱526,821	₱559,430
Cash on hand	20,000	20,000
	₱546,821	₱579,430

Cash on hand and cash in banks are stated at face value. Cash in banks earn interest at the prevailing bank deposit rates and are immediately available for use in the current operations.

Interest income earned on cash in banks amounted to P353 and P906 as of September 30, 2025 and 2024, respectively.

5. Trade and other receivables

This account consists of:

	September 30, 2025	2024
Trade receivables	₱57,081,124	₱57,081,124
Non-trade receivables from a third party	781,562,601	783,112,601
Advances to employees	6,301,827	6,301,827
Others	81,444,176	81,444,176
	₱926,389,728	₱927,939,728
Less: Allowance for ECL	(57,585,593)	(57,585,593)
	₱868,804,135	₱870,354,135

Trade receivables are unsecured and non-interest bearing. Trade receivables from third parties are generally collectible on a 30 to 90-day credit term while trade receivables from related parties are collectible on demand.

Non-trade receivable from third party includes unpaid balance from the sale of Billions Steel International Ltd. These receivables are unsecured and non-interest bearing.

Other mainly pertain to advances to a third party which are unsecured, non-interest bearing and collectible on demand.

6. Trade and Other Payables

This account consists of:

	September 30, 2025	2024
Trade payables	₱1,589,671	₱1,628,071
Accrued expenses	24,334,041	24,525,508
Salaries payable	16,779,028	16,779,028
Statutory payable	4,658,977	4,665,927
Others	474,280	474,278
	₱47,835,997	₱48,072,812

Trade payables consist of unsecured and interest and noninterest-bearing obligations that are payable in cash. Trade payables to third parties are normally settled within one year while trade payables to related parties are payable on demand.

Accruals pertain to professional fees and taxes already incurred but not yet billed and paid. These are generally settled within one year.

Salaries payable pertain to the unpaid salaries to its employees which is expected to be settled within one year.

Statutory payables pertain to obligations to government agencies that should be settled in the following month.

Others mainly pertain to nontrade payables to third parties and normally settled within one year.

Item 2 – Management Discussion and Analysis of Financial Conditions and Results of Operations

The table below presents the summary of operating and financial information of the company for the periods ending September 30, 2025, September 30, 2024 and December 31, 2024.

The information below is not necessarily indicative of the results of future operations or financial condition of the company:

Summary of Comprehensive Income		
<i>Amounts in ₦ millions</i>	Unaudited	Unaudited
	September 30, 2025	September 30, 2024
Net sales	0.00	1.70
Cost of goods sold	0.00	3.88
Gross income	0.00	(2.18)
Operating expenses	1.31	(26.60)
Operating income (loss)	(1.31)	(28.78)
Other Income (Charges)	0.00	(15.12)
Profit (loss) before tax	(1.31)	(43.90)
Net profit (loss)	(1.31)	(43.90)
Comprehensive income (loss)	(1.31)	(43.90)

Difference in decimal numbers are due to rounding off

Material changes to the Statements of Comprehensive Income for the period ended September 30, 2025 and September 30, 2024.

Revenue

For the third quarter of 2025, the Corporation did not recognize any revenue. The reported revenue of ₱0.01 million in the same period of 2024 pertained to the operations of a subsidiary previously owned by the Corporation.

Cost of sales

No cost of goods sold was recognized for the second quarter of 2025 and 2024.

General and administrative expenses

For the third quarter of 2025, operating expenses showed a significant decrease from ₱7.97 million to ₱0.03 million. The substantial decrease is primarily attributable to the exclusion of expenses related to the subsidiaries previously owned by the Corporation.

Finance cost

Due to the full settlement of the Company's loans payable in December 2024, no finance costs were recognized for the third quarter of 2025, compared to the ₱6.56 million in finance costs recorded during the same period in 2024.

Material changes to the Statements of Financial Position as of September 30, 2025 compared to the Statement of Financial Position as of December 31, 2024.

Cash

Cash balance declined from ₱0.57 million in 2024 to ₱0.54 million as of September 30, 2025. The change reflects the net effect of collections from receivables from third parties and payments of expenses by the Company.

Trade and other receivables

A year-to-date collection from Non-trade receivables amounting to P1.6 million was posted, a marginal decrease from P870.35 million in 2024 to P868.80 million as of September 30, 2025.

Other current assets

The slight increase in other current assets pertains to services purchased by the Company.

Trade and other payables

Trade and other payables registered a minor decline, decreasing from P48.07 million in 2024 to P47.80 million as of September 30, 2025.

Item 3 – Other Relevant Information

On August 9, 2024, the Board of Directors approved to sell the shares of the Corporation in Treasure Steelworks Corporation and Campanilla Mineral Resources, Inc. Due to the sale of the subsidiaries in October 3, 2024, the Corporation no longer holds any control nor influence over the said companies, thus the obligation to consolidate the financial statements ceases.

For comparative purposes, the Corporation used the 2024 consolidated balances in the Statements of Comprehensive Income, Changes in Equity, and Cash Flows, as the Company only disposed of its subsidiaries in October 2024. Accordingly, these consolidated 2024 figures are presented against the third quarter 2025 results.

TKC METALS CORPORATION
Aging of Trade Receivables
